Directors of the Fund

Chairman

Silvio Cruz – member of the board of directors since January 2012

Mr. Cruz is a Senior Vice President and Managing Director in Global Product Strategy & Development at AllianceBernstein. In addition, Mr. Cruz is the Chairman of AllianceBernstein (Luxembourg) S.à r.l. Since 1996, Mr. Cruz has garnered experience in areas that include servicing cross-border retail, institutional and private client distribution channels, fund structuring, fund launches, fund governance, business strategy and oversight, product strategy and development, fund accounting, fund administration, custody and transfer agency activities in support of AB's investment-management and funds-related activities in Luxembourg, the UK, Ireland, Japan, Hong Kong, Taiwan, the US and the Cayman Islands. Mr. Cruz previously served as a mutual fund accountant at New York Life Insurance Company. Mr. Cruz holds a BS in accounting from Rutgers University and an MBA with a concentration in finance from Rutgers Business School. Mr. Cruz is a FINRA-registered General Securities Representative licensed in the State of New York and Tennessee with Series 7 and 63, and a Chartered Alternative Investment Analyst (CAIA).

Directors

Bertrand Reimmel – member of the board of directors since August 2012

Mr. Reimmel, Senior Vice President, joined AllianceBernstein (Luxembourg) S.à r.l. in August 2005 as the Head of the Legal & Compliance Department and, since 2012, he also assumes the role of Managing Director of AllianceBernstein (Luxembourg) S.à r.l. As Managing Director, Mr. Reimmel oversees the Legal, Investment Compliance, Fund and Discretionary Portfolio Management, Product Development and Management, Internal Audit and Corporate Accounting functions. Mr. Reimmel became a member of the Luxembourg Bar in 1998 and, before joining AllianceBernstein (Luxembourg) S.à r.l., worked for more than eight years at Elvinger Hoss Prussen, one of the leading Luxembourg law firm, where he already covered AllianceBernstein files. Mr. Reimmel is also a key element in the launch and restructuring of each AllianceBernstein European UCITS and AIF. Furthermore, Mr. Reimmel is an active member of various ALFI working groups and peer groups and a former member of the CSSF GFI Committee. His 20 years of experience in the Luxembourg and European fund industry and his significant technical expertise to UCITS and Alternative Investment Funds make him one of the most-senior lawyers within the AllianceBernstein International Legal Group.

Olivia Moessner – member of the board of directors since October 2019

Ms. Moessner is a partner in the collective asset management and investment funds practice at Elvinger Hoss Prussen. She advises a number of investment fund promoters and other financial institutions in relation to the set-up and structuring of their Luxembourg investment fund operations. Her practice encompasses a broad range of investment funds (UCITS, UCIs, SIFs and RAIFs) implementing various investments strategies including hedge fund strategies.

Ms. Moessner is a member of the board of directors and one of the co-chairs of the regulatory board of ALFI (Association of the Luxembourg Fund Industry). She also takes part in numerous working groups of ALFI and EFAMA on various key European topics in the asset management industry. She is a lecturer at the University of Luxembourg, Master in Investment Funds Law.

Susanne van Dootingh – member of the board of directors since January 2020

Ms. van Dootingh is an independent non-executive director of several Luxembourg domiciled investment funds and management companies. Prior to becoming an iNED she was at State Street Global Advisors from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy EMEA. Prior to this she held various senior positions within State Street Global Advisors in Global Product and Fixed Income Product Engineering. Before joining SSGA in 2002 she worked at Fortis Investment Management, Barclays Global Investors, and ABN AMRO Asset Management. She graduated from the Vrije Universiteit Amsterdam with a Master of Arts in Financial Sector Management.

Vincent Noto – member of the board of directors since October 2023

Mr. Noto served as a Senior Vice President and Director of Fund Compliance within the Legal and Compliance department of AB L.P from 2015 through December, 2025. Mr. Noto retired from AB L.P. on December 31, 2025. Mr. Noto had over 35 years of experience with AB L.P, which included senior roles within Global Fund Administration and Legal and Compliance. He served as the Controller for AB L.P.'s 1940 Act Funds from 1998-2007 and as the Chief Compliance Officer for AB's 1940 Act Funds during the period 2015-2022. During the period of 2011 through 2025, he provided training to Portfolio Management regarding UCITS rules/guidelines and 1940 Act rules. Mr. Noto had responsibility for investment compliance oversight for AB L.P.'s co-mingled vehicles from 2011-2025, which included European UCITS. Mr. Noto has extensive experience in reporting to Fund Boards on the following topics: fund administration, compliance matters, valuation, portfolio trading matters, new or amended policies, new Fund launches, fund mergers, and new security types. He has garnered extensive experience in areas that include investment compliance, fund administration/accounting, transfer agency, and product development during the course of his career. Mr. Noto holds a BS in Accounting from St. Peters College and an MBA with a concentration in Finance from Fairleigh Dickinson University.

Stuart Corrigall – member of the board of directors since October 2025

Mr. Corrigall, Vice President, joined AB in February 2024 as Senior International Counsel, based in AB's London office. Mr. Corrigall is responsible for the oversight of international legal matters with a focus on the product development and distribution of UCITS and AIF products globally. With an international mandate he sits on a number of fund boards and internal committees supporting AB's global business. Mr. Corrigall qualified as a UK lawyer in 2003 and spent a decade in private practice before joining BlackRock from international law firm Eversheds Sutherland. At BlackRock, Mr Corrigall was a Managing Director and during his tenure he was Head of BlackRock's Product Structuring, Product Governance, Investment Oversight functions in EMEA and also CEO of BlackRock's UK management company. Mr Corrigall's expertise across asset management issues has been widely recognised by the European industry over the years with notable appointments including his selection by ESMA in 2017 as an adviser to its Investment Management Standing Committee and by EFAMA in 2020 as Chair of its Fund Regulation Standing Committee.

Structure of the Fund

AB SICAV I (the "Fund") is an open-ended investment company with variable capital (*société d'investissement à capital variable*) incorporated with limited liability under the laws of the Grand Duchy of Luxembourg on June 8, 2006 and registered under Part I of the law of December 17, 2010 on undertakings for collective investment (as amended) (the "Law of 2010"). The Fund qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS") within the meaning of Article 1(2) of the EC Directive 2009/65 of July 13, 2009 (as amended).

The Fund is structured as an "umbrella fund" comprising separate pools of assets (each a "Portfolio"). As of May 31, 2026, the Fund had 54 Portfolios.

The Fund offers various classes of shares of each of its Portfolios. All Shares of the same Class have the same rights as to distributions and redemptions. Certain Portfolios offer both ETF Share Classes and Non-ETF Share Classes.

Several Portfolios and share classes of the Fund are registered for distribution in the following jurisdictions: Austria, Bahrain, Belgium, Chile, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Hungary, Liechtenstein, Iceland, Ireland, Israel, Italy, Japan, Jersey, South Korea, Macau, The Netherlands, Norway, Poland, Portugal, Romania, Singapore, Slovakia, Spain, Sweden, Switzerland, Taiwan, United Arab Emirates and the United Kingdom.

Role and responsibility of the board of directors

a. General Information

For the year under review, the following persons have been appointed as directors of the Fund:

- **Silvio Cruz,** Chairman, Executive Director
- **Bertrand Reimmel,** Executive Director
- **Susanne van Dootingh,** Independent Director
- **Olivia Moessner,** Independent Director
- **Vincent Noto,** Non-Executive Director
- **Stuart Corrigall,** Executive Director*

**Effective October 30, 2025*

The responsibility of the board of directors of the Fund (the "Board") is governed exclusively by Luxembourg law. The Board is responsible for the overall management and control of the Fund in accordance with the Fund's articles of incorporation.

The Board is further responsible for the implementation of each Portfolio's investment objective and policies, as well as for oversight of the administration and operations of each Portfolio.

b. Depositary

The Board has appointed Brown Brothers Harriman (Luxembourg) S.C.A. (the "Depositary") as the depositary of the Fund for (i) the safekeeping of the assets of the Fund (ii) the cash monitoring, (iii) the oversight functions and (iv) such other services as agreed from time to time and reflected in the Depositary Agreement.

The Depositary is a credit institution established in Luxembourg, whose registered office is situated at 80, route d'Esch, L-1470 Luxembourg, and which is registered with the Luxembourg register of commerce and companies under number B29923. It is licensed to carry out banking activities under the terms of the Luxembourg law of 5 April 1993 on the financial services sector, as amended.

c. Delegated functions

Management Company

The Board has appointed AllianceBernstein (Luxembourg) S.à r.l. as the Management Company of the Fund to be responsible on a day-to-day basis, under supervision of the Board, for providing administration, marketing, investment management and advisory services in respect of all portfolios.

The Management Company is (i) a management company authorized under chapter 15 of the Law of 2010 and (ii) an alternative investment fund manager in Luxembourg authorized under chapter 2 of the law of 12 July 2013 on alternative investment fund managers.

AllianceBernstein Investor Services, a unit of the Management Company, acts as registrar and transfer agent of the Fund. In such capacity, the Transfer Agent is responsible for processing purchases, redemptions, exchanges and transfers of Shares of the Fund.

Investment Manager

In respect of all portfolios, the Management Company has delegated its investment management and advisory functions to AllianceBernstein L.P., a Delaware limited partnership with principal offices at 501 Commerce Street, Nashville, Tennessee, 37203, U.S.A., a leading global investment manager providing diversified services to institutions and individuals through a broad line of investments, pursuant to the terms of an Investment Management Agreement.

Administrator

The Management Company has delegated the administration functions of the Fund to Brown Brothers Harriman (Luxembourg) S.C.A. pursuant to the terms of the Administration Agreement. In such capacity, it is responsible for the general administrative functions of the Fund required by Luxembourg law, such as the calculation of the Net Asset Value of the Shares and the maintenance of accounting records. Brown Brothers Harriman (Luxembourg) S.C.A. also acts as paying agent of the Fund.

Board Meetings

Four board meetings were held during the fiscal year of the Fund. The Board will meet quarterly generally in January, April, July and October but if necessary ad hoc meetings will be arranged.

There were two ad hoc board of directors' meeting held during the fiscal year of the Fund in September 2025 and March 2026.

Events during the fiscal year

- The Portfolio AB SICAV I - Multi-Sector Credit Portfolio was liquidated. The last official NAV was calculated on June 30, 2020. As of May 31, 2026, four illiquid securities remain unsold at Custody as at year-end. There are no public markets to sell the securities.
- The Portfolio AB SICAV I - Sustainable Emerging Market Debt Portfolio was liquidated. The last official NAV was calculated on April 20, 2023. As of May 31, 2026, cash balance for the Portfolio amounted to $24,407.
- The portfolio AB SICAV I – Short Duration Income Portfolio was liquidated. The last official NAV was calculated on June 22, 2023. As of May 31, 2026, one illiquid security remains unsold at Registrar as at year-end. There are no public markets to sell the security.
- The portfolio AB SICAV I – Low Volatility All Market Income Portfolio was liquidated. The last official NAV was calculated on December 21, 2023. As of May 31, 2026, one illiquid security remains unsold at Custody as at year-end. There are no public markets to sell the security.
- The Portfolio AB SICAV I - China Multi-Asset Portfolio was liquidated. The last official NAV was calculated on November 25, 2024. As of May 31, 2026, cash balance for the Portfolio amounted to $22,428.
- Effective November 25, 2025, AB SICAV I – Eurozone Equity Portfolio was enhanced into a new strategy under the name AB SICAV I – Eurozone Growth Portfolio. It was also resolved by the Board to approve redesignation of the current classes A, A AUD H, A PLN H, A SGD H, A USD, A USD H, AR, C, C USD, C USD H, I, I USD, I USD H, INN, S1, S1 AUD H, S1 USD, S1 USD H and S1N shares of AB SICAV I – Eurozone Equity Portfolio, to classes AXX, AX AUD H, AX PLN H, AX SGD H, AXX USD, AX USD H, ARX, CXX, CXX USD, CX USD H, IXX, IXX USD, IX USD H, INNX, S1X, S1X AUD H, S1X USD, S1X USD H and S1NX shares of AB SICAV I – Eurozone Growth Portfolio, respectively. Class I GBP share was closed on August 14, 2025, and new class with the same class name was launched under AB SICAV I – Eurozone Growth Portfolio on November 26, 2025.
- It was resolved by the Board to approve the creation of the new portfolios within the Fund: AB SICAV I – Global Corporate Bond Portfolio, AB SICAV I - Global Disruptors Portfolio and AB SICAV I - Global Research Advanced Equity Portfolio. The Portfolios commenced operations on April 21, 2026, May 27, 2026 and May 27, 2026, respectively.
- It was resolved by the Board to approve the transfer of all assets and liabilities (the "CN0 Merger") of AB SICAV I - China Net Zero Solutions Portfolio into AB SICAV I - China A Shares Equity Portfolio. The "CN0 Merger" was effective as of February 6, 2026, at the exchange ratio of 1:1.
- It was also resolved by the Board to approve the transfer of all assets and liabilities (the "GGP Merger") of AB SICAV I - Global Growth Portfolio into AB SICAV I - Global Growth Portfolio (formerly Concentrated Global Equity Portfolio). The GGP Merger was effective as of February 27, 2026, at the exchange ratio of 1:1.
- Effective February 27, 2026 AB SICAV I – Concentrated Global Equity Portfolio was renamed AB SICAV I - Global Growth Portfolio and changed its investment policy.
- It was resolved by the Board to approve redesignation, at the effective date of February 27, 2026, of the current classes A, I, I GBP and S1 shares of AB SICAV I - Global Growth Portfolio (formerly Concentrated Global Equity Portfolio), to classes AXX, IXX, IX GBP and S1XX shares, respectively.
- It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current classes EI and EI AUD H shares of AB SICAV I - Short Duration High Yield Portfolio, to classes EIX and EIX AUD H shares, respectively.
- It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current classes EI and EI AUD H shares of AB SICAV I - US High Yield Portfolio, to classes EIX and EIX AUD H shares, respectively.
- It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current class EI shares of AB SICAV I - Global Plus Fixed Income Portfolio, to class EIX Shares, respectively.

June 20, 2026

Dear Shareholder,

This report provides an update for AB SICAV I (the "Fund") for the annual reporting period ended May 31, 2026.

US, international and emerging-market stocks increased during the 12-month period that ended on May 31, 2026. Easing trade tensions boosted global equity markets to begin the period despite rising uncertainty over Federal Reserve (the "Fed") rate cuts. As the Fed shifted its focus to labor market weakness, the central bank lowered interest rates three times in the second half of 2025. Concerns over technology stock valuations weighed on US markets at the end of 2025 and in early 2026, and investors looked to diversify into value-oriented sectors and non-US markets.

The outbreak of the Iran conflict in March sent energy prices sharply higher and global stocks lower, but equity markets rebounded in April and May as investors looked past surging inflationary pressures and ongoing uncertainty around geopolitical developments. Broad enthusiasm about AI powered a strong tech stock rally that helped US equities outperform other developed markets and boosted emerging markets across Asia. Within large-cap markets, both growth and value stocks rose in absolute terms, with growth outperforming on a relative basis. Both large- and small-cap stocks increased in absolute terms, with small caps outperforming on a relative basis.

Fixed-income government bond market yields were volatile as investors adjusted their expectations for US tariffs, inflation, growth, deficits and central bank decisions. Yields generally fell over most of the period until March, when the conflict in the Middle East began, then drifted higher to end the period. Government bond returns rose in aggregate over the year. Returns were the highest in New Zealand, Italy, Spain and the US, and fell in Japan. Overall, developed-market investment-grade corporate bonds rose and solidly outperformed government bonds, as corporates outperformed treasuries in the eurozone and the US.

Developed-market high-yield corporate bonds advanced and outperformed treasury markets by a wide margin, particularly in the eurozone and US. Emerging-market hard-currency sovereign bonds outperformed developed-market treasuries by a significant margin, mainly due to the strong performance of high-yield sovereigns. Overall, emerging-market hard-currency corporate bonds also had solid results, again boosted by high-yield corporates. Emerging-market local-currency bonds had solid results as the US dollar fell against most developed-market currencies and was mixed against emerging-market currencies over the period.

We appreciate your investment in the Fund.

Sincerely,

AllianceBernstein L.P., the Investment Manager of the Fund

The share class performance of each Portfolio is based on the net asset value incorporating the impact of expenses reimbursed or waived by the Management Company as of May 31, 2026. No adjustment has been made for sales charges that may apply when shares are purchased or redeemed. Performance for distributing share classes includes the reinvestment of distributions paid during the year. Past performance is no guarantee of future results. Investment return and principal value may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

* 6 months period ending May 31, 2026.

** Share class created as a result of a merger of Global Growth Portfolio into Global Growth Portfolio (formerly Concentrated Global Equity Portfolio). See Note A.

(a) Share class re-designated. See note A.

Return calculated from inception date on:

NOTE A: General Information
AB SICAV I (the "Fund") is an open-ended investment company with variable capital (*société d'investissement à capital variable*) incorporated with limited liability under the laws of the Grand Duchy of Luxembourg on June 8, 2006 and registered under Part I of the law of December 17, 2010 on undertakings for collective investment (as amended) (the "Law of 2010"). The Fund qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS") within the meaning of Article 1(2) of the EC Directive 2009/65 of July 13, 2009 (as amended).

The Fund is structured as an "umbrella fund" comprising separate pools of assets (each a "Portfolio").

The Fund offers various classes of shares of each of its Portfolios. All Shares of the same Class have the same rights as to distributions and redemptions.

The Portfolio AB SICAV I - Multi-Sector Credit Portfolio was liquidated. The last official NAV was calculated on June 30, 2020. As of May 31, 2026, four illiquid securities remain unsold at Custody as at year-end. There are no public markets to sell the securities.

The Portfolio AB SICAV I - Sustainable Emerging Market Debt Portfolio was liquidated. The last official NAV was calculated on April 20, 2023. As of May 31, 2026, cash balance for the Portfolio amounted to $24,407.

The portfolio AB SICAV I – Short Duration Income Portfolio was liquidated. The last official NAV was calculated on June 22, 2023. As of May 31, 2026, one illiquid security remains unsold at Registrar as at year-end. There are no public markets to sell the security.

The portfolio AB SICAV I – Low Volatility All Market Income Portfolio was liquidated. The last official NAV was calculated on December 21, 2023. As of May 31, 2026, one illiquid security remains unsold at Custody as at year-end. There are no public markets to sell the security.

The Portfolio AB SICAV I - China Multi-Asset Portfolio was liquidated. The last official NAV was calculated on November 25, 2024. As of May 31, 2026, cash balance for the Portfolio amounted to $22,428.

Effective November 25, 2025, AB SICAV I – Eurozone Equity Portfolio was enhanced into a new strategy under the name AB SICAV I – Eurozone Growth Portfolio. It was also resolved by the Board to approve redesignation of the current classes A, A AUD H, A PLN H, A SGD H, A USD, A USD H, AR, C, C USD, C USD H, I, I USD, I USD H, INN, S1, S1 AUD H, S1 USD, S1 USD H and S1N shares of AB SICAV I – Eurozone Equity Portfolio, to classes AXX, AX AUD H, AX PLN H, AX SGD H, AXX USD, AX USD H, ARX, CXX, CXX USD, CX USD H, IXX, IXX USD, IX USD H, INNX, S1X, S1X AUD H, S1X USD, S1X USD H and S1NX shares of AB SICAV I – Eurozone Growth Portfolio, respectively. Class I GBP share was closed on August 14, 2025, and new class with the same class name was launched under AB SICAV I – Eurozone Growth Portfolio on November 26, 2025.

It was resolved by the Board to approve the creation of the new portfolios within the Fund: AB SICAV I - Global Corporate Bond Portfolio, AB SICAV I - Global Disruptors Portfolio and AB SICAV I - Global Research Advanced Equity Portfolio. The Portfolios commenced operations on April 21, 2026, May 27, 2026 and May 27, 2026, respectively.

It was resolved by the Board to approve the transfer of all assets and liabilities (the "CN0 Merger") of AB SICAV I - China Net Zero Solutions Portfolio into AB SICAV I - China A Shares Equity Portfolio. The "CN0 Merger" was effective as of February 6, 2026, at the exchange ratio of 1:1.

It was also resolved by the Board to approve the transfer of all assets and liabilities (the "GGP Merger") of AB SICAV I - Global Growth Portfolio into AB SICAV I - Global Growth Portfolio (formerly Concentrated Global Equity Portfolio). The GGP Merger was effective as of February 27, 2026, at the exchange ratio of 1:1.

Effective February 27, 2026 AB SICAV I - Concentrated Global Equity Portfolio was renamed AB SICAV I - Global Growth Portfolio and changed its investment policy.

It was resolved by the Board to approve redesignation, at the effective date of February 27, 2026, of the current classes A, I, I GBP and S1 shares of AB SICAV I - Global Growth Portfolio (formerly Concentrated Global Equity Portfolio), to classes AXX, IXX, IX GBP and S1XX shares, respectively.

It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current classes EI and EI AUD H shares of AB SICAV I - Short Duration High Yield Portfolio, to classes EIX and EIX AUD H shares, respectively.

It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current classes EI and EI AUD H shares of AB SICAV I - US High Yield Portfolio, to classes EIX and EIX AUD H shares, respectively.

It was resolved by the Board to approve redesignation, at the effective date of April 30, 2026, of the current class EI shares of AB SICAV I - Global Plus Fixed Income Portfolio, to class EIX shares, respectively.

Certain Portfolios offer both ETF Share Classes and Non-ETF Share Classes. All Share Classes of a Portfolio invest in the same underlying portfolio of assets, although they may differ in their fees, expenses, investor eligibility requirements, dealing arrangements and other characteristics. The Portfolios in the Fund that offer ETF Share Classes are actively managed.

An "ETF Share Class" refers to a Share Class specifically designated "UCITS ETF" and admitted to trading on one or more Recognised Stock Exchanges.

ETF Share Classes are listed and/or admitted to trading, as applicable to the relevant ETF Share Class, on one or more of the following Recognised Stock Exchanges:

- Deutsche Börse Xetra;
- London Stock Exchange;
- Borsa Italiana; and
- SIX Swiss Exchange.

The exchange or exchanges, trading currencies and ticker applicable to each ETF Share Class are specified in the relevant Share Class information and on the Management Company's website. A listing may be added, changed or discontinued from time to time in accordance with applicable requirements.

The following table lists each Portfolio's commencement of operations as well as Share Classes funded as of May 31, 2026:

AB SICAV I–	Commencement of Operations	Share Classes Funded
International Health Care Portfolio	September 1, 2006	A, A EUR, A EUR H, A RMB H, A SGD, A SGD H, AD, AD AUD H, AP, AP AUD H, AX, B, B SGD, C, C EUR, ED, ED AUD H, EP, EP AUD H, I, I EUR, I GBP, S, S1, S1 EUR, S1 EUR H, S1 GBP, S14, S14 EUR, S14 GBP, S1NN, S1NN EUR, S1NN GBP, S5NN, S5NN EUR, S5NN GBP & SP
International Technology Portfolio	September 1, 2006	A, A AUD H, A EUR, A PLN H, A SGD, B, C, C EUR, E, E AUD H, I, I EUR, S, S1, S1 EUR & S14
Global Real Estate Securities Portfolio	September 1, 2006	A, A EUR, AD, AD AUD H, AD NZD H, AD SGD H, B, C, I, I EUR, ID, S, S1, S1 EUR, S1 GBP & S1L

NOTE B: Significant Accounting Policies
The Financial Statements have been prepared in accordance with Luxembourg legal and regulatory requirements and on a going concern basis, except for Sustainable Climate Solutions Portfolio whose financial statements have been prepared on a non-going concern basis as the Board of Directors has decided to liquidate this Portfolio on July 9, 2026, with assets recorded at their estimated realisable values and liabilities at estimated settlement values. The following is a summary of significant accounting policies followed by the Portfolios.

1. Valuation
1.1 Investments in Securities
Securities listed on a stock exchange or traded on any other regulated market are valued at the last sale price on such exchange or market or, if there has been no sale on such day, at the mean of the closing bid and asked price quoted on such day. If a security is listed on several stock exchanges or markets, the last sale price on the stock exchange or market which constitutes the principal market for such security is used.

Securities traded in the over-the-counter market, including securities listed on an exchange whose primary market is believed to be over-the-counter (but excluding securities traded on The Nasdaq Stock Market, Inc. ("NASDAQ")) are valued at the mean of the current bid and asked prices. Securities traded on NASDAQ are valued in accordance with the NASDAQ Official Closing Price.

Securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at "fair value" as determined in accordance with procedures established by, and under the general supervision of, the Management Company's Board of Managers (the "Board of Managers") and the Board of Directors.

Fair valuation procedures are designed to adjust closing market prices of securities to reflect what is believed to be the fair value of those securities at the Portfolio's Valuation Point.

When fair valuation procedures are employed with respect to a particular security, various objective and subjective factors may be considered, including, among other things, developments affecting the security or involving an entire market since the security's latest reported price, current valuations of relevant stock indices or pronouncements of certain governmental authorities. Fair value prices based on third party vendor modeling tools may be utilized to the extent available. Therefore, when fair valuation procedures are employed, the prices of individual securities utilized to calculate the Portfolio's Net Asset Value ("NAV") may differ from quoted or published prices for the same securities.

Currently, fair value adjustments are only applicable to certain equity securities and futures contracts.

Accordingly, as may also be the case with a previously reported stock exchange price, the price of any portfolio security determined utilizing fair value pricing procedures may be materially different from the price to be realized upon the sale of such security.

For portfolio securities primarily traded on U.S. and Indian exchanges, it is expected that fair value pricing procedures are employed only under very limited circumstances such as, for example, the early closing of an exchange on which a particular security is traded or the suspension of trading in particular security. However, it is anticipated that fair value pricing procedures will be utilized frequently for securities traded on non-U.S. exchanges or other markets, particularly European and Asian markets, excluding India, because, among other reasons, these markets close well before the Portfolio's Valuation Point. Between the close of these markets and the relevant Portfolio's Valuation Point, significant events including broad market moves may occur. In particular, events in the U.S. market on a trading day after the close of these other markets may affect the value of the Portfolio's securities.

Fixed income securities (i), securities not listed on any stock exchange, or traded on any regulated market (ii), and securities, trading of which on a stock exchange or a regulated market is thin (iii), are valued at the most recent bid price provided by the principal market makers. If there is no such market price, or if such market price is not representative of a security's fair market value, then the security is valued in a manner determined to reflect its fair value in accordance with procedures established by, and under the general supervision of, the Board of Managers and the Board of Directors.

U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market price by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued at amortized cost. This methodology is commonly used for short-term securities that have an original maturity of 60 days or less, as well as short-term securities that had an original term to maturity that exceeded 60 days. In instances when amortized cost is utilized, the valuation committee (the "Committee") must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates.

Over-the-counter ("OTC") swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties.

1.2 Warrant Valuation
A listed warrant is valued at the last traded price provided by approved vendors. If there has been no sale on the relevant business day, the warrant is valued at the last traded price from the previous day. On the following days, the security is valued in good faith at fair value. All unlisted warrants are valued in good faith at fair value. Once a warrant has expired, it will no longer be valued.

1.3 Financial Futures Contracts
Initial margin deposits are made upon entering into futures contracts. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealized losses or gains are incurred. When the contract is closed, a realized gain or loss is recorded. This realized gain or loss is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Open futures contracts are valued using the closing settlement price or, in the absence of

such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used.

1.4 Forward Foreign Currency Contracts
The unrealized gain or loss on open forward foreign currency contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realized profit or loss includes net gains or losses on forward foreign currency contracts which have been settled or offset by other contracts with the same counterparty.

1.5 Options Purchased and Options Written
When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased. Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realized losses. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or loss. If a purchased call option is exercised, the premium increases the cost basis of the security or foreign currency purchased by the relevant Portfolio. When an option is written, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio on the expiration date as realized gains. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security or foreign currency purchased by the relevant Portfolio. Listed put or call options purchased by a Portfolio are valued at the last sale price. If there has been no sale on that day, such securities are valued at the closing bid prices on that day.

1.6 Investments in other Undertakings for Collective Investment ("UCIs")
Investments in other UCIs are valued at the last available NAV for the UCI in question.

1.7 Swap Agreements
The Portfolios accrue for interim payments on swap contracts on a daily basis, within income and expenses. Swap contracts are marked to market on a daily basis with fluctuations in value recorded in "Unrealized appreciation (depreciation) on swaps" in the Statement of Assets and Liabilities and "Changes in unrealized gains and (losses) on swaps" in the Statement of Operations and Changes in Net Assets. Once a swap contract has matured or is sold, the net amount is recorded as "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" in the Statement of Operations and Changes in Net Assets. The upfront premiums paid or received are recognized as cost or proceeds in the Statement of Assets and Liabilities and are amortized in a straight line basis over the life of the contract. Accruals of amortized upfront premiums on credit default swaps are included in "Swap income" until the position is sold, thereafter the amortized upfront premiums are included within "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency". On all other swap types the amortized upfront premiums are included within "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency". Fluctuations in the value of swap contracts are recorded as a component of "Changes in unrealized gains and (losses) on swaps" in the Statement of Operations and Changes in Net Assets.

"Upfront premiums paid/(received) on swap contracts" disclosed in the Statement of Assets and Liabilities include premiums paid (received) on the OTC credit default and interest rate swaps and a margin that is yet to be settled on the centrally cleared credit default swaps.

2. Organization Expenses
The organization expenses for the following Portfolios are being amortized on a straight-line basis through the following dates:

AB SICAV I–	Dates
Sustainable Income Portfolio	June 2026
Security of the Future Portfolio	December 2028
US Value Portfolio	April 2029
Global Corporate Bond Portfolio	April 2031
Global Disruptors Portfolio	May 2031
Global Research Advanced Equity Portfolio	May 2031

The organization expenses of other existing Portfolios have been fully amortized in prior years.

For Global Growth Portfolio, USD Corporate Bond Portfolio, Euro Corporate Bond Portfolio and Global Equity Income and Growth Portfolio, the Investment Manager waived amounts due to them in relation to formation expenses and therefore the deferred organization expenses asset has been written down on these Portfolios during the year ended May 31, 2026.

3. Allocation Method
Income and expenses (except for class-specific management and distribution fees) for the "fixed income" and "balanced" Portfolios are allocated on a daily basis utilizing a hybrid allocation model. This model allocates based upon each class' proportionate percentage of the combined value of settled shares for those classes which accrue a daily dividend and the value of the shares outstanding for those classes which accrue a monthly dividend or no dividend at all.

Income and expenses for the "equity" Portfolios are allocated on a daily basis by each class' value of their proportionate shares outstanding.

For all of the Portfolios, realized and unrealized gains and losses are allocated on a daily basis by each class' value of their proportionate shares outstanding.

Class specific management, management company, distribution fees and realized and unrealized gains and losses on forward foreign currency contracts related to the Currency Hedged Share Classes are charged/allocated directly to the respective class.

Due to the distinct institutional nature of all types of Class S shares of the Portfolios, certain fund expenses, where applicable, are allocated to the Class S shares based upon minimum shareholder activity and account level requirements.

4. Currency Translation
Values expressed in a currency, other than the currency in which a Portfolio is denominated, are translated at the average of the

last available buying and selling price. Transactions in foreign currencies are translated into the currency of each Portfolio at the exchange rate ruling at the date of the transactions.

The Combined Statement of Assets and Liabilities is presented in U.S. Dollars at the exchange rates ruling at the date of the Combined Statement of Assets and Liabilities, while the Combined Statement of Operations and Changes in Net Assets is presented in U.S. Dollars at the average exchange rates ruling during the year. Exchange rates applied in the financial statements are: spot rate 1.1664 and average rate 1.1667 for EUR to USD, spot rate 0.1478 and average rate 0.1423 for CNH to USD and spot rate 1.3467 and average rate 1.3442 for GBP to USD.

The "Currency translation adjustment" presented in the Statement of Operations and Changes in Net Assets is the result of the difference in exchange rates used to translate combined net assets at the beginning of the year, the Statement of Assets and Liabilities and the Statement of Operations and Changes in Net Assets.

5. Investment Income and Investment Transactions
Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. Investment gains and losses for the Portfolios are determined on an average cost basis. The Fund accretes discounts and amortizes premiums as adjustments, if applicable, to interest income. Investment transactions are recorded on trade date plus one day.

6. Estimates
The preparation of the Financial Statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of income and expenses during the reporting year. Actual results may differ from those estimates.

7. Swing Pricing Adjustment
(The following applies to all Portfolios except for ETF Share Classes)

The Fund implemented a NAV Adjustment Policy, also known as "swing pricing" policy, effective from November 2, 2015. Under this policy, a Portfolio's NAV may be adjusted to reflect the impact of estimated transaction costs, deal spreads and charges generated by shareholders' purchase and redemption activity.

Swing pricing is automatically applied when daily net subscriptions or redemptions exceed a threshold specified by the Swing Pricing Committee under the supervision of the Board of Directors.

When swing pricing is applied, the NAV of the relevant Portfolio's shares will be adjusted up or down, in an amount generally not to exceed 2% of the relevant NAV, so that the transaction costs incurred due to the purchase and redemption activity are borne by the investors transacting in the Portfolio's shares, rather than the Portfolio itself. This adjustment is intended to minimize dilution of the value of shareholders' investment in shares of a Portfolio brought on by transactions in the Portfolio's shares.

The NAV per Share and the total net assets as disclosed in the Statistical Information are the published NAV per Share and the total net assets, whereas the total net assets disclosed in the Statement of Assets and Liabilities and Statement of Operations and Changes in Net Assets is the total NAV excluding any period end swing adjustments.

All Portfolios subject to swing pricing except Asia Income Opportunities Portfolio, Flexible Income Portfolio, American Growth Portfolio, Sustainable Income Portfolio, Sustainable Climate Solutions Portfolio, USD Corporate Bond Portfolio, Global Equity Income and Growth Portfolio, Global Corporate Bond Portfolio, Global Disruptors Portfolio and Global Research Advanced Equity Portfolio swung their NAVs during the reporting period and as of May 31, 2026, the following of such Portfolios swung their NAVs: Emerging Markets Multi-Asset Portfolio, All China Equity Portfolio and Security of the Future Portfolio.

NOTE C: Taxes
As a Luxembourg *société d'investissement à capital variable* ("SICAV"), the Fund is not subject, under present tax laws, to income, withholding or capital gains taxes in Luxembourg.

The Fund is subject to the Luxembourg *taxe d'abonnement* at the rate of 0.05% per annum calculated and payable quarterly, on the aggregate total net assets on the last day of each calendar quarter. The rate is 0.01% for share classes reserved to institutional investors within the meaning of Article 174 of the Law of 2010. ETF Share Classes are exempt. Dividends, interest and capital gains on Portfolio securities issued in certain countries may be subject to withholding or capital gains taxes imposed by such countries.

India

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 20% Indian capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long term gains) are subject to a 12.5% Indian capital gain tax. The capital gains taxes are accrued in the net asset value and included in the Statement of Assets and Liabilities under the heading 'Accrued expenses and other liabilities" or "Other receivables" and included in the Statement of Operations and Changes in Net Assets under 'Capital withholding tax' for the year ended May 31, 2026.

People's Republic of China (PRC)

Corporate Income Tax ("CIT")
By investing in shares of PRC resident enterprises (including China A-, B- and H-Shares), RMB denominated corporate and government bonds, securities investment funds and warrants listed on the PRC stock exchanges or PRC inter-bank bond markets, a Portfolio may be subject to withholding income tax ("WIT") and other taxes imposed in the PRC.

Lacking specific guidance, it is uncertain whether the RQFII or the relevant investing Portfolios would be considered the taxpayer with respect to the PRC-sourced income derived from the investment in bonds, shares and other securities in the PRC. In the event the RQFII were considered to be the taxpayer, any PRC taxes levied against the RQFII would be reimbursed and ultimately borne by the relevant Portfolios of the Fund.

If the relevant Portfolios are deemed to be the taxpayer, then such Portfolios will be subject to PRC CIT at 25% on its worldwide taxable income if it is considered to be a tax resident enterprise of the PRC. If the Portfolio is considered to be a nontax resident enterprise with an establishment or place of business ("PE") in the PRC, the PRC sourced profits attributable to that PE would be subject to CIT at 25%.

Under the PRC CIT Law effective from 1 January 2008, a foreign enterprise without a PE in the PRC will generally be subject to a WIT at the current rate of 10% on its PRC sourced income, including but not limited to passive income (e.g. dividends, interest, gains arising from transfer of assets, etc.), subject to the application of treaty relief.

The Investment Manager intends to manage and operate the Portfolios in such a manner that the Portfolios and the Fund not be treated as a tax resident enterprise of the PRC or a nontax resident enterprise with a PE in the PRC for CIT purposes, although this cannot be guaranteed. As such, it is expected that the Portfolios should only be subject to WIT at 10% to the extent the Portfolio directly derives PRC sourced income in respect of its investment in bonds, shares and other securities in the PRC.

Equity investments
With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the China Securities Regulatory Commission have jointly issued Caishui [2014] 79 ("Circular 79") to clarify the WIT treatment with respect to gains derived by QFIIs and RQFIIs from the disposal of equity investments, including shares in PRC enterprises. According to Circular 79, QFIIs and RQFIIs are temporarily exempt from WIT with respect to gains derived from the disposal of equity investments, including shares in PRC enterprises (e.g. A-Shares and B-Shares), via the QFII or RQFII investment quota, effective from November 17, 2014.

PRC tax disclosure regarding Stock Connect
In addition to investing in A-Shares via the RQFII quota of the RQFII Holder, the Fund may gain exposure to A-Shares through Stock Connect, which has commenced trading as of November 17, 2014.

With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the CSRC have jointly issued Caishui [2014] 81 ("Circular 81") to clarify the PRC tax treatment regarding China Connect Securities. Circular 81 is effective on November 17, 2014.

According to Circular 81, the Fund is subject to the following PRC income tax treatment with respect to the Northbound Trading under Stock Connect (i.e. trading of certain A-Shares on the SSE):

– Temporarily exempt from PRC WIT with respect to gains derived from the disposal of A-Shares.

– Subject to PRC WIT at 10% with respect to dividends received from A-Shares.

– Subject to PRC SD at 0.05% with respect to the sale of A-Shares (i.e. the purchase of A-Shares is not subject to PRC SD).

Investors should note that Stock Connect has limited or no history, and, accordingly, the taxation rules applicable to China Connect Securities traded on Stock Connect are not long established and subject to change in the future. Investors should seek advice from their professional tax advisors with any questions regarding China Connect Securities.

The PRC Ministry of Finance ("MOF") and PRC State Taxation Administration ("STA") have jointly issued Caishui [2018] 108 ("Circular 108") to clarify the 3-year PRC tax exemption treatment of bond interest derived by foreign institutional investors on 22 November 2018. According to Circular 108 and Announcement [2021] No. 34 ("Announcement 34"), foreign institutional investors are temporarily exempt from WIT and PRC Value-Added Tax with respect to bond interest income derived in the domestic bond market for the period from 7 November 2018 to 31 December 2027.

Neither Circular 108 nor Announcement 34 mentions the retroactive tax collection on bond interest derived prior to 7 November 2018.

NOTE D: Distributions
The following tables describe the frequency and nature of distributions, if applicable, for Base Currency Share Classes and suffixes as well as the meaning of other suffixes used by the Fund. Note that the distribution policy of a suffix supersedes the distribution policy of the base Share Class listed below.

	Distribution Policy Details	
Base Share Class	**Fixed Income Portfolios**	**All Other Portfolios**
A, B, C, E, I, IX, L, N, RX, XX, Z	Declares distributions daily and pays them monthly	Does not make distributions*
AS, EA, F, K, S, SU, S1, S5, W, 1, 2	Does not make distributions unless a suffix is used, as per below.	

Suffix	**Distribution Policy Details**
A *Example: AA*	Declares and pays distributions monthly, based on gross income and may pay out of capital
2 *Example: A2, 12*	Does not intend to make distributions
3 *Example: S13*	Does not intend to make distributions
4 *Example: S14*	Does not intend to make distributions
D *Example: AD, S1D*	For Equity/Multi-Asset Portfolios: declares and pays distributions monthly and may pay out of capital[1] For Fixed Income Portfolios: declares and pays distributions monthly based on net income and may pay out of capital

Suffix	Distribution Policy Details
I[2] *Example: AI, EI, EAI*	Declares and pays distributions monthly with a distribution rate to be derived from gross income (before deduction of fees and expenses) and from capital (potentially to a significant extent)
T *Example: AT*	Declares and pays distributions monthly based on net income and may pay out of capital
M *Example: AM*	Declares and pays distributions monthly at a fixed rate and may pay out of capital
QD *Example: SQD, S1QD*	Declares and pays distributions quarterly, based on net income, and may pay out of capital
MG *Example: AMG*	Declares and pays distribution monthly, based on gross income, and may pay out of capital
QG *Example: AQG*	Declares and pays distribution quarterly, based on gross income, and may pay out of capital
N *Example: AN, IN*	Does not intend to make distributions[3]
NN *Example: ANN, INN*	Annual distribution based on net income and will not pay out of capital
K *Example: AK, IK*	Distributions to be declared and payable bi-annually, based on net income, and may pay out of capital[4]
R *Example: AR*	Declares and pays distributions annually, based on gross income and may pay out of capital
L *Example: IL*	Monthly distributions based on net income and will not pay out of capital
P[5] *Example: AP, SP*	Declares and pays distributions monthly at a predominantly stable rate based on historical investment results and is expected to pay significantly out of capital.

Suffix	Additional information
X/XX *Example: A2X, AXX*	Designates share classes no longer offered for new investors[6] and may be used in addition to other suffixes relating to distribution.

UCITS ETF Shares Only

Suffix	Additional information
ACC *Example: UCITS ETF USD Acc*	Does not intend to make distributions.
DIST *Example: UCITS ETF USD Dist*	Intends to make distributions.

** All Market Income Portfolio Shares: AX, BX, and CX pay distributions quarterly based on net income and may pay out of capital.*

[1] *Global Real Estate Securities Portfolio: Share Class 1D pays distributions annually based on net income.*

[2] *These share classes are intended to be "decumulating" shares, designed to maximise distributions paid to Shareholders who are seeking high cash flows from their investment. The intended distribution rate will exceed the income attributable to the relevant Share Class and may require a substantial amount being paid from capital attributable to the relevant Share Class. Distributions may come from gross income (before reduction for fees and expenses), realized and unrealized gains and, potentially to a significant extent from capital attributable to the relevant class. Distributions in excess of net income (gross income less fees and expenses) may represent a return of the investor's original investment amount and as such, may result in a decrease in the Net Asset Value per share for the relevant class. If the Net Asset Value per share falls below, respectively USD 5 (or currency equivalent), the Board will contemplate at its full discretion, either (i) the restructuring of the Share Class including through the reverse split or through the merger with a Share Class with similar features or (ii) the liquidation of the Share Class. Distributions may be automatically reinvested at the election of the Shareholder.*

[3] *Eurozone Growth Portfolio: may declare and pay distributions annually based on net income and may pay out of capital.*

[4] *American Growth Portfolio: does not intend to make distributions.*

[5] *Distributions based on gross total return are largely derived from historical investment results including realized and unrealized capital gains. Gross total return means the capital and income return before the deduction of fees and expenses. Distributions are expected to exceed the increase in the NAV per Share from the net income and realized/unrealized capital gains of the Share Class resulting in erosion of capital.*

If the NAV per share of the Share Class falls below USD 10 (or relevant currency equivalent), the Board may either liquidate the Share Class or merge it with another Share Class that has similar features.

[6] *Except for Share Classes IX, XX, RX offered in Global Core Equity Portfolio.*

There is no guarantee that distributions will be made. A high distribution yield does not necessarily imply a positive or high return. Gross income means income before the deduction of fees and expenses.

All Shares that declare distributions must do so at least once a year (unless there is nothing to distribute or if making distributions is at the discretion of the Board or the Management Company) and must pay them within one month of declaration. When a dividend is declared, the NAV of the relevant Share Class is reduced by the amount of the dividend.

Distributions are paid only on Shares that were owned as of the record date (the date on which distributions are assigned

to Shares). For each Share Class, distributions are paid in the currency of that Share Class including the currency offered Share Class.

Unless otherwise specified above, all distributions indicated may consist of net income, gross income (interest and dividends before fees and expenses), realised and unrealised gains from Portfolio investments and/or capital invested in the Portfolio.

Distributions based on net income typically represent net income (gross income less fees and expenses). These distributions are based on actual investment results, do not target or project any particular rate or amount and may vary from one distribution period to another. Distributions in excess of net income may represent a return of the investor's original investment amount and as such may result in a decrease in the NAV per Share for the relevant Share Class.

Shareholders may request that their distributions be automatically reinvested. Unless reinvested, any distribution from capital may reduce a portfolio's future growth and increase the chances of capital loss. A high distribution yield does not necessarily imply a positive or high return.

No interest is paid on unclaimed dividend payments, and after 5 years these payments will be returned to the Portfolio.

The Board may offer new and different types of dividend-paying Share Classes for a Portfolio in the future.

The Board intends to maintain a stable distribution rate for the following Share Classes:

Portfolio	Share Classes and corresponding hedged Classes
International Health Care Portfolio	AD, AP, ED, EP, ID & SP
Global Real Estate Securities Portfolio	AD, ID & SD
Sustainable Global Thematic Portfolio	AD & SD

USD Corporate Bond Portfolio	AT, IT & ZT
Euro Corporate Bond Portfolio	AT, IT & ZT
Global Corporate Bond Portfolio	AA

The rate of distribution is determined by the Board at its discretion based on Portfolio strategy considerations.

During periods of negative performance, the distribution will normally continue to be paid and the capital value of the investment may fall more rapidly. It may not be possible to maintain the stable rate of distribution payment indefinitely and it may be reduced in part, or to zero.

Please note that in relation to the P suffix share classes only, whilst the monthly distribution rate is intended to be predominantly stable, the rate may be subject to adjustment on at least an annual basis and as otherwise required.

NOTE E: Management Fee and Other Transactions with Affiliates

The Fund pays the Management Company a management fee. Under the terms of the Investment Management Agreement from the management fee earned, the Management Company pays an investment management fee to the Investment Manager.

The Management Company has voluntarily agreed to bear certain expenses to the extent necessary to limit total operating expenses on an annual basis.

These limitations have been set as follows (limitations expressed as a percentage of the average daily net assets):

AB SICAV I–	Share Class	%

(a) Last official NAV calculated on February 6, 2026.
(b) Last official NAV calculated on February 27, 2026.

Expenses borne by the Management Company are included in the Statement of Operations and Changes in Net Assets under "Expense reimbursed or waived". Reimbursement receivable is included in the Statement of Assets and Liabilities under "Other receivables" or in "Accrued expenses and other liabilities".

The Fund also pays its Management Company, a Management Company fee. Specific share classes of each Portfolio will pay the Distributor, a distribution fee, which is compensation for providing distribution related services to the Fund with respect to such shares.

All of the aforementioned fees are accrued at an annual rate on the average daily net assets of each Portfolio and paid monthly.

A list of each Portfolio's annual rate for their applicable fees can be found in Table 1 (Page 463 to 488). Also, Class B, BD and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 4.00%. Class BX and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 3.00% or between 0.00% and 4.00%. Class B2, B2X, BT, E, EA, ED, EI and each applicable H shares are subject to a contingent deferred sales charge at rates of between 0.00% and 3.00%. Class C, C2, C2X, CD, CT, CX and each applicable H shares are subject to a contingent deferred sales charge at rates between 0.00% and 1.00% which may be waived in certain circumstances by the dealer.

The Fund compensates its registrar and transfer agent, AllianceBernstein Investor Services, a unit of the Management Company, under a Management Fund Services Agreement for providing personnel and facilities to perform registrar and transfer agency services for the Fund. Such compensation amounted to $16,504,814 for the year ended May 31, 2026.

The Fund compensates the Investment Manager for certain services provided to the Fund in connection with the registration

of the Fund for sale in certain jurisdictions outside of Luxembourg, subject to certain conditions. For the year ended May 31, 2026, such compensation amounted to $855,744 and is included in "Professional fees" in the Statement of Operations and Changes in Net Assets.

The Fund compensates its legal adviser, Elvinger Hoss Prussen, *société anonyme* for legal services rendered to the Fund. Payments of €106,088 were made for the year ended May 31, 2026 and are included in "Professional fees" in the Statement of Operations and Changes in Net Assets.

The Investment Manager has not entered into transactions in relation to a placing and/or a new issue in which a connected person had a material interest as a member of the underwriting syndicate.

All transactions executed on behalf of the Fund were entered into in the ordinary course of business and/or normal commercial terms.

There was no commission paid for the year ended May 31, 2026 on securities transactions utilizing the services of the affiliated firms, Bernstein Institutional Services LLC and Bernstein Autonomous LLP. Several of the Management Company's managers are employees and/or officers of the Investment Manager and/or its affiliates.

Global Plus Fixed Income Portfolio invests in AB FCP I – Mortgage Income Portfolio, a portfolio which is managed by the Management Company. US High Yield Portfolio invests in AB FCP I – Mortgage Income Portfolio, a portfolio which is managed by the Management Company. American Multi¬Asset Portfolio invests in AB FCP I – American Income Portfolio, a portfolio which is managed by the Management Company.

The Fund's directors are entitled to remuneration for their services. Such accrued compensation amounted to $174,478 for the year ended May 31, 2026 and is included in "Miscellaneous" in the Statement of Operations and Changes in Net Assets.

NOTE F: Soft Commission Arrangements and Transaction Costs

During the year ended May 31, 2026, where permitted under applicable law, the Investment Manager and any Affiliated Sub-Investment Manager, if applicable, received and entered into soft-dollar commissions/arrangements with brokers relating to Portfolios of the Fund that invest in equity securities, in respect of which certain goods and services used to support the investment decision making process were received. The soft commission arrangements were entered into on the basis that the execution of transactions on behalf of the Fund will be consistent with best execution standards and the Investment Manager considers many factors regarding best execution standards when entering into soft commission arrangements such as the size and nature of brokerage fees.

Additionally, due to the nature of the investment strategy of certain Portfolios, including where the Investment Manager delegates investment management services to AllianceBernstein Limited, AllianceBernstein (Europe) Limited, all costs associated with soft commission arrangements may be "unbundled" and borne by the Investment Manager or its sub-delegates, if required by applicable law.

The goods and services received include specialist industry, company and consumer research, portfolio and market analysis and computer software used for the delivery of such services.

The nature of the goods and services received is such that the benefits provided under the arrangement must be those which assist in the provision of investment services to the Fund and may contribute to an improvement in the Fund's performance.

For the avoidance of doubt, such goods and services do not include travel, accommodations, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees' salaries or direct money payments.

Transaction costs are costs incurred in the acquisition, issue or disposal of transferable securities, money market instruments, derivatives or other eligible assets. They can include bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges. They do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction costs are included within the cost of investments in the Portfolio of Investments as well as in the "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" and "Changes in unrealized gains and (losses) on investments" in the Statement of Operations and Changes in Net Assets. Transaction costs are excluded from the Total Expense Ratio and/or expense reimbursement calculation.

For the year ended May 31, 2026, the amount of transaction costs incurred by each Portfolio is detailed in the following table:

AB SICAV I–		Transaction costs
International Health Care Portfolio	$	1,329,863

(b) Last official NAV calculated on February 27, 2026.

NOTE G: Forward Foreign Currency Contracts

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract is included in "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" in the Statement of Operations and Changes in Net Assets.

Fluctuations in the value of open forward foreign currency contracts are reflected for financial reporting purposes as a component of "Unrealized appreciation/(depreciation) on forward foreign currency contracts" in the Statement of Assets and Liabilities.

One or more of a Portfolio's share classes offered in a particular currency (each, an "Offered Currency") may be hedged to such Offered Currency. Any such share class will constitute a "Currency Hedged Share Class". Currency Hedged Share Classes aim to provide investors a return more closely correlated to the Portfolio's base currency return by reducing the effect of exchange rate fluctuations between the portfolio's base currency and the relevant Offered Currency, taking into account practical considerations such as transaction costs. The hedging strategy employed is designed to reduce, but may not eliminate, currency exposure between the portfolio's base currency and the Offered Currency. Risks may arise from the potential inability of counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the hedged currency.

Given that there is no segregation of liabilities between the various share classes within a portfolio, there is a remote risk that, under certain circumstances, currency hedging transactions in relation to a Currency Hedged Share Class could result in liabilities which might affect the NAV of the other share classes of the same portfolio, in which case assets of the other share classes of the portfolio may be used to cover the liabilities incurred by such Currency Hedged Share Class. The securities in the Fund are used as collateral for forward foreign currency contracts including those used for share class hedging.

NOTE H: Repurchase Agreements

Repurchase agreements are collateralized by obligations of the United States, its agencies or instrumentalities thereof. The securities underlying the repurchase agreement will be held by the Depositary at all times in an amount at least equal to the repurchase price, including accrued interest.

At May 31, 2026, there were no repurchase agreements.

There was no interest income arising from repurchase agreements during the year ended May 31, 2026.

NOTE I: Reverse Repurchase Agreements

Reverse repurchase agreements are identical to repurchase agreements except that rather than buying securities for cash subject to their repurchase by the seller, a Fund sells portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price slightly higher than the sale price. During the reverse repurchase agreement period, the Fund continues to receive principal and interest payments on these securities. Generally, the effect of a reverse repurchase agreement is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities.

Such transactions are advantageous only if the "interest cost" to the Fund of the reverse repurchase transaction, i.e., the difference between the sale and repurchase price for the securities, is less than the cost of otherwise obtaining the cash invested in portfolio securities.

At May 31, 2026, there were no reverse repurchase agreements.

There was no interest income arising from reverse repurchase agreements during the year ended May 31, 2026.

NOTE J: Financial Futures Contracts

The Fund may buy or sell financial futures contracts. The Fund bears the market risk that arises from changes in the value of these financial instruments. The Fund's activities in financial futures contracts are conducted through regulated exchanges, which do not result in counterparty credit risk.

At the time the Fund enters into a financial futures contract, the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is effected.

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

NOTE K: Swap Transactions

A swap is an agreement that obliges two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or otherwise determined notional amount. Realized gains and (losses) and changes in unrealized gains and (losses) on swaps are included in the Statement of Operations and Changes in Net Assets respectively under "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" and as a component of "Change in unrealized gains and (losses) on swaps".

Centrally Cleared Credit Default Swaps

The buyer in a centrally cleared credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Centrally Cleared Interest Rate Swaps

A centrally cleared interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Total Return Swaps

A total return swap is a bilateral agreement in which each of the parties agree to exchange the total performance of an underlying asset for a series of interest payments based on a notional amount that serves as a computation basis.

Credit Default Swaps

The buyer in a credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Interest Rate Swaps

An interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Inflation Swaps

An inflation swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

Variance Swaps

Variance swaps are contracts in which two parties agree to exchange cash payments based on the difference between the stated level of variance and the actual variance realized on underlying asset(s) or index(es). Actual "variance" as used here is defined as the sum of the square of the returns on the reference asset(s) or index(es) (which in effect is a measure of its "volatility") over the length of the contract term. So the parties to a variance swap can be said to exchange actual volatility for a contractually stated rate of volatility.

NOTE L: Loans of Portfolio Securities

A Portfolio may make secured loans of its securities. The risk in lending securities, as with other extensions of credit, consists of possible loss of rights in the collateral should the borrower fail financially. In addition, a Portfolio will be exposed to the risk that the sale of any collateral realized upon the borrower's default will not yield proceeds sufficient to replace the loaned securities.

In determining whether to lend securities to a particular borrower, the Investment Manager will consider all relevant facts and circumstances, including the creditworthiness of the borrower.

While securities are on loan, the borrower may pay a Portfolio concerned any income from the securities. A Portfolio may invest any cash collateral in money market instruments, thereby earning additional income, or receive an agreed upon amount of income from a borrower who has delivered equivalent collateral.

A Portfolio may have the right to regain record ownership of loaned securities or equivalent securities in order to exercise ownership rights such as voting rights, subscription rights and rights to dividends, interest or distributions. A Portfolio may pay reasonable finders', administrative and other fees in connection with a loan. For making secured loans of its securities, a Portfolio receives gross fee income, of which 20% is paid to securities lending agent for providing securities lending services.

For the year ended May 31, 2026, the Portfolios earned a net fee income, which is presented in Statement of Operations and Changes in Net Assets under "Securities lending income, net".

For the year ended May 31, 2026 Brown Brothers Harriman & Co. (acting as securities lending agent until August 27, 2025) earned a fee of $139,020 for providing securities lending services. This is included in the Statement of Operations and Changes in Net Assets under "Securities lending income, net".

Effective on August 28, 2025, securities lending services were transferred to Mitsubishi UFJ Trust and Banking Corporation acting through its New York Branch ("MUTB"). For the year ended May 31, 2026 MUTB earned a fee of $172,114 for providing securities lending services. This is included in the Statement of Operations and Changes in Net Assets under "Securities lending income, net".

The value of loaned securities and related collateral outstanding as of May 31, 2026, are as below. The collateral relates to securities held on the Portfolios.

AB SICAV I –		Value	Collateral Market Value
International Health Care Portfolio			
UBS AG	$	14,850,135	22,038,375

Global Value Portfolio			
Barclays	$	6,220,780	6,592,355
Morgan Stanley	$	1,902,981	2,089,563

NOTE M: Bank Facility

The Fund has access to an overdraft facility (the "Facility"), established with the Depositary, intended to provide for short-term/temporary financing if necessary, subject to certain restrictions, in connection with abnormal redemption activity.

Each Portfolio of the Fund is limited to borrowing 10% of its respective net assets. Borrowings pursuant to the Facility are subject to interest at a mutually agreed upon rate and security by the underlying assets of each Portfolio.

NOTE N: Option Transactions

The Fund may purchase and write (sell) put and call options on securities. The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by the premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written.

Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option.

Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

The Fund may also invest in options on swap agreements, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium.

A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

NOTE O: Collateral

The following table lists the cash collateral held by/owed to broker for certain financial derivative instruments as of May 31, 2026:

AB SICAV I –		Cash Held by Broker	Cash Owed to Broker

Goldman Sachs		
U.S. Treasury Bill, 0.00%, 07/09/2026	$ 3,246,339	–

NOTE P: Co-Management of Assets

For the purpose of effective management, where the investment policies of a Portfolio so permit, the Management Company may choose to co-manage assets of certain Portfolios within or outside the Fund. In such cases, assets of different Portfolios will be managed in common. The assets which are co-managed shall be referred to as a "pool". These pooling arrangements are an administrative device designed to reduce operational and other expenses and do not change the legal rights and obligations of Shareholders. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed Portfolios shall remain entitled to its specific assets. Where the assets of more than one Portfolio are pooled, the assets attributable to each participating Portfolio will initially be determined by reference to its initial allocation of assets to such a pool and will change in the event of additional allocations or withdrawals.

The entitlements of each participating Portfolio to the co-managed assets apply to each and every line of investments of such pool. Additional investments made on behalf of the co-managed Portfolios shall be allotted to such Portfolios in accordance with their respective entitlement, whereas assets sold shall be levied similarly on the assets attributable to each participating Portfolio.

As of May 31, 2026, the Portfolio did not co-manage the assets utilizing any Pool.

NOTE Q: Clearing Reserve Fund
(The following applies to China A Shares Equity Portfolio) Under the Investment Regulations, the Sub-Custodian is required to deposit a minimum clearing reserve fund as a percentage of the ABL Quota, the percentage amount to be determined from time to time by the China Securities Depository & Clearing Corporation Limited ("CSDCC") Shanghai and Shenzhen branches. Currently, the minimum clearing reserve ratio determined by the CSDCC Shanghai and Shenzhen branches is 0.06%.

NOTE R: Incentive Fee

Select Absolute Alpha Portfolio
At the end of each partial financial year/ financial year, the Investment Manager received/will receive an amount equal to 20% (10% for Class F Shares and 15% for S13 Shares) of the amount by which the "Adjusted NAV" (as defined below) of each of the relevant Share Classes exceeds the "High-Water Mark" (as defined below) at the end of the last day of a financial year.

Defined terms:

"Adjusted NAV" means the Net Asset Value per share before the reduction for the current financial year's incentive fee, if any.[1]

"High-Water Mark" or "HWM" means, for a Share Class, the NAV per share at the end of the last day of the most recent financial year in which the last incentive fee was paid or, if no incentive fee has been paid, the initial offering price of such Share Class at issue.

"Current Shares Outstanding" means the total Shares in issue, for each Share Class, on each day of the Portfolio's financial year.

"Subscription Adjustment" means the prior day unrealized incentive fee divided by the prior day shares outstanding multiplied by the gross subscription shares.

"Cumulative Subscription Adjustment" means the cumulative prior days' Subscription Adjustment over the reference period plus the current day Subscription Adjustment.

"Reference Period" means the period equal to at least 12 months, which begins either at the issue of the Share Class or at the time the last incentive fee has been paid. The reference period will always end at a financial year end, except in the case of a Share Class liquidation.

If there is a redemption in a Share charging Incentive Fees at any point during the year, other than as of the end of a financial year, an incentive fee with respect to such Share will be determined for such partial financial year and paid as of such date regardless of whether the financial year end Adjusted NAV exceeds the High-Water Mark. The High-Water Mark is not reset on those Business Days at which incentive fees crystallize following the redemption of Shares.

In accordance with ESMA guidelines 34/39/992 on performance fees in UCITS and certain types of AIFs, the Board will reset the High-Water Mark if no incentive fee has been paid during a five year performance reference period.

The following share classes (and corresponding H classes) do not charge an Incentive Fee: S and Z.

As of May 31, 2026 incentive fees payable was $11,350,123. This is included within the line item "Accrued expenses and other liabilities" in the Statement of Assets and Liabilities.

[1] For the avoidance of doubt, the Adjusted NAV is net of costs

For the year ended May 31, 2026, the following share classes had incentive fees as follows:

Share Class		Incentive Fee charged	Percentage incentive fee based on the average share class NAV
A	$	4,097,636	2.47%
A CHF H		9,869	2.47%
A EUR		332,088	2.42%
A EUR H		1,484,420	2.39%
A GBP H		97,417	2.59%
A PLN H		1,749	1.71%
A SGD H		39,573	2.50%
C		470,324	2.40%
FX		31,202	1.41%
FX EUR H		1,760	1.38%
I		1,275,570	2.63%

NOTE S: Joint Credit Facility
The Fund together with other investment funds (the "participating funds") participates in a $500 million (effective as of May 5, 2026) revolving credit facility (the "Credit Facility") intended to provide short-term financing related to redemptions and other short term liquidity requirements, subject to certain restrictions. Fees related to the Credit Facility are paid by the participating funds and are included in miscellaneous expenses in the combined statement of operations. The Fund did not utilize the Credit Facility during the year ended May 31, 2026.

NOTE T: Professional Fee
Professional fees include, among others, audit and audit related services provided by Ernst & Young S.A. as independent auditor of the Fund, and amounted to EUR 1,049,189 for the year ended May 31, 2026, as well as fees provided by legal counsel.

NOTE U: Subsequent Events
It was resolved by the Board to liquidate AB SICAV I - Sustainable Climate Solutions Portfolio as of July 9, 2026.

It was resolved by the Board to create additional portfolios in the Fund: Global Security of the Future Portfolio, Global Ex-US Value Portfolio, US Research Advanced Equity Portfolio and USD Corporate Bond Paris-Aligned Climate Portfolio.

* Unaudited. Annualized rates. The TER calculation follows the guidelines as outlined by SFAMA May 16, 2008.

** For the Total Expense Ratio calculation of the Portfolios the total net assets of the underlying funds managed by the Investment Manager are removed from the computation of the net management fee, Management Company fee and *taxe d'abonnement* of the Portfolio to avoid duplicated fees.

(a) Share class liquidated on October 15, 2025.
(b) Share class re-designed. See Note A.
(c) Share class liquidated on December 23, 2025.
(d) Share class liquidated on January 7, 2026.
(e) Share class liquidated on March 25, 2026.
(f) Share class liquidated on March 27, 2026.
(g) Share class liquidated on March 4, 2026.
(h) Share class liquidated on February 3, 2026.
(i) Share class liquidated on August 14, 2025, and new class with the same class name was launched.
(j) Share class liquidated on August 14, 2025.
(k) Share class liquidated on February 12, 2026.
(l) Share class liquidated on July 31, 2025.
(m) Last official NAV calculated on February 6, 2026.
(n) Last official NAV calculated on February 27, 2026.

Management Fees for the period are reflected at their effective rate as determined by the following:
(1) 1.80% up to $300,000,000, 1.75% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(2) 1.30% up to $300,000,000, 1.25% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(3) 2.25% up to $300,000,000, 2.20% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(4) 1.00% up to $300,000,000, 0.95% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(5) 2.00% up to $300,000,000, 1.75% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(6) 2.45% up to $300,000,000, 2.20% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(7) 1.20% up to $300,000,000, 0.95% on the excess of $300,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(8) 1.70% up to $1,250,000,000, 1.50% on the excess of $1,250,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(9) 1.20% up to $1,250,000,000, 1.00% on the excess of $1,250,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(10) 2.15% up to $1,250,000,000, 1.95% on the excess of $1,250,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(11) 0.90% up to $1,250,000,000, 0.70% on the excess of $1,250,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(12) 1.55% up to $50,000,000, 1.50% on the next $50,000,000, 1.40% on the excess of $100,000,000. The consecutive fee levels will apply to the net assets of the Portfolio.
(13) Changed during the year from 1.70% to 1.50%, effective as of July 1, 2025.
(14) Changed during the year from 2.15% to 1.95%, effective as of July 1, 2025.
(15) Changed during the year from 0.85% to 0.70%, effective as of July 1, 2025.
(16) Changed during the year from 0.85% to 0.60%, effective as of July 1, 2025.
(17) Changed during the year from 1.55% to 1.50%, effective as of November 25, 2025.
(18) Changed during the year from 2.00% to 1.95%, effective as of November 25, 2025.
(19) Changed during the year from 0.75% to 0.70%, effective as of November 25, 2025.
(20) Changed during the year from 0.65% to 0.60%, effective as of November 25, 2025.
(21) Changed during the year from 0.80% to 0.78%, effective as of April 21, 2026.
(22) Changed during the year from 0.30% to 0.28%, effective as of April 21, 2026.
(23) Changed during the year from 0.25% to 0.23%, effective as of April 21, 2026.

Management Company Fees
(24) Annual fee equal to the lesser of $50,000 or 0.01% of average daily NAV.
(25) Changed during the year from 0.10% to 0.05%, effective as of November 25, 2025.

Maximum Management Fee as disclosed in the prospectus of the Fund
(26) Up to 0.55%
(27) Up to 1.00%
(28) Up to 0.40%
(29) Up to 0.45%

* Unaudited. Calculated in accordance with AICPA guidelines. Average market value of securities for the year is calculated based on month end valuation.

To the Shareholders of AB SICAV I

Opinion
We have audited the financial statements of AB SICAV I (the "Fund") and of each of its Portfolios, which comprise the statement of assets and liabilities and the portfolio of investments as at May 31, 2026, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its Portfolios as at May 31, 2026, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion
We conducted our audit in accordance with EU Regulation N° 537/2014, the Law of July 23, 2016 on the audit profession ("Law of July 23, 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" ("CSSF"). Our responsibilities under the EU Regulation Nº 537/2014, the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters
Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

Other information
The Board of Directors of the Fund (the "Board of Directors") is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "*réviseur d'entreprises agréé*" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its Portfolios' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or any of its Portfolios or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements
The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "*réviseur d'entreprises agréé*" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with EU Regulation N° 537/2014, the Law of July 23, 2016 and with the ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with EU Regulation N° 537/2014, the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its Portfolios' ability to continue as a going concern. If we conclude that

a material uncertainty exists, we are required to draw attention in our report of the "*réviseur d'entreprises agréé*" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "*réviseur d'entreprises agréé*". However, future events or conditions may cause the Fund or any of its Portfolios (except for the Portfolio where a decision or an intention to close exists) to cease to continue as a going concern.

- In respect of the Portfolio where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors' use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going concern basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our audit report of the "*réviseur d'entreprises agréé*".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as "*réviseur d'entreprises agréé*" by the General Meeting of the Shareholders on October 30, 2025 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 20 years, serving the Fund as "réviseur d'entreprises agréé" since its launch. The Fund became an EU PIE during the current period and the mandatory firm rotation period under Article 17 of EU Regulation N° 537/2014 is therefore calculated from the date the entity became a PIE.

We confirm that the prohibited non-audit services referred to in EU Regulation N° 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

The non-audit services we provided to the Fund for the year ended May 31, 2026 are:

- Issuance of the separate report in the context of CSSF Circular 21/790;
- Issuance of a report to comply with the requirements of the Singapore Central Provident Fund Investment Scheme Information Booklet for Fund Management and Insurance Companies; and
- Issuance of report over merger transactions for the purpose of complying with the requirements of the applicable law.

BNP Paribas, Paris, succursale de Zurich, was authorized by the Swiss Financial Market Supervisory Authority FINMA as Swiss representative of the Fund, and also acts as paying agent. The prospectus, KIDs, the articles of incorporation of the Fund, the annual and semi-annual reports, as well as the list of the purchases and sales which the Fund has undertaken during the financial year, may be obtained, on simple request and free of charge, at the head office of the Swiss representative, BNP Paribas, Paris, Zurich branch, Selnaustrasse 16, CH-8002 Zürich, Switzerland.

The Fund's publications in Switzerland are on www.fundinfo.com. The issue and redemption prices of the Shares of the Fund, respectively the NAV per Share (with the mention "excluding commissions"), are published jointly and on a daily basis on www.fundinfo.com.

Information in relation to facilities for investors related to Article 92 1. b) to f) of the UCITS Directive for Austria, Belgium, Croatia, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Liechtenstein, Luxembourg, The Netherlands, Norway, Poland, Portugal, Romania, Slovakia and Sweden is available at www.eifs.lu/alliancebernstein. Facilities requirements for investors related to Article 92 1. a) of the UCITS Directive will be processed by AllianceBernstein (Luxembourg) S.à r.l.

Please note that with effect from September 24, 2008, the International Health Care Portfolio is no longer available for investment by CPF members using CPF monies. This Portfolio will however continue to be subject to the investment guidelines issued by the Singapore CPF Board (the "CPF Investment Guidelines"), as the same may be modified, amended, re-enacted or reconstituted from time to time by the CPF Board.

The Net Asset Value of the Portfolios of the Fund are published on a daily basis at www.alliancebernstein.com

The key information documents (KIDs) of the Fund are made available at www.alliancebernstein.com/go/kid.

Notice to Shareholders
If required by law and applicable regulations, notice to shareholders will be published in the *Recueil Electronique des Sociétés et Associations* (formerly the "*Mémorial*") and in such other newspaper(s) in such countries as the Management Company may from time to time determine.

Changes in the Investment Portfolio
Changes in the Portfolio of Investments during the reporting year are available free of charge to the Shareholders at the registered office of the Management Company.

Controversial Weapons Policy
The Management Company arranges for the screening of companies globally for their involvement in the production of anti-personnel mines, cluster munitions and/or munitions made with depleted uranium, biological weapons, chemical weapons and/or incendiary weapons. Where such involvement has been verified, the Management Company's policy is not to permit the Fund to invest in securities issued by such companies.[(1)]

[(1)] Certain portfolios may invest in companies with verified involvement in the development, production, acquisition, stockpiling, retention, transfer or assistance in any of these activities of munitions made with depleted uranium. More details can be found on www.alliancebernstein.com/go/ABSICAVIExclusionChart.

Value at Risk
For UCITS the Value at Risk (VaR) can be measured on an absolute or a relative basis. VaR is a widely used risk measure of the risk of loss on a specific portfolio of financial assets. The Investment Manager monitored the total global exposure (market risk) of the equity Portfolios for the year ended May 31, 2026 utilizing the VaR calculated on a relative basis (pursuant to which the VaR of the relevant Portfolio may not exceed twice the VaR of the relevant reference benchmark). During the aforementioned year the low, high and average VaR of the Portfolios measured on a relative basis were as follows:

Portfolio	Benchmark	Low	High	Average
Emerging Markets Multi-Asset Portfolio	MSCI Emerging Markets	67.00%	85.92%	77.59%
All Market Income Portfolio	50% MSCI World Index / 40% Bloomberg Global High Yield (USD Hedged) / 10% Bloomberg Global Treasuries (USD Hedged)	76.18%	97.86%	86.37%
Sustainable All Market Portfolio	30% MSCI World Index / 30% MSCI World Index (EUR hedged) / 40% Bloomberg Global Aggregate Index (EUR hedged)	76.91%	105.87%	91.05%
American Multi-Asset Portfolio	45% S & P 500 TR Index / 45% Bloomberg US Corporate High Yield Index / 10% Bloomberg US Treasuries Index	103.84%	127.62%	117.56%

For the below listed Portfolios the Investment Manager monitored the global exposure (market risk) utilizing the VaR calculated on an absolute basis (pursuant to which the VaR of the relevant Portfolio may not exceed 20% of its NAV).

During the aforementioned fiscal year, the low, high and average VaR of the Portfolios measured on an absolute basis were as follow:

Portfolio	Low	High	Average
Sustainable Euro High Yield Portfolio	0.99%	1.90%	1.31%
RMB Income Plus Portfolio	1.34%	2.82%	1.78%
Short Duration High Yield Portfolio	0.94%	1.95%	1.23%
Global Plus Fixed Income Portfolio	1.60%	2.53%	1.98%
Select Absolute Alpha Portfolio	2.43%	6.84%	5.29%
Emerging Market Local Currency Debt Portfolio	3.55%	4.85%	4.22%
Emerging Market Corporate Debt Portfolio	1.51%	2.26%	1.89%
US High Yield Portfolio	1.40%	2.30%	1.76%
Global Dynamic Bond Portfolio	0.78%	2.18%	1.07%

Portfolio	Low	High	Average
Asia Income Opportunities Portfolio	1.70%	2.38%	2.01%
Flexible Income Portfolio	1.93%	3.42%	2.54%
China Bond Portfolio	0.92%	1.77%	1.25%
Low Volatility Total Return Equity Portfolio	1.53%	3.47%	1.81%
Sustainable Global Thematic Credit Portfolio	2.08%	3.41%	2.45%
Event Driven Portfolio	5.06%	10.26%	7.10%
Sustainable Income Portfolio	1.97%	3.14%	2.66%
Asia High Yield Portfolio	1.43%	2.16%	1.67%

Leverage

For the Portfolios listed below, the Investment Manager does not expect to utilize bank borrowing in implementing the Portfolios' investment strategy.

The expected level of leverage is calculated as the sum of the notionals of the financial derivative instruments held by the Portfolio. Pursuant to the CSSF Circular 11/512 dated May 30, 2011, this calculation methodology neither takes into account the fact that a particular financial derivative instrument increases or decreases the Portfolio's investment risks nor permits to net financial derivative instruments with reverse positions.

Shareholders should be aware that (i) a higher level of expected leverage does not automatically imply a higher level of investment risk and (ii) the expected level of leverage disclosed above is mainly generated by the use of derivatives for hedging purposes or for efficient portfolio management. In addition, the actual leverage of the Portfolio may deviate from the below mentioned expected level of leverage:

- Sustainable Euro High Yield Portfolio
  20%-250% range of the NAV of the Portfolio
- Emerging Markets Multi-Asset Portfolio
  50%-300% range of the NAV of the Portfolio
- RMB Income Plus Portfolio
  50%-300% range of the NAV of the Portfolio
- Short Duration High Yield Portfolio
  20%-300% range of the NAV of the Portfolio
- Global Plus Fixed Income Portfolio
  0%-100% range of the NAV of the Portfolio
- Select Absolute Alpha Portfolio
  0%-50% range of the NAV of the Portfolio
- Emerging Market Local Currency Debt Portfolio
  20%-300% range of the NAV of the Portfolio
- Emerging Market Corporate Debt Portfolio
  0%-100% range of the NAV of the Portfolio
- US High Yield Portfolio
  20%-100% range of the NAV of the Portfolio
- Global Dynamic Bond Portfolio
  100%-200% range of the NAV of the Portfolio
- Asia Income Opportunities Portfolio
  0%-100% range of the NAV of the Portfolio
- Flexible Income Portfolio
  0%-400% range of the NAV of the Portfolio
- All Market Income Portfolio
  0%-350% range of the NAV of the Portfolio
- China Bond Portfolio
  0%-100% range of the NAV of the Portfolio
- Low Volatility Total Return Equity Portfolio
  0%-200% range of the NAV of the Portfolio
- Sustainable Global Thematic Credit Portfolio
  0%-200% range of the NAV of the Portfolio
- Event Driven Portfolio
  200%-500% range of the NAV of the Portfolio
- Sustainable All Market Portfolio
  0%-200% range of the NAV of the Portfolio
- Sustainable Income Portfolio
  0%-400% range of the NAV of the Portfolio
- Asia High Yield Portfolio
  0%-100% range of the NAV of the Portfolio
- American Multi-Asset Portfolio
  0%-350% range of the NAV of the Portfolio

As a result of using the sum of notionals approach the average leverage of the Portfolios for the year ended May 31, 2026 was:

Portfolio	Leverage
Sustainable Euro High Yield Portfolio	13.97%
Emerging Markets Multi-Asset Portfolio	79.55%
RMB Income Plus Portfolio	137.03%
Short Duration High Yield Portfolio	27.19%
Global Plus Fixed Income Portfolio	112.10%
Select Absolute Alpha Portfolio	1.40%
Emerging Market Local Currency Debt Portfolio	182.00%
Emerging Market Corporate Debt Portfolio	11.48%
US High Yield Portfolio	21.05%
Global Dynamic Bond Portfolio	114.16%
Asia Income Opportunities Portfolio	27.32%
Flexible Income Portfolio	173.81%
All Market Income Portfolio	105.85%
China Bond Portfolio	9.42%
Low Volatility Total Return Equity Portfolio	107.97%
Sustainable Global Thematic Credit Portfolio	133.82%
Event Driven Portfolio	173.25%
Sustainable All Market Portfolio	92.54%
Sustainable Income Portfolio	88.31%
Asia High Yield Portfolio	67.09%
American Multi-Asset Portfolio	27.22%

For the Portfolios listed below the Investment Manager used the commitment approach pursuant to the CSSF Circular 11/512 dated May 30, 2011 to monitor global exposure (market risk) resulting from the use of financial derivative instruments. Consequently, the net derivatives exposure created by derivative transactions combined with cash and other assets will closely approximate the NAV of the Portfolio.

As a result of using the commitment approach, the average leverage of the Portfolios for the year ended May 31, 2026 was:

Portfolio	Leverage
International Health Care Portfolio	-
International Technology Portfolio	-
Global Real Estate Securities Portfolio	0.65%
Sustainable Global Thematic Portfolio	9.82%
India Growth Portfolio	0.01%

(a) Last official NAV calculated on February 6, 2026.
(b) Last official NAV calculated on February 27, 2026.

Remuneration
From January 1, 2025 until December 31, 2025 (the "Reference Period"), the total amount of remuneration paid - in cash and/or restricted securities - by the Management Company to its entire staff (composed during the Reference Period in average of 96 employees) was EUR 22,340,720.

In particular, during the Reference Period, the total amount of remuneration mentioned above was split into fixed and variable remuneration as follows:

- Fixed remuneration: EUR 12,162,199

- Variable remuneration: EUR 10,178,521

No fees based on the performance of the Fund or carried interest are used to remunerate employees of the Management Company.

During the Reference Period, no remuneration was paid by the Fund and/or the Management Company to the identified staff of the Investment Manager.

During the Reference Period, the total amount of remuneration paid to identified staff, which is composed during the Reference Period, by 7 employees, was EUR 1,706,432 (split as follows: fixed remuneration EUR 1,281,305 and variable remuneration EUR 425,127) - representing less than 8% of the total remuneration.

Identified staff mentioned above are composed by the following categories of employees: a) senior management (during the Reference Period, five), b) members of staff of the Management Company whose actions may have a material impact on the risk profile of the Management Company or falling within the remuneration bracket of senior management and risk takes (during the Reference Period, none) and c) control functions (during the Reference Period, two).

Detailed information relating to–amongst others–the financial and non-financial criteria of the remuneration policies and practices, on decision-making process used to determine the remuneration policy, and on how pay and performance are linked are available in the Remuneration Statement published on AB Global website at the following address:

www.alliancebernstein.com/go/remuneration_policy

Over the Reference Period, a review of the Remuneration Policy and of its implementation has been carried out and it did not evidence any irregularity. Finally, no material change on the Remuneration Policy as it was initially designed occurred over the Reference Period.

PEA Eligibility (Plan d'Epargne en Actions)
The Plan d'Epargne en Actions ("PEA") is a French tax savings plan that allows French residents to benefit from certain tax exemptions for investing in European equities. A PEA eligible fund must permanently invest at least 75% of its net assets in PEA eligible equity-related securities (excluding convertible bonds) of companies established in a European Union Member State or in Liechtenstein, Iceland and Norway and subject to corporate income, or an equivalent, tax.

Through the year ended May 31, 2026, the following Portfolio invested primarily in PEA eligible equity - related securities, with the daily average percentage of investment in such securities as follows:

Portfolio	Daily Average (%)
Eurozone Growth Portfolio	89.00%

Securities Financing Transaction Regulation
The Securities Financing Transaction Regulation ("the SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A SFT is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

During the year ended May 31, 2026, the Fund had entered into securities lending and total return swaps (TRS) as type of instrument in scope of the SFTR.

Global Data

The amount of assets across all SFTs and total return swaps as at May 31, 2026 is as follows:

International Health Care Portfolio

Type of asset	Amount	% of NAV	% of lendable assets

ETF Share Classes

Primary-Market Creation and Redemption

Only Authorised Participants ("APs") may subscribe for, redeem or exchange ETF Shares directly with the Fund on the Primary Market, subject to the applicable eligibility requirements and the dealing procedures set out in the Prospectus.

Investors who are not APs cannot ordinarily subscribe for or redeem ETF Shares directly with the Fund. Such investors must generally purchase and sell ETF Shares through a broker, share-dealing service or other intermediary on the Secondary Market (i.e. the relevant Stock Exchange).

Notwithstanding the foregoing, a Secondary-Market investor (an investor who is an AP) may request the direct redemption of ETF Shares for cash in the limited circumstances expressly described in the section "Dealing on the Secondary Market (Regular Investors)" of the Prospectus, including where there is a suspension of the Secondary Market or where the stock-exchange value of an ETF Share varies significantly from its Net Asset Value, as determined by the Board.

Secondary-Market Price and Liquidity

ETF Shares traded on the Secondary Market are bought and sold at market prices determined by prevailing market and economic conditions, including supply and demand. The market price of an ETF Share may therefore be equal to, higher than or lower than its most recently calculated Net Asset Value per Share ("NAV"). Investors may consequently pay more than NAV when purchasing ETF Shares and may receive less than NAV when selling ETF Shares.

The ability of investors to buy or sell ETF Shares depends on the existence and proper functioning of the Secondary Market, including the availability and activity of Market Makers and APs. There can be no assurance that an active or liquid trading market will be developed or maintained, that ETF Shares will continue to be listed or traded on any particular Recognised Stock Exchange, or that an investor will be able to transact at a price close to NAV.

Liquidity Management Tools

The Fund maintains liquidity management arrangements intended to manage liquidity risk, mitigate dilution and ensure the fair treatment of Shareholders.

For ETF Share Classes, one available measure is the dilution levy. A dilution levy may be imposed where expressly permitted under the Prospectus, including in connection with an exceptional-cost subscription or redemption by an AP or a direct cash redemption by a secondary-market investor in the exceptional circumstances described above. Any such levy will benefit to the relevant Portfolio and shall not exceed the limit specified in the Prospectus.

Liquidity management tools concerning subscriptions and redemptions with the Fund operate at Primary Market or Fund level. They do not directly influence the price or liquidity at which ETF Shares trade between investors on the Secondary Market. Secondary-market liquidity remains dependent on market conditions and the activity of market participants.

Taxonomy disclosure

The following Funds have been categorised as Article 6 financial products for the purposes of the Sustainable Finance Disclosure Regulation. For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

Portfolio(s) in scope:

- China Bond Portfolio
- Emerging Market Local Currency Debt Portfolio
- India Growth Portfolio

Sustainability-Related Disclosures

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: International Health Care Portfolio

Legal entity identifier: 549300KKFDSHGK22IC22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 92% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 15 ESG engagement entries with 14 distinct companies held in the Portfolio. For these engagements, there were 0 discussions of environmental issues, and 15 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Product Safety & Quality, Human Capital Management, Opportunities in Healthcare, Diversity & Inclusion, Privacy & Customer Data.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 77% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Eli Lilly & Co.	Health Care	9.47	United States
Johnson & Johnson	Health Care	9.12	United States
Roche Holding AG	Health Care	5.56	Switzerland
Novartis AG	Health Care	5.41	Switzerland
AstraZeneca PLC	Health Care	5.40	United Kingdom
AbbVie, Inc.	Health Care	5.18	United States
UnitedHealth Group, Inc.	Health Care	4.60	United States
Gilead Sciences, Inc.	Health Care	4.17	United States
Intuitive Surgical, Inc.	Health Care	4.10	United States
Stryker Corp.	Health Care	3.85	United States
Vertex Pharmaceuticals	Health Care	3.71	United States
Cencora, Inc.	Health Care	3.29	United States
Abbott Laboratories	Health Care	2.96	United States
Regeneron Pharmaceuticals	Health Care	2.67	United States
Veeva Systems, Inc.	Health Care	2.08	United States

What was the proportion of sustainability-related investments?

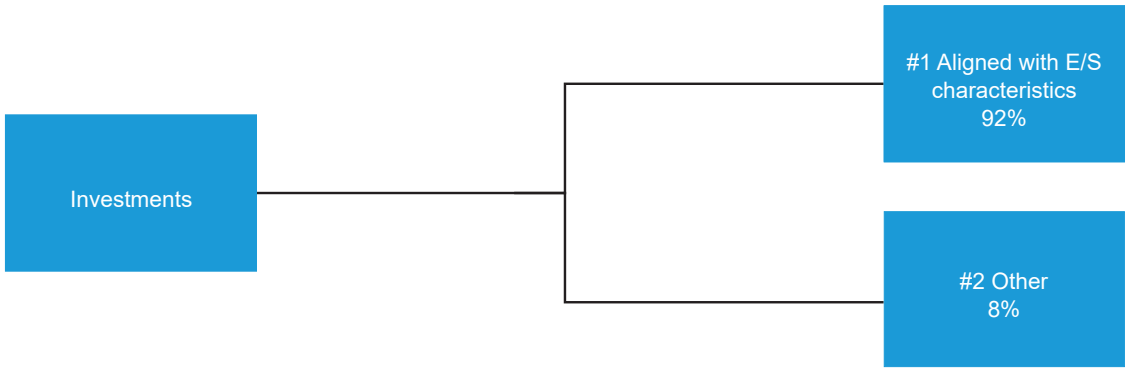

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 92%

#2 Other: 8%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- **In which economic sectors were the investments made?**

Sector and Sub-sector	% Assets
Health Care	**100.00**
Biotechnology	21.23
Health Care Equipment & Supplies	18.55
Health Care Providers & Services	10.62
Health Care Technology	2.08
Life Sciences Tools & Services	6.52
Pharmaceuticals	41.00

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

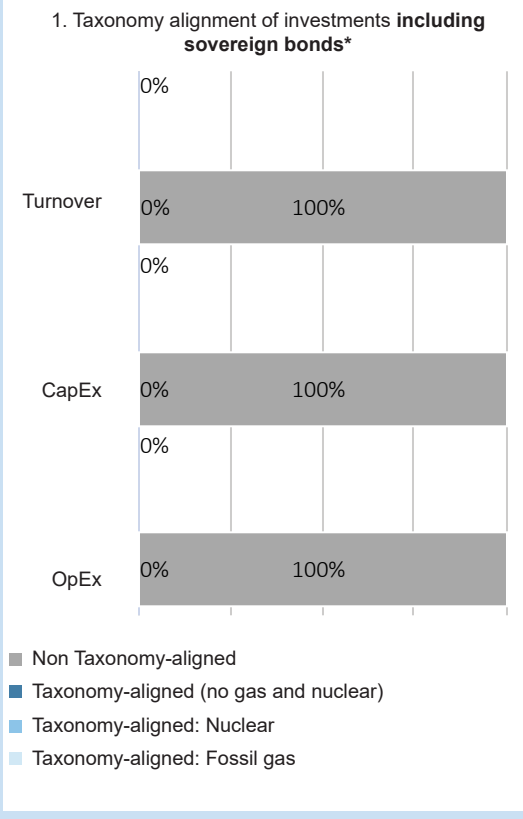

☐ Yes:

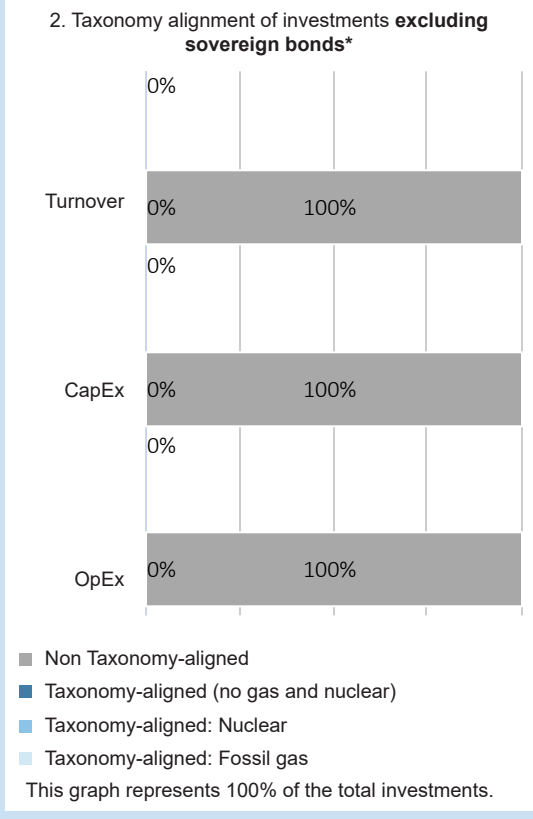

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 0% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 98% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: International Technology Portfolio

Legal entity identifier: 549300Q2D8XGSWTZEY39

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 92% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 65 ESG engagement entries with 51 distinct companies held in the Portfolio. For these engagements, there were 30 discussions of environmental issues, and 38 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Carbon Emissions , Climate Transition Plans, Water Management, Diversity & Inclusion.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 76% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.20%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
NVIDIA Corp.	Information Technology	7.58	United States

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

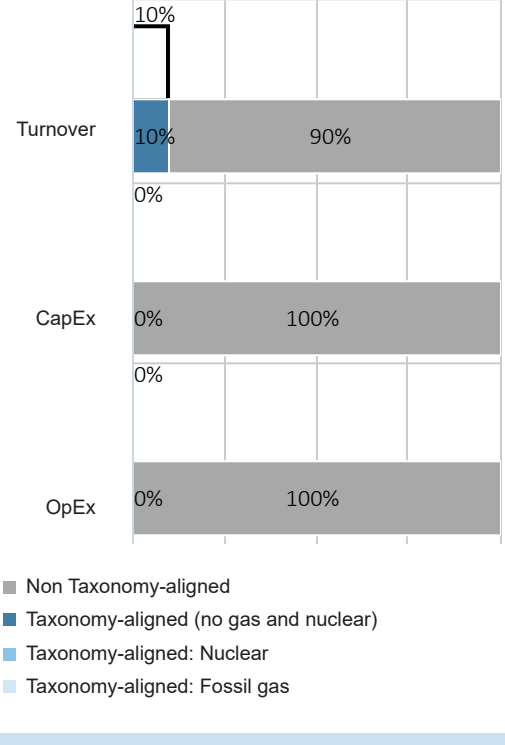

☐ In fossil gas ☐ In nuclear energy

☑ No:

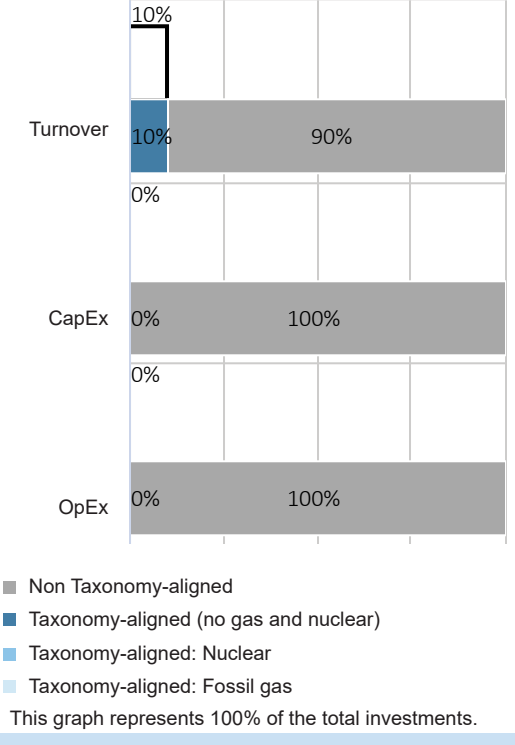

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 0% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 95% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 96% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 25 ESG engagement entries with 16 distinct companies held in the Portfolio. For these engagements, there were 17 discussions of environmental issues, and 14 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Opportunities in Green Buildings, Human Capital Management, Stakeholder Engagement, Biodiversity & Nature.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 75% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 31.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 66.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures : www.alliancebernstein.com/go/EQ9webdisclosures.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 82.8%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 "Decent Work & Economic Growth": 31.9%
- SDG 9 "Industry, Innovation and Infrastructure": 18.0%
- SDG 7 "Affordable & Clean Energy": 16.1%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 82.9%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 8 "Decent Work & Economic Growth": 27.9%
- SDG 3 "Good Health & Wellbeing": 21.3%
- SDG 7 "Affordable & Clean Energy": 14.6%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	327,884.94 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	18.45 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	690.91 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	3.72%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	64.99% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	64.10% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.56 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.09 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	12.02 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.61 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.02 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.11 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.12 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	6.37%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	0.05 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	0.29 in tons/million EUR invested

PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	1.30%
PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	13.47%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	33.78%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	N/A
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	53.26%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	5.61%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	**Sector**	**% Assets**	**Country**

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The Portfolio invested 96% in sustainable investments

What was the asset allocation?

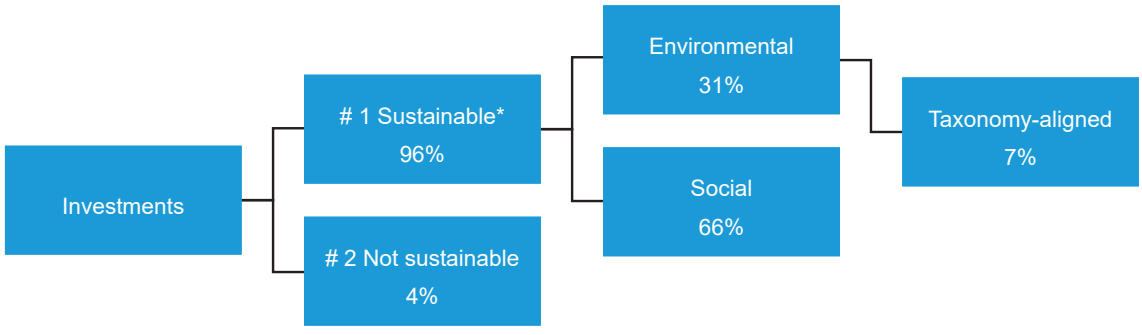

#1 Sustainable: 96%

E Sustainable: 31%

S Sustainable: 66%

Taxonomy Aligned: 7%

#2 Not Sustainable: 4%

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* Note that the sum of the E/S Sustainable Investments may not sum due to rounding

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 7% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

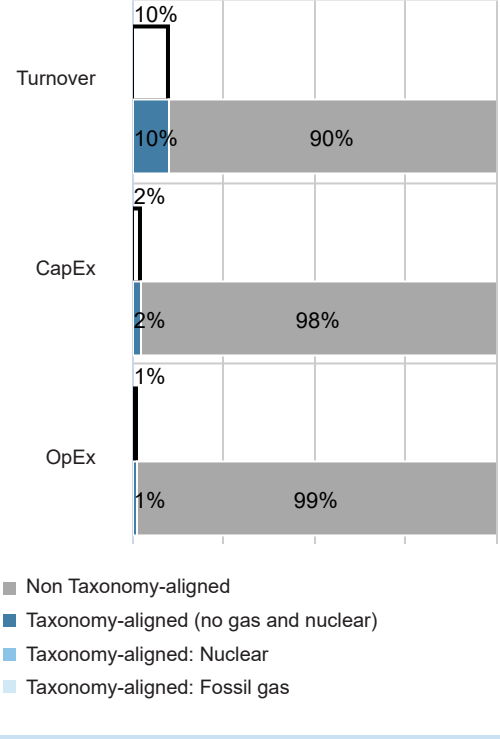

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

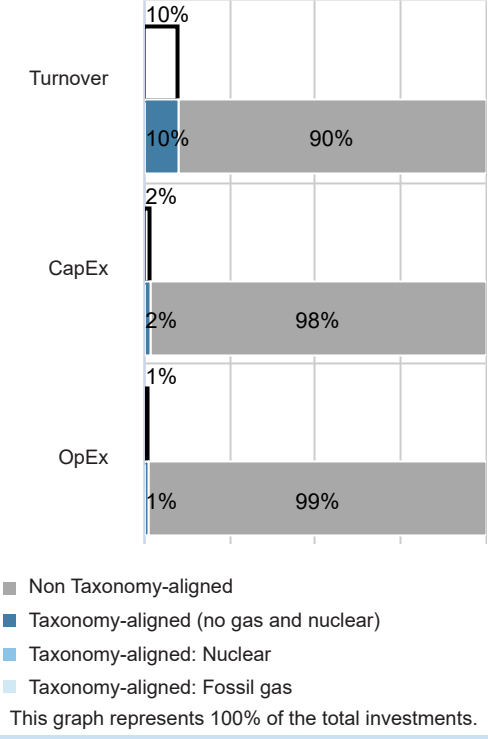

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 8% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

24%

What was the share of socially sustainable investments?

66%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Small and Mid-Cap Portfolio

Legal entity identifier: 549300A6L7IWT5FH3I46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 92% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 30 ESG engagement entries with 23 distinct companies held in the Portfolio. For these engagements, there were 13 discussions of environmental issues, and 11 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Opportunities in Renewable Energy, Supply Chain - Environmental.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

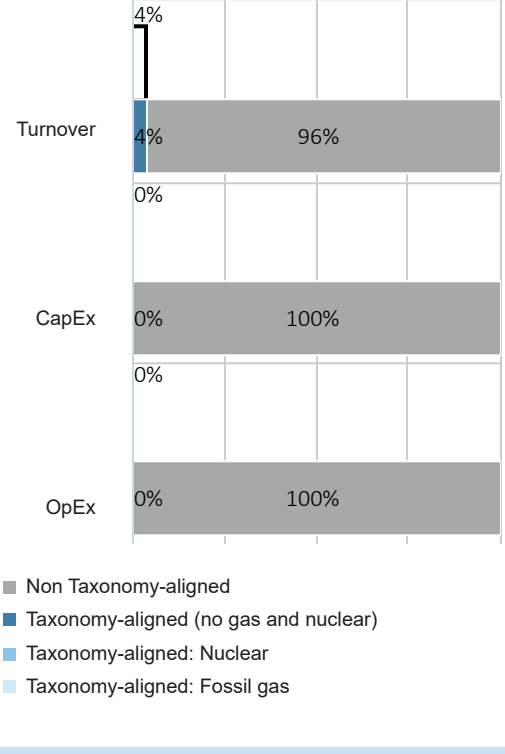

☐ In fossil gas ☐ In nuclear energy

☑ No:

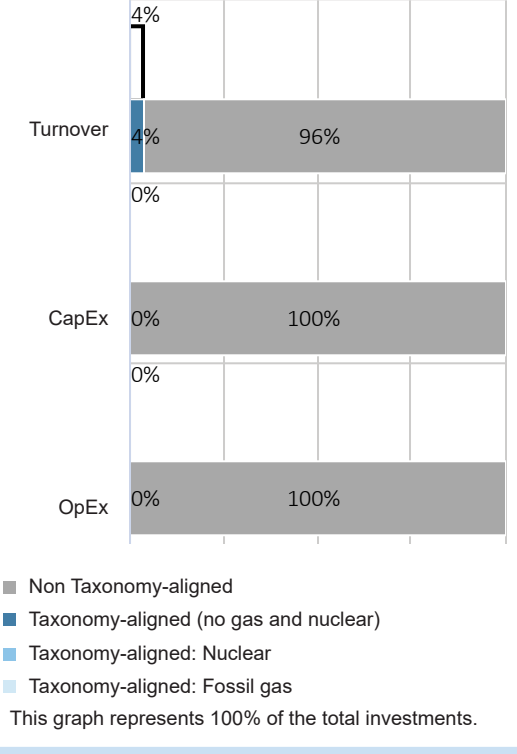

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 97% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Select US Equity Portfolio

Legal entity identifier: 549300FQVZ8YHFZBN041

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 68 ESG engagement entries with 48 distinct companies held in the Portfolio. For these engagements, there were 32 discussions of environmental issues, and 41 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Diversity & Inclusion, Product Safety & Quality.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.09%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

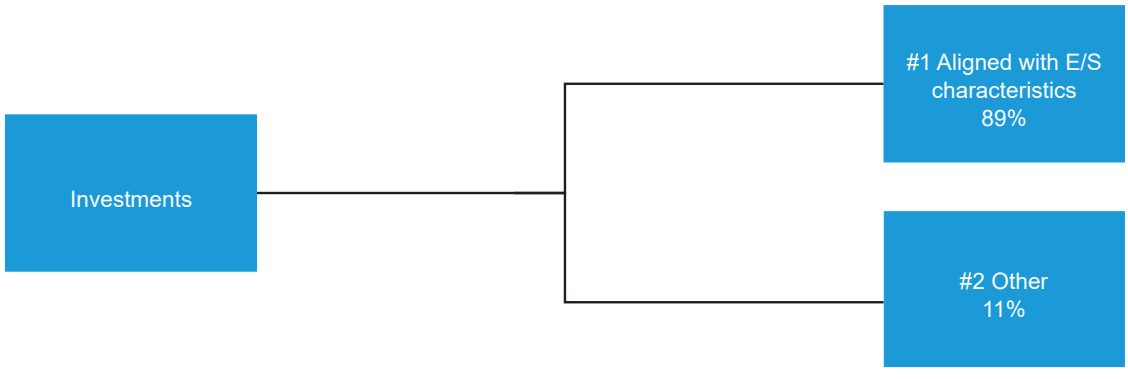

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 89%

#2 Other: 11%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

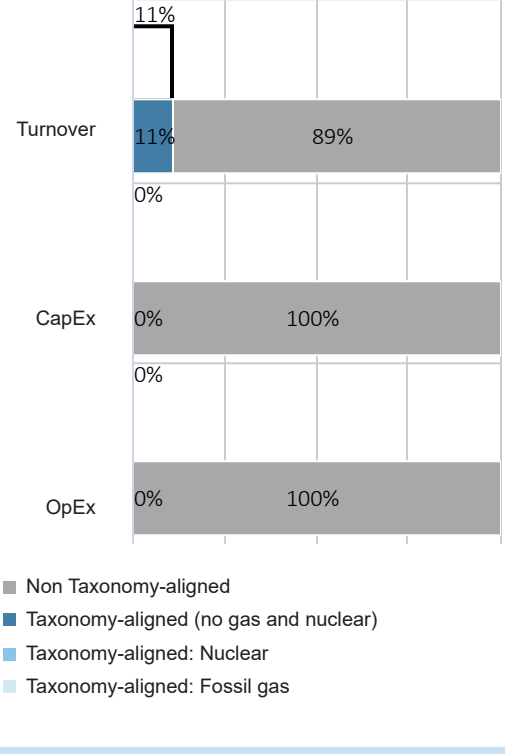

☐ In fossil gas ☐ In nuclear energy

☑ No:

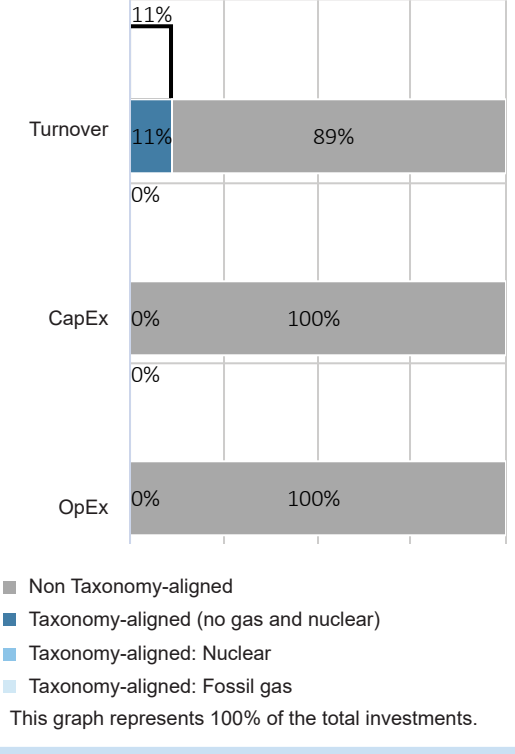

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 8% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 98% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 100% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Low Volatility Equity Portfolio

Legal entity identifier: 54930038MS858LAR8B49

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 88% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 37 ESG engagement entries with 28 distinct companies held in the Portfolio. For these engagements, there were 28 discussions of environmental issues, and 16 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions , Water Management, Biodiversity & Nature, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 83% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	6.25%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	9.75	Taiwan
Samsung Electronics	Information Technology	6.67	South Korea

Water Utilities	1.36

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

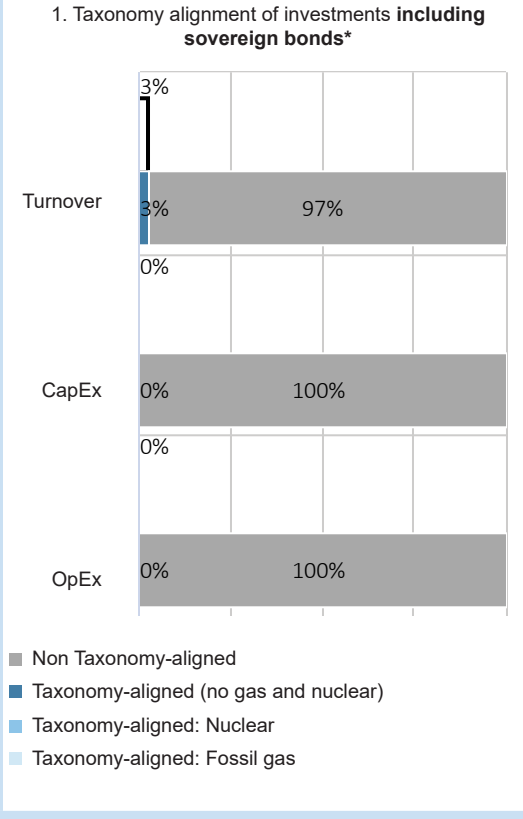

☐ Yes:

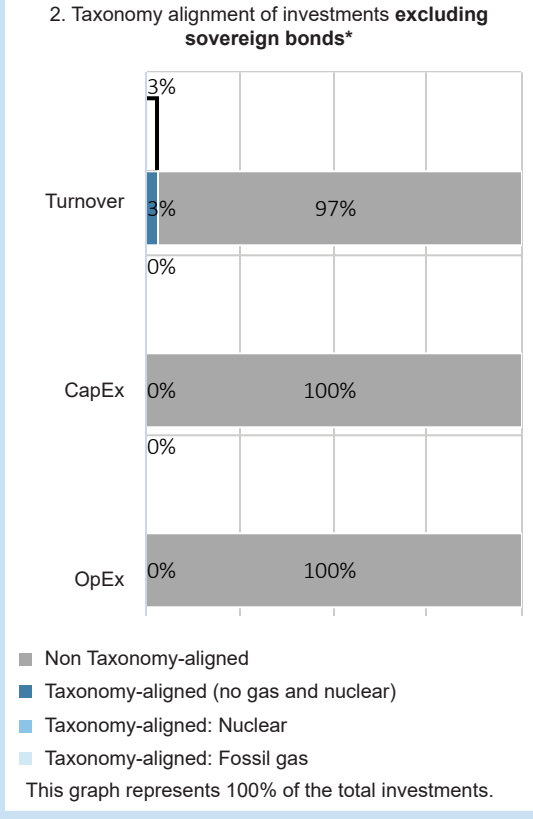

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 98% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 97% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 21 ESG engagement entries with 16 distinct companies held in the Portfolio. For these engagements, there were 7 discussions of environmental issues, and 15 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Diversity & Inclusion, Carbon Emissions , Employee Health & Safety, Water Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 97% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

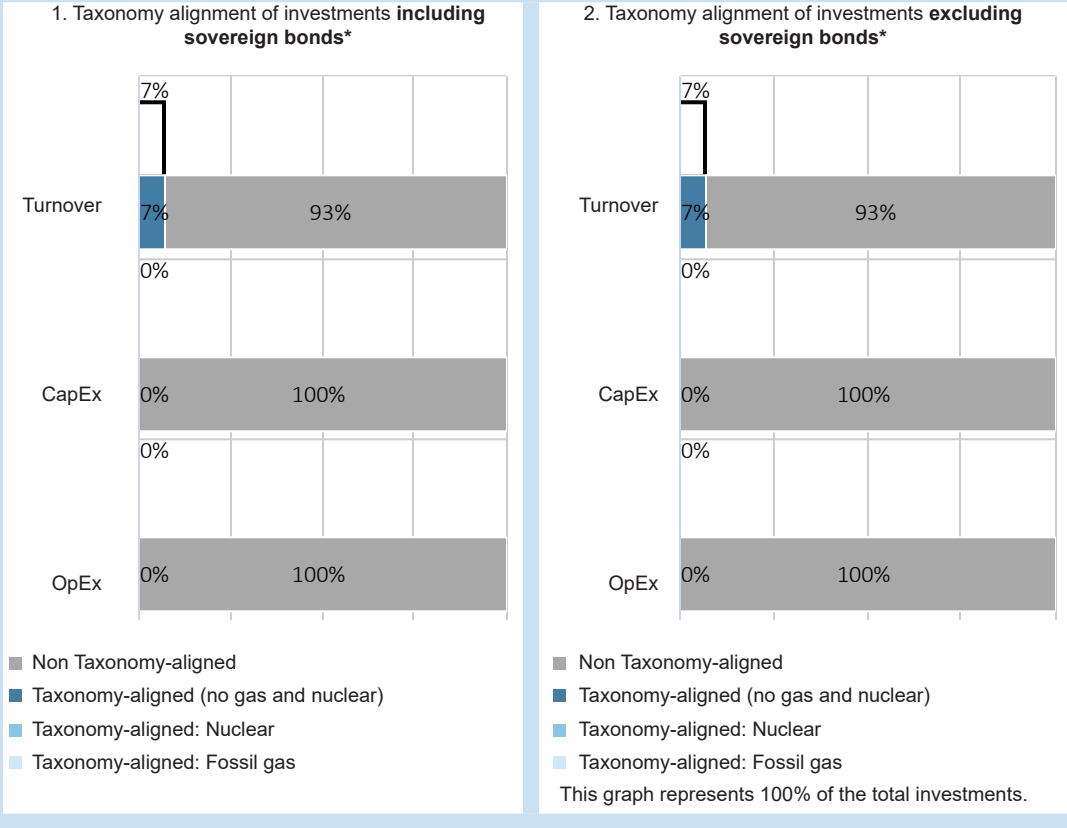

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 98% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 92% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 43 ESG engagement entries with 35 distinct companies held in the Portfolio. For these engagements, there were 21 discussions of environmental issues, and 29 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Water Management, Diversity & Inclusion, Carbon Emissions , Privacy & Customer Data.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 94% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**
  N/A
- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	3.67%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

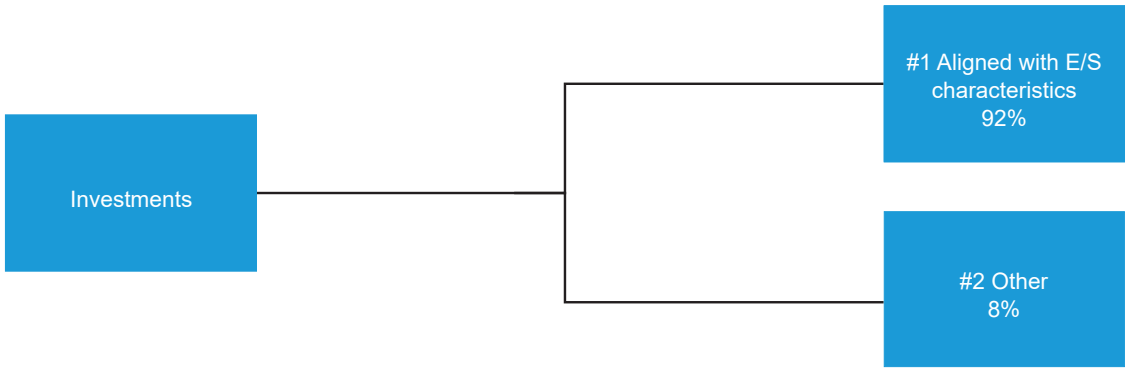

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 92%

#2 Other: 8%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

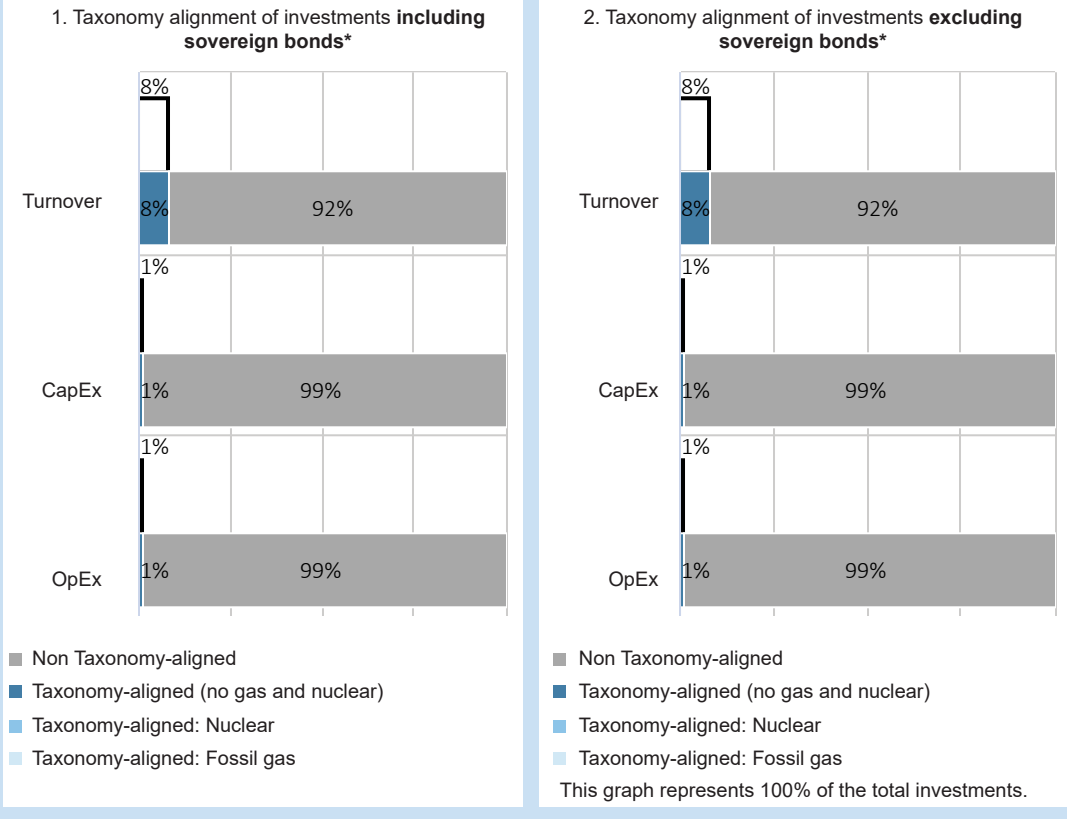

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 96% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Core Equity Portfolio

Legal entity identifier: 549300RN1W12T6VHR056

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 88% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 86 ESG engagement entries with 59 distinct companies held in the Portfolio. For these engagements, there were 31 discussions of environmental issues, and 58 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Privacy & Customer Data, Water Management, Product Safety & Quality, Carbon Emissions.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 83% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.66%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

Software	0.69
Real Estate	**1.05**
Diversified REITs	1.05

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

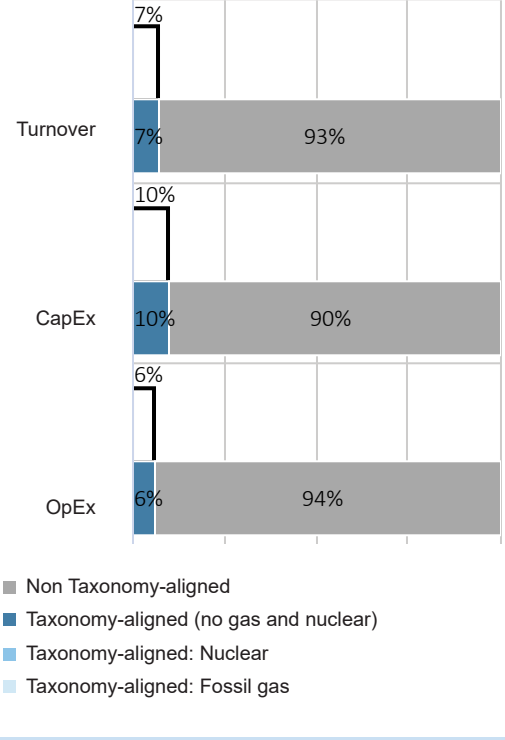

☐ In fossil gas ☐ In nuclear energy

☑ No:

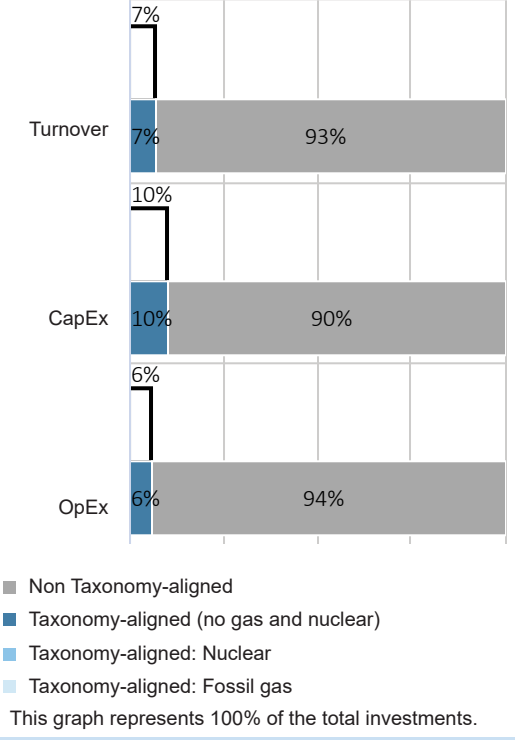

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 99% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurozone Growth Portfolio

Legal entity identifier: 5493000S8RXY9XPCD195

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 91% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 34 ESG engagement entries with 24 distinct companies held in the Portfolio. For these engagements, there were 28 discussions of environmental issues, and 19 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Opportunities in Clean Tech, Diversity & Inclusion.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

What was the proportion of sustainability-related investments?

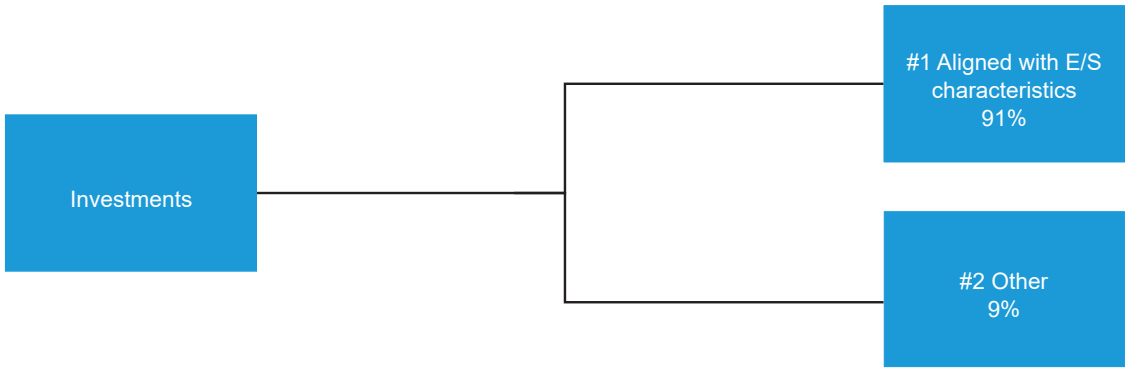

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 91%

#2 Other: 9%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

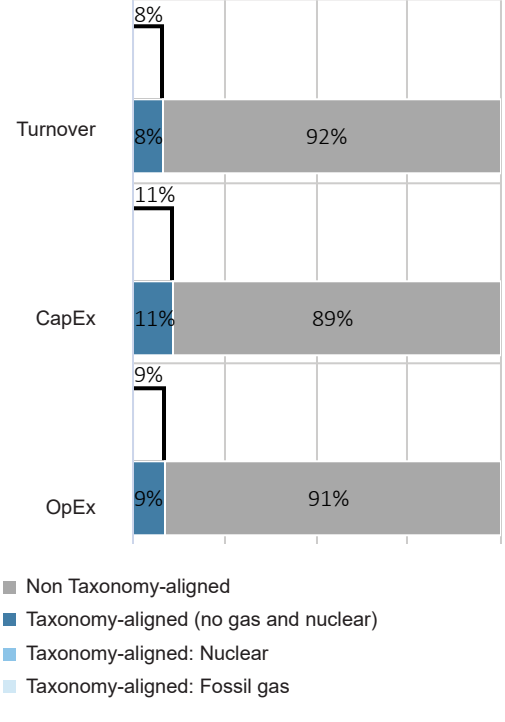

☐ In fossil gas ☐ In nuclear energy

☑ No:

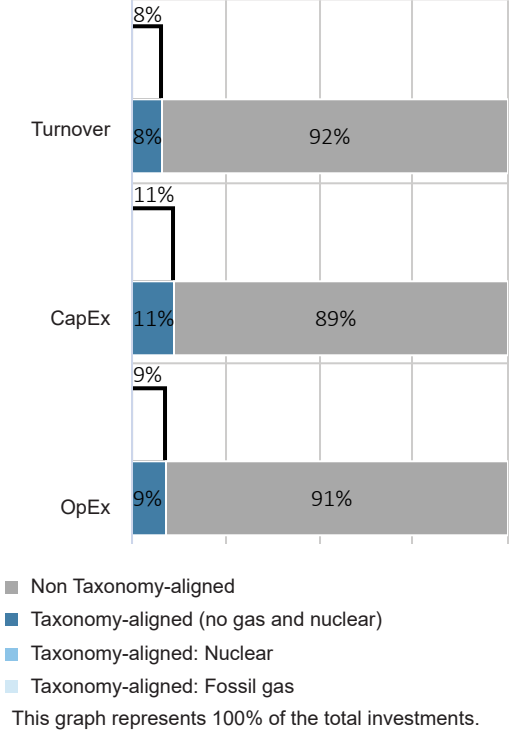

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 11% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 65% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: All China Equity Portfolio

Legal entity identifier: 549300HDXT2ZHP7TQK59

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 83% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 30 ESG engagement entries with 25 distinct companies held in the Portfolio. For these engagements, there were 20 discussions of environmental issues, and 15 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions , Water Management, Supply Chain - Social, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	9.99%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Tencent Holdings Ltd.	Communication Services	9.31	Cayman Islands

Energy	**0.25**
Oil, Gas & Consumable Fuels	0.25

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

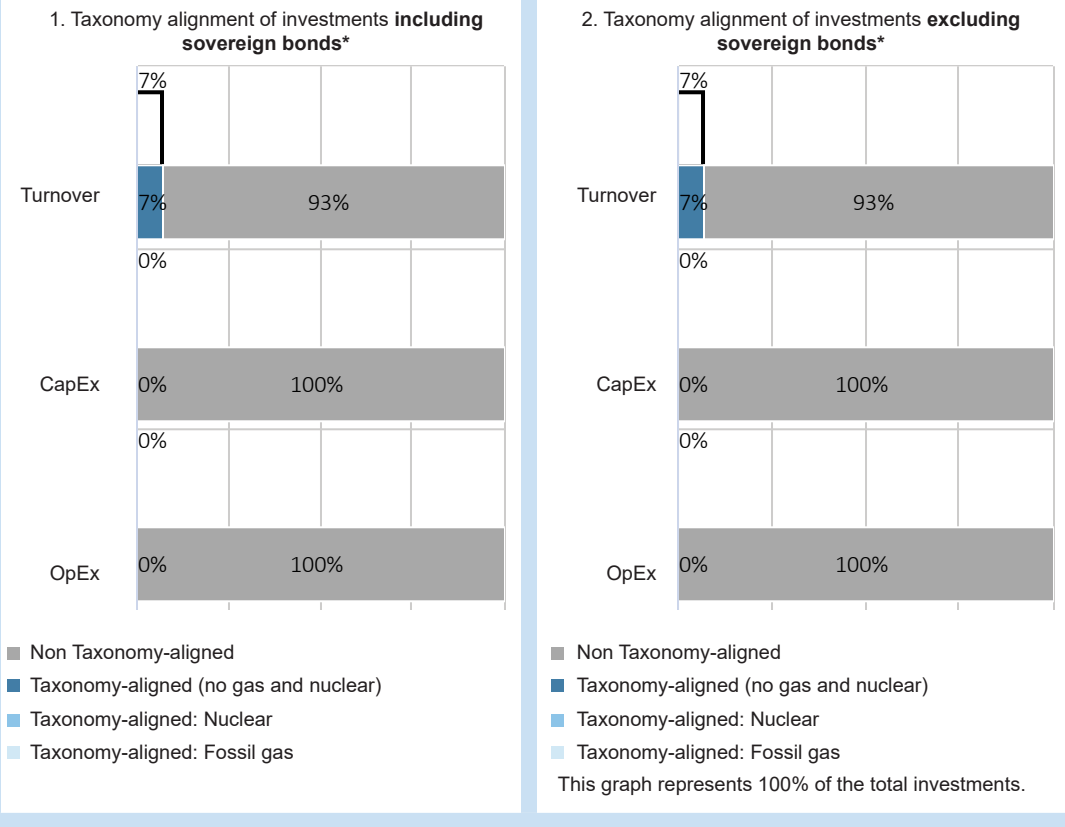

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 94% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 9% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2025, 89% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Low Volatility Total Return Equity Portfolio

Legal entity identifier: 549300G2L0VH1BF4TJ46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 95% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 85 ESG engagement entries with 57 distinct companies held in the Portfolio. For these engagements, there were 36 discussions of environmental issues, and 50 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Privacy & Customer Data, Opportunities in Renewable Energy.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.55%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Microsoft Corp.	Information Technology	5.16	United States
Apple, Inc.	Information Technology	3.71	United States

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

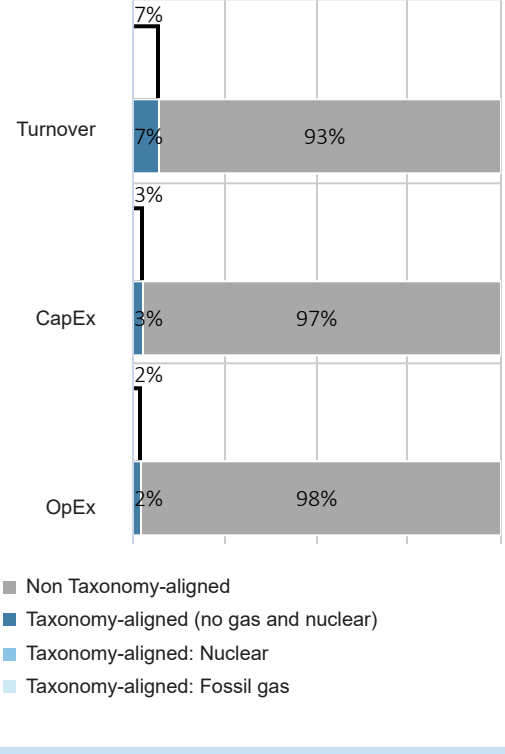

☐ In fossil gas ☐ In nuclear energy

☑ No:

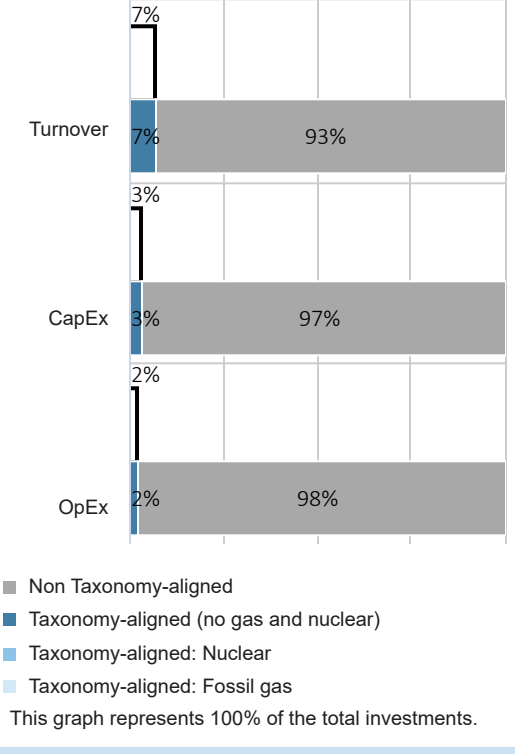

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 100% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Low Volatility Equity Portfolio

Legal entity identifier: 2549006CZR09G3CY7936

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 94% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 61 ESG engagement entries with 41 distinct companies held in the Portfolio. For these engagements, there were 25 discussions of environmental issues, and 35 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Human Capital Management, Climate Transition Plans, Privacy & Customer Data, Diversity & Inclusion.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Climate Solutions Portfolio

Legal entity identifier: 254900HQDSWZU06KBU39

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 96.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to sustainable climate solutions derived from the UN SDGs. Sustainable climate solutions are products or services that seek to address environmental challenges relating to climate change such as clean energy, transportation, recycling, resource efficiency and water. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures : www.alliancebernstein.com/go/SCSP9webdisclosures.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more sustainable climate solutions, derived from the UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services identified as sustainable climate solutions that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 82.3%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 7 "Affordable & Clean Energy": 56.8%
- SDG 9 "Industry Innovation & Infrastructure": 19.3%
- SDG 6 "Clean Water & Sanitation": 7.9%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 82.1%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 7 "Affordable & Clean Energy": 36.7%
- SDG 9 "Industry Innovation & Infrastructure": 19.2%
- SDG 6 "Clean Water & Sanitation": 14.7%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	691.59 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	32.39 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	1,096.07 in tCO2e/ million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	6.12%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	75.11% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	82.17% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.65 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.09 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	11.24 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.60 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.19 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.14 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	10.64%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	0.00 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	0.33 in tons/million EUR invested

PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.89%
PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	13.01%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	31.47%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	N/A
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	61.29%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	0.26%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	**Sector**	**% Assets**	**Country**
Cia de Saneamento Basico do Estado de Sao Paulo	Utilities	6.38	Brazil

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The Portfolio invested 96% in sustainable investments

What was the asset allocation?

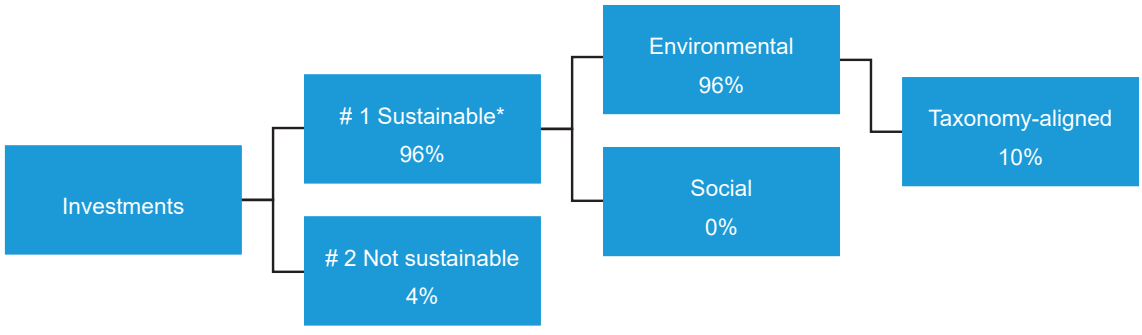

#1 Sustainable: 96%

E Sustainable: 96%

S Sustainable: 0%

Taxonomy Aligned: 10%

#2 Not Sustainable: 4%

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* Note that the sum of the E/S Sustainable Investments may not sum due to rounding

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets
Industrials	**53.74**
Commercial Services & Supplies	11.58
Construction & Engineering	9.27
Electrical Equipment	24.20
Industrial Conglomerates	0.50
Machinery	6.35
Professional Services	1.84
Information Technology	**23.34**
Communications Equipment	1.62
Electronic Equipment, Instruments & Components	13.47
Semiconductors & Semiconductor Equipment	6.68
Software	1.57
Utilities	**12.05**
Electric Utilities	5.67
Water Utilities	6.38
Energy	**6.90**
Oil, Gas & Consumable Fuels	6.90
Consumer Discretionary	**2.94**
Automobile Components	2.94
Materials	**0.58**
Metals & Mining	0.58
Consumer Staples	**0.45**
Food Products	0.45

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 10% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

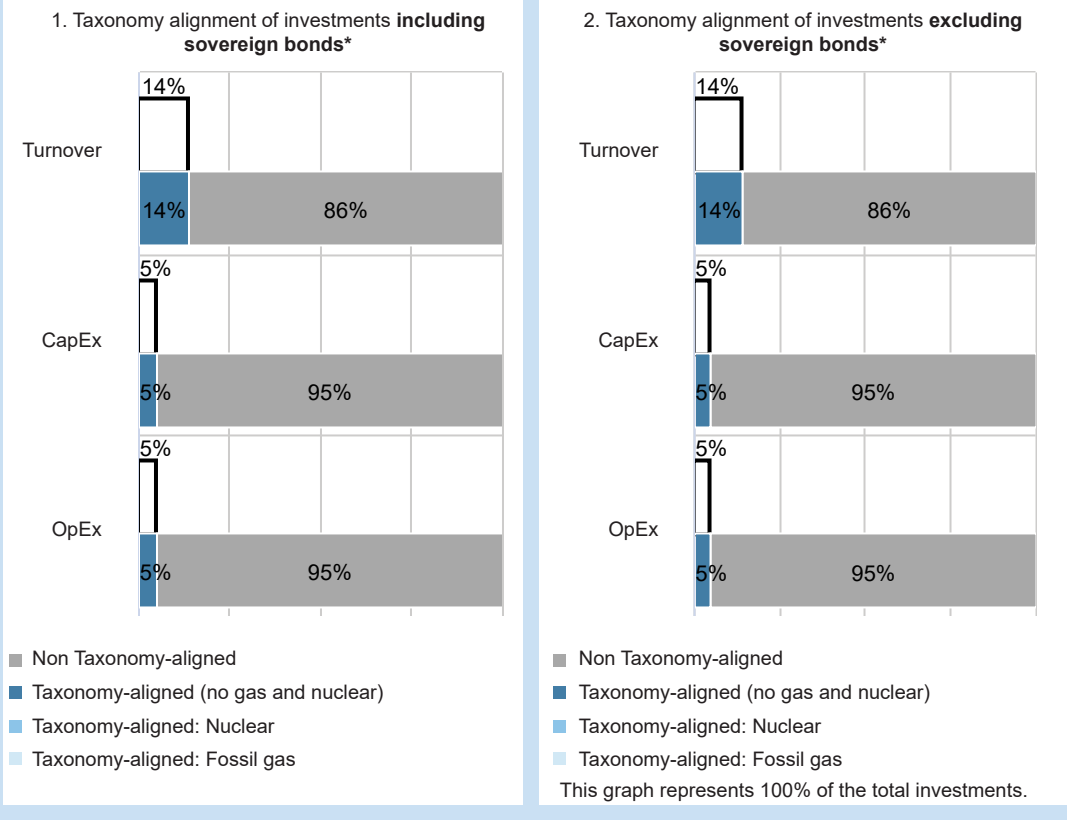

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 11% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

86%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

0%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to sustainable climate solutions derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG-aligned products and services (top- down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Climate Transition Equity Portfolio

Legal entity identifier: 254900SFNRI4EH8WNV68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 87.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- EU Climate Transition Benchmark Exclusions and those listed in the Prospectus: The Portfolio excluded investments in certain sectors as further outlined in the Prospectus or on www.alliancebernstein.com/go/ABSICAVIExclusionChart.
- The fund partially intended to make sustainable investments.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 88% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 73 ESG engagement entries with 52 distinct companies held in the Portfolio. For these engagements, there were 25 discussions of environmental issues, and 48 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Human Capital Management, Privacy & Customer Data, Climate Transition Plans, Opportunities in Renewable Energy.

AB monitored compliance with the EU Climate Transition Benchmark exclusions and those listed in the Prospectus and confirmed that these requirements were met. The Portfolio excluded investments in certain sectors as further outlined in the Prospectus.

- **…and compared to previous periods?**

In the year to 31 May 2025, 87% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the Sustainable Investments that the Portfolio partially intended to make was to support environmental and social outcomes aligned with investment themes derived from the UN SDGs, including Climate, Health and Empowerment. To qualify as a Sustainable Investment, a security was required to contribute directly to the achievement of at least one UN SDG. These themes could evolve over time based on the Investment Manager's research.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 81.8%.

More information on alignment can be found in the Portfolio's Exclusion Policy www.alliancebernstein.com/go/GCTEPExclusionPolicy
More information on these indicators can be found in AB's Sustainability-Related Disclosures www.alliancebernstein.com/go/EQ8webdisclosures.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

All sustainable investments held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all sustainable investments held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Sustainable Investments used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess sustainable investments on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible to be considered a sustainable investment.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- GHG emissions (Scope 1, Scope 2, Scope 3) (#1).
- Carbon footprint (#2).
- GHG intensity of investee companies (#3).
- Exposure to companies active in the fossil fuel sector (#4).
- Share of non-renewable energy production (#5).
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).
- Investments in companies without carbon emission reduction initiatives .

PAIs 1, 2, 3, 5, and the PAI on investments in companies without carbon emission reduction initiatives, are considered as part of the Portfolio's fundamental research and engagement activity. The Portfolio is comprised of companies with aggregate carbon exposure that is significantly lower (at least 50%) than the carbon exposure of the MSCI World Index. In constructing this Portfolio, the Investment Manager integrates factors such as companies' current carbon footprint, the overall carbon reduction strategy, including specific climate targets, proven reductions, and green revenues in view of the global efforts to transition to a lower carbon economy.

For PAI 4, the Portfolio excludes fossil fuels.

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio. For PAI 14, the Portfolio excluded controversial weapons

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1 GHG emissions	39.54 in tons CO2 equivalent
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 2 GHG emissions	34.70 in tons CO2 equivalent
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 3 GHG emission	1522.09 in tons CO2 equivalent
PAI 2	Carbon footprint	Carbon footprint – Scope 1-2	5.39 in tCO2e/million EUR invested
PAI 3	GHG intensity of investee companies	GHG intensity of investee companies – Scope 1-2	375.13 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	3.05%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	0.00% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	53.28% of total energy sources
PAI 10	Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Microsoft Corp.	Information Technology	5.68	United States
Alphabet, Inc.	Communication Services	3.74	United States

What was the proportion of sustainability-related investments?

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 94%

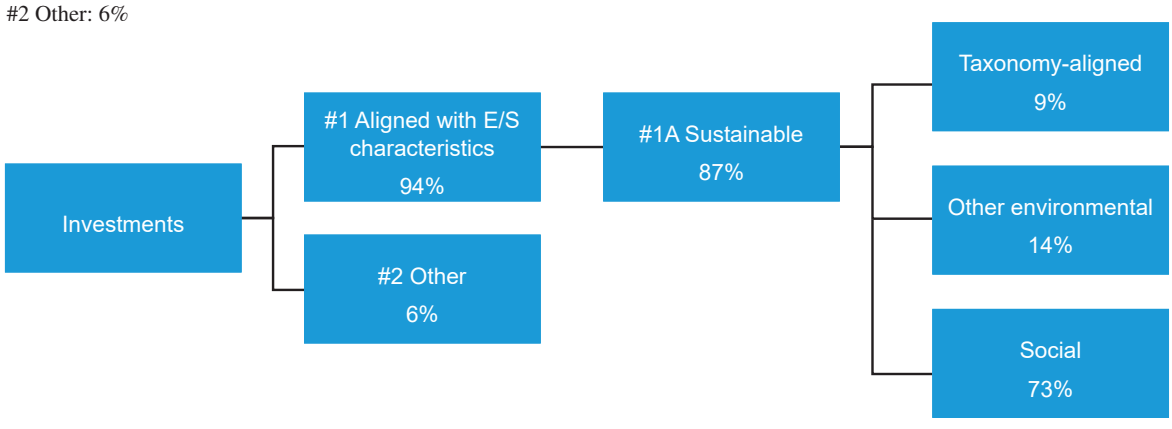

#1A Sustainable: 87%

#1A Sustainable Taxonomy-aligned: 9%

#1A Sustainable Other environmental: 14%

#1A Sustainable Social: 73%

#2 Other: 6%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets
Information Technology	**30.09**
Communications Equipment	0.63
IT Services	1.94
Semiconductors & Semiconductor Equipment	9.08

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

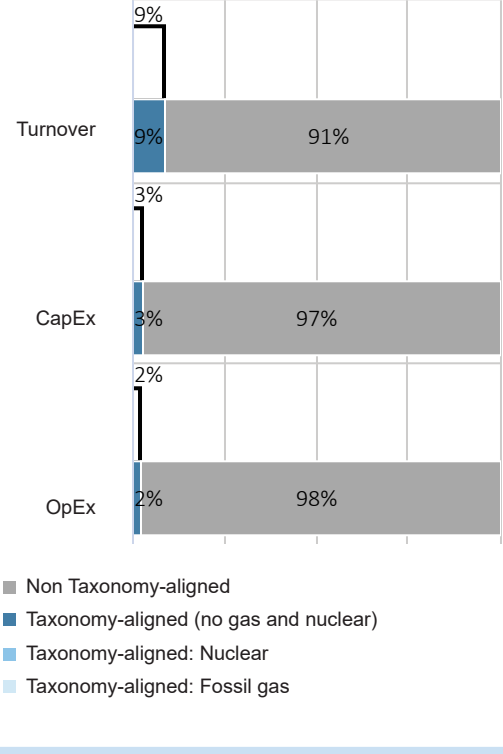

☐ In fossil gas ☐ In nuclear energy

☑ No:

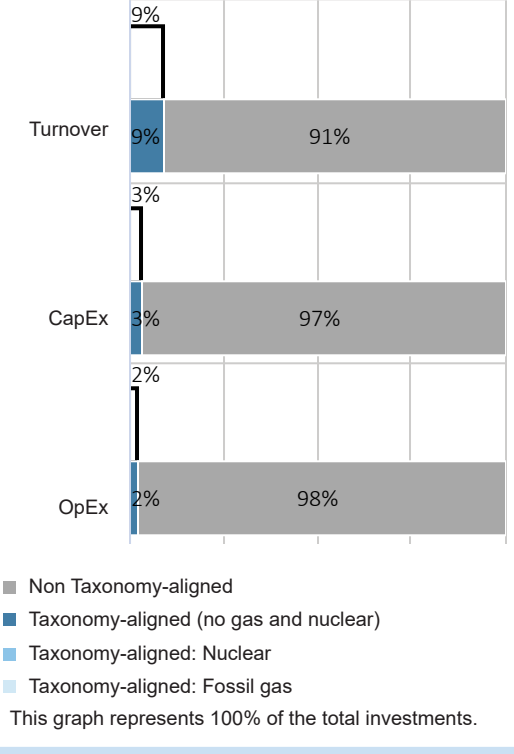

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

5%

What was the share of socially sustainable investments?

73%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 99% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

The Portfolio committed to partially invest in Sustainable Investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believes the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services
- The security satisfied AB's proprietary methodology to determine that a specific security met the DNSH principle; and
- The issuer of the security followed good governance practices under AB's Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
  N/A
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
  N/A
- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: China Net Zero Solutions Portfolio - Liquidated
Legal entity identifier: 254900OU3AOMYTJ8QU26

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- EU Climate Transition Benchmark Exclusions and those listed in the Prospectus: The Portfolio excluded investments in certain sectors as further outlined in the Prospectus or on www.alliancebernstein.com/go/ABSICAVIExclusionChart.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the period to the fund closure (liquidation date 6 February 2026), 85% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the period to the fund closure (liquidation date 6 February 2026), there were 22 ESG engagement entries with 21 distinct companies held in the Portfolio. For these engagements, there were 20 discussions of environmental issues, and 7 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions , Biodiversity & Nature, Opportunities in Clean Tech, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

  In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

  N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 06/02/2026-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.84%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 6 February 2026

Largest investments	Sector	% Assets	Country
Contemporary Amperex Technology	Industrials	8.96	China
Victory Giant Technology Huizhou	Information Technology	7.96	China

Lens Technology Co., Ltd.	Information Technology	2.47	China
Shandong Himile Mechanical Science & Technology	Industrials	2.31	China
Dajin Heavy Industry	Industrials	2.27	China

What was the proportion of sustainability-related investments?

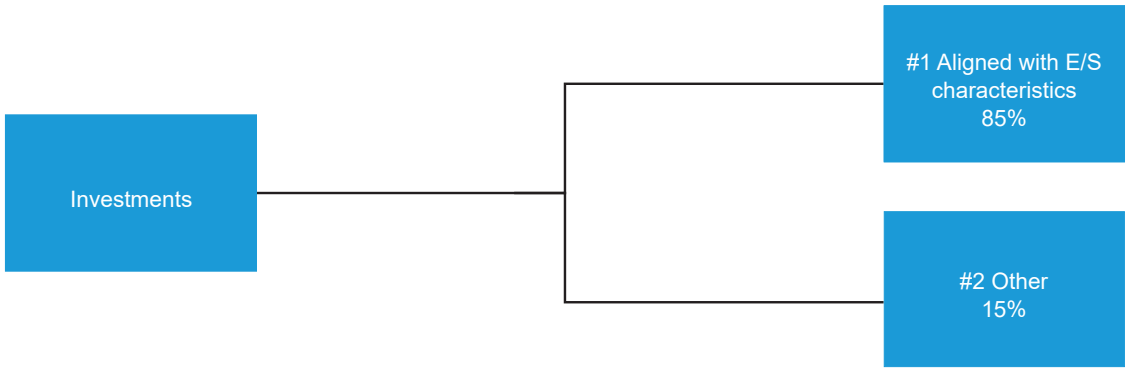

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 85%

#2 Other: 15%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- **In which economic sectors were the investments made?**

Sector and Sub-sector	% Assets
Industrials	**47.47**
Construction & Engineering	1.17
Electrical Equipment	31.44
Machinery	14.86
Materials	**18.05**
Chemicals	5.73
Metals & Mining	12.32
Information Technology	**17.87**
Communications Equipment	2.07
Electronic Equipment, Instruments & Components	12.42
Semiconductors & Semiconductor Equipment	2.80
Software	0.58
Consumer Discretionary	**13.83**
Automobile Components	10.85
Automobiles	2.98
Utilities	**2.78**
Independent Power and Renewable Electricity Producers	2.78

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

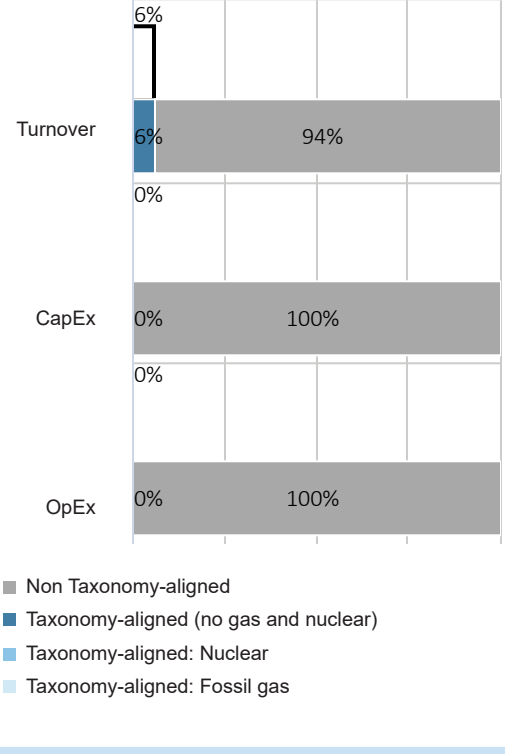

☐ In fossil gas ☐ In nuclear energy

☑ No:

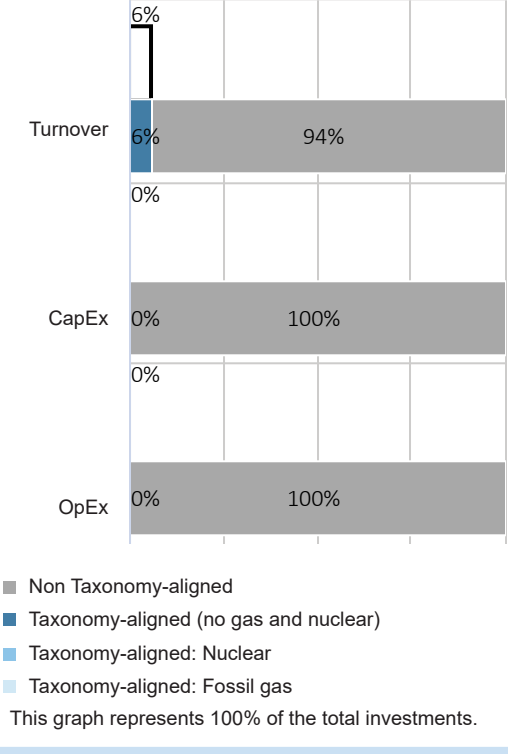

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 18% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As at the fund closure, 56.6% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable US Thematic Portfolio

Legal entity identifier: 254900WC96K2077NDG73

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 29.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 65.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures : www.alliancebernstein.com/go/EQ9webdisclosures.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 81.5%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 "Decent Work & Economic Growth": 32.8%
- SDG 7 "Affordable and Clean Energy": 20.5%
- SDG 9 "Industry, Innovation and Infrastructure": 15.3%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/EquityExclusionPolicy and confirms they were met.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 87.2%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 8 "Decent Work & Economic Growth": 27.7%
- SDG 3 "Good Health & Wellbeing": 23.7%
- SDG 7 "Affordable & Clean Energy": 17.8%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	47,049.63 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	12.34 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	682.55 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	4.64%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	65.09% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	57.21% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.56 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.07 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	12.02 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.31 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.12 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.12 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	3.97%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	0.00 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	0.16 in tons/million EUR invested

PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	12.83%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	35.65%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	N/A
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	54.88%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	2.44%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 8% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

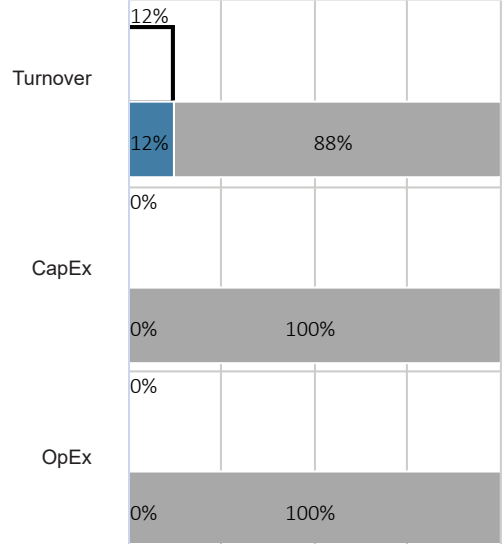

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

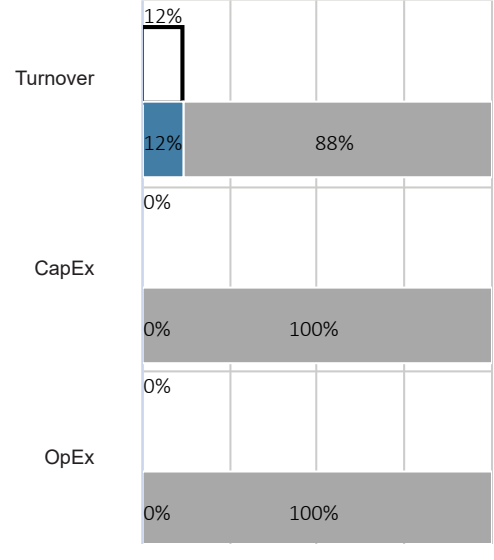

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 8% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

21%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

65%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments. A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally-or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG-aligned products and services (top- down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Value Portfolio

Legal entity identifier: 5493006JUPNHU2R6PV70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 100% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 68 ESG engagement entries with 48 distinct companies held in the Portfolio. For these engagements, there were 38 discussions of environmental issues, and 35 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Labor Management, Water Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 100% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Alphabet, Inc.	Communication Services	3.82	United States

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

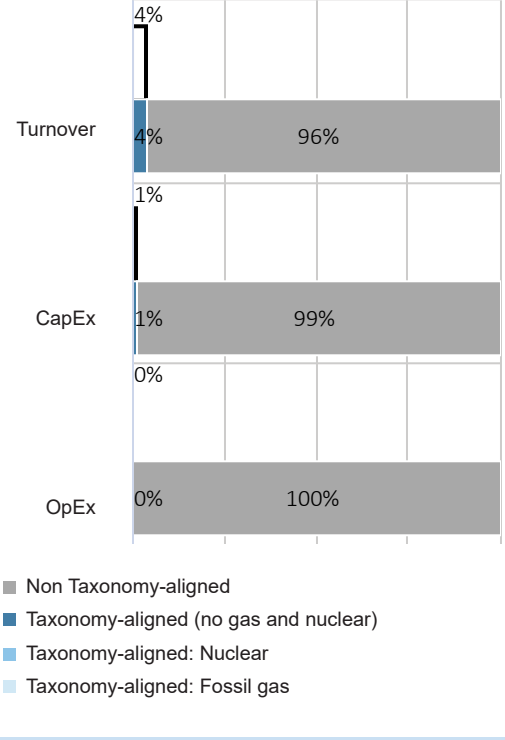

☐ In fossil gas ☐ In nuclear energy

☑ No:

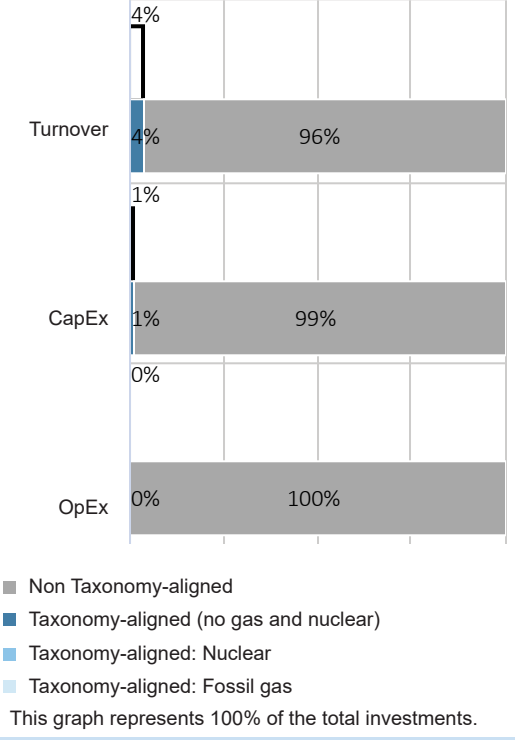

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 100% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measured the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 89% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 20 ESG engagement entries with 16 distinct companies held in the Portfolio. For these engagements, there were 16 discussions of environmental issues, and 8 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Opportunities in Renewable Energy, Climate Change Vulnerability, Product Carbon Footprint.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

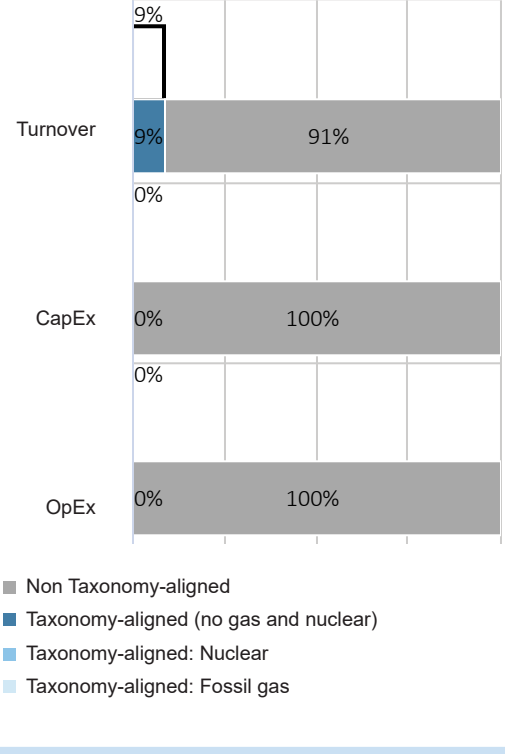

☐ In fossil gas ☐ In nuclear energy

☑ No:

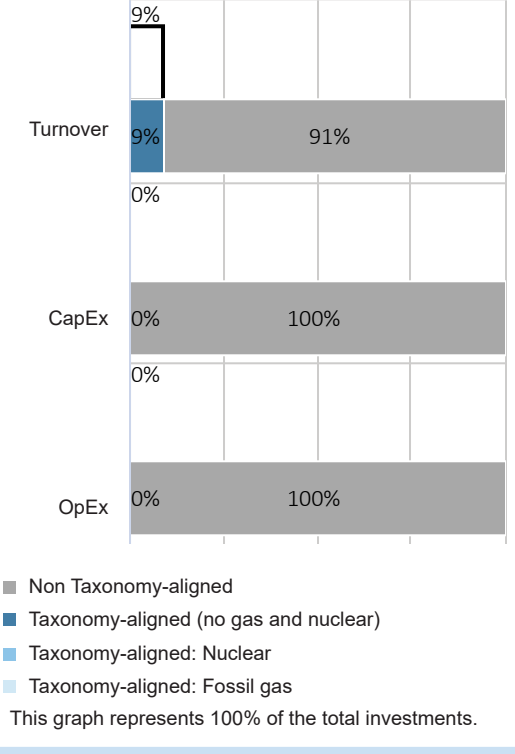

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 8% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research, scoring and Engagements. As of 31 May 2026, 98% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Growth Portfolio - Liquidated

Legal entity identifier: 254900F96HNR79U93837

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the period to the fund closure (liquidation date 27 February 2026), 91% of the Portfolio was deemed to promote E/ S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the period to the fund closure (liquidation date 27 February 2026), there were 37 ESG engagement entries with 28 distinct companies held in the Portfolio. For these engagements, there were 16 discussions of environmental issues, and 25 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Carbon Emissions , Water Management, Privacy & Customer Data, Product Safety & Quality.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 84% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 27/02/2026-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	3.62%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 27 February 2026

Largest investments	Sector	% Assets	Country
Amazon.com, Inc.	Consumer Discretionary	5.53	United States
Microsoft Corp.	Information Technology	5.10	United States

What was the proportion of sustainability-related investments?

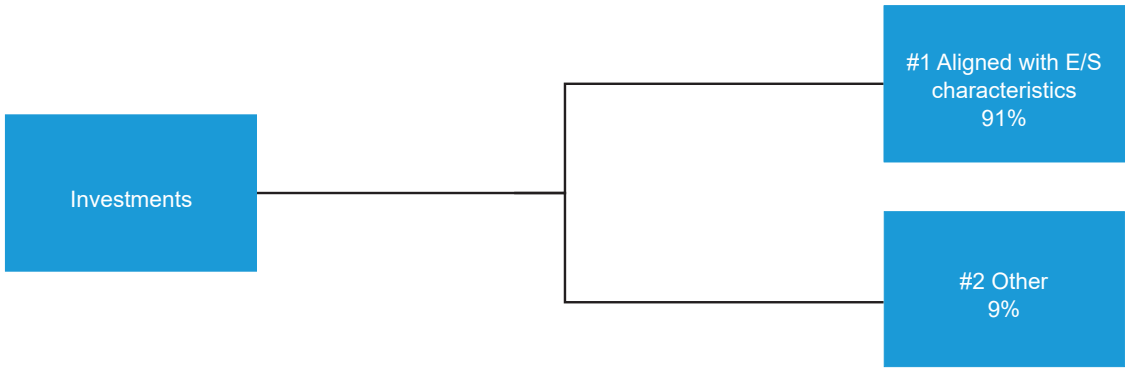

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 91%

#2 Other: 9%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets
Information Technology	**35.31**
Electronic Equipment, Instruments & Components	2.41
IT Services	2.10
Semiconductors & Semiconductor Equipment	15.58
Software	15.22

Interactive Media & Services	8.82
Health Care	**5.22**
Health Care Equipment & Supplies	2.05
Pharmaceuticals	3.17

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

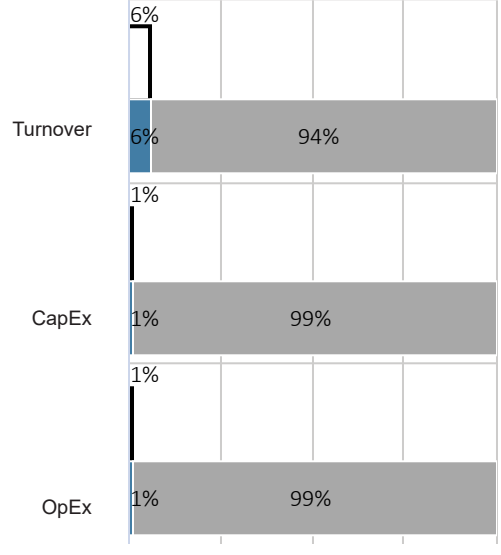

☐ In fossil gas ☐ In nuclear energy

☑ No:

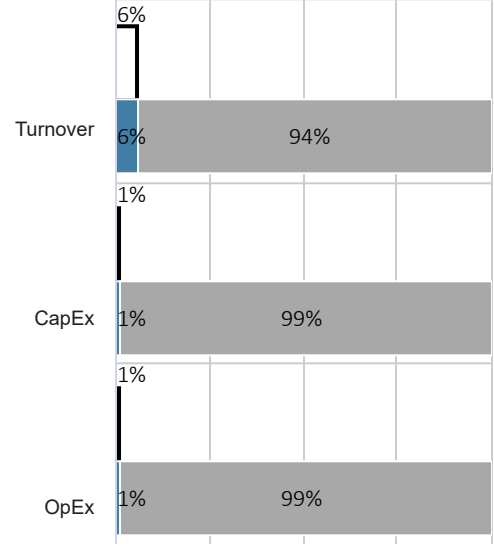

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As at the fund closure, 57% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Growth Portfolio

Legal entity identifier: 254900ODIMAX7N5LST41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 96% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 23 ESG engagement entries with 20 distinct companies held in the Portfolio. For these engagements, there were 16 discussions of environmental issues, and 19 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Human Capital Management, Climate Transition Plans, Diversity & Inclusion, Labor Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 77% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A
- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

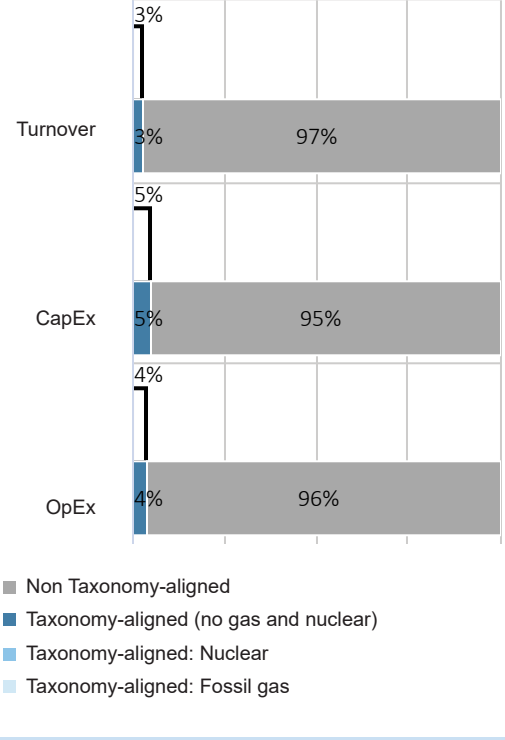

☐ In fossil gas ☐ In nuclear energy

☑ No:

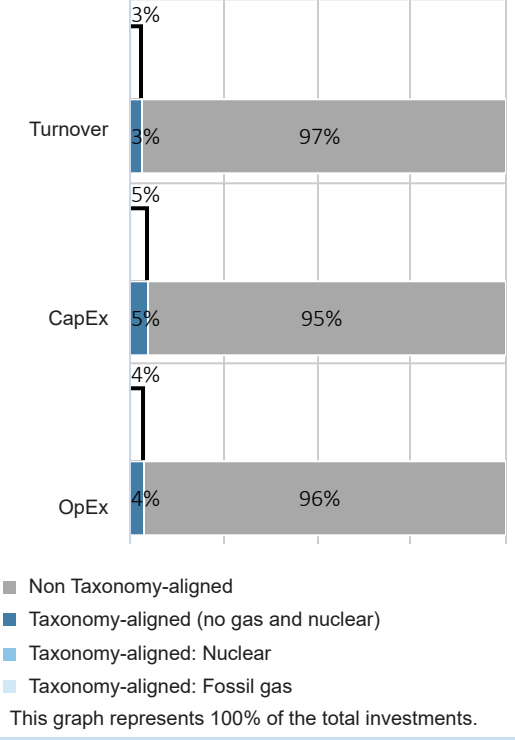

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 99% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 93% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 41 ESG engagement entries with 33 distinct companies held in the Portfolio. For these engagements, there were 23 discussions of environmental issues, and 19 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Diversity & Inclusion, Resource Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 80% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	3.28%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Walmart, Inc.	Consumer Staples	3.54	United States

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

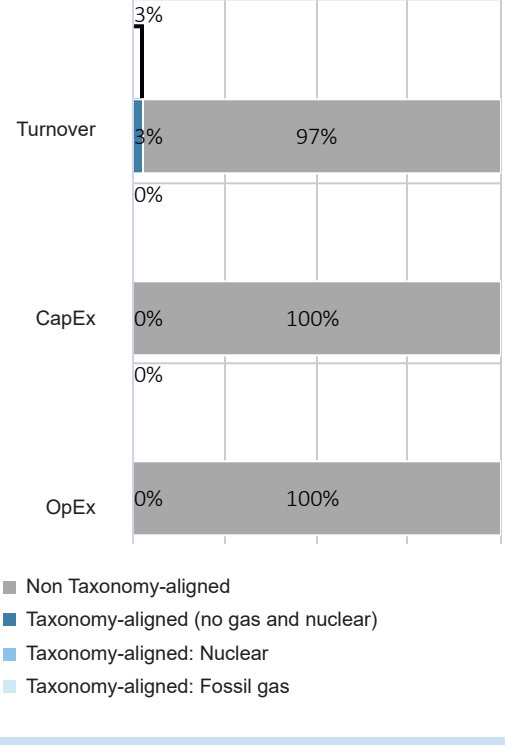

☐ In fossil gas ☐ In nuclear energy

☑ No:

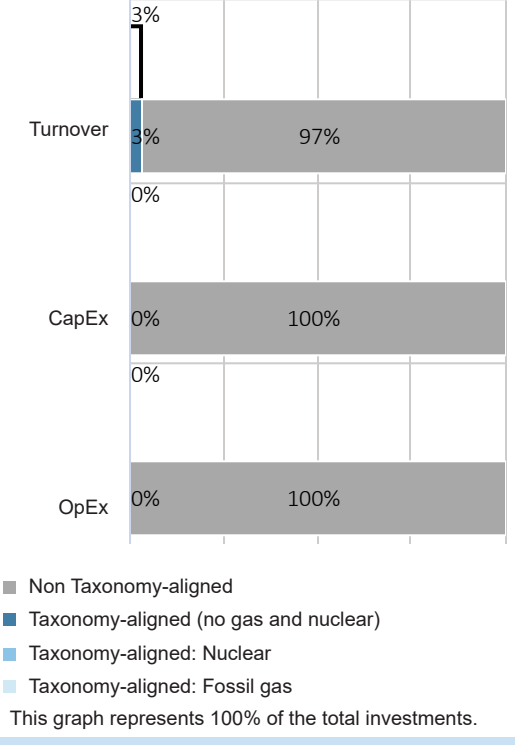

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 89% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Opportunities Portfolio

Legal entity identifier: 5493006FE3ZTWUU0RR75

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the period to 31 May 2026, 88% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the period to 31 May 2026, there were 31 ESG engagement entries with 25 distinct companies held in the Portfolio. For these engagements, there were 24 discussions of environmental issues, and 14 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Water Management, Resource Management, Employee Health & Safety.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  In the year to 31 May 2025, 85% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.
- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A
- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A
  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A
  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	7.31%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

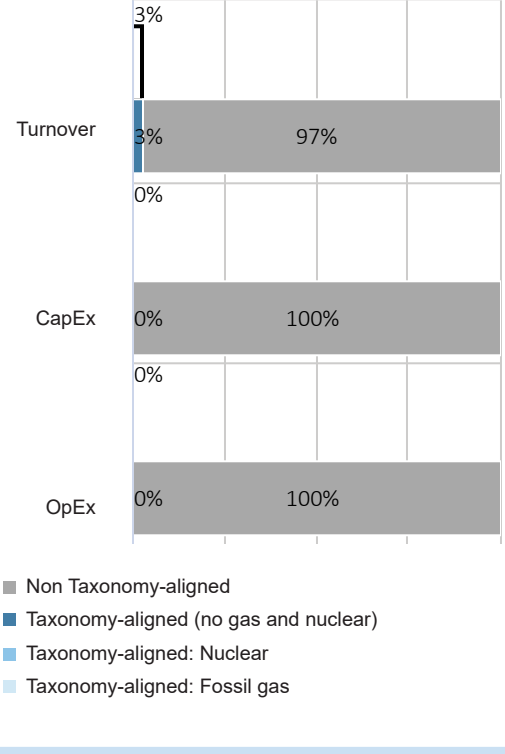

☐ In fossil gas ☐ In nuclear energy

☑ No:

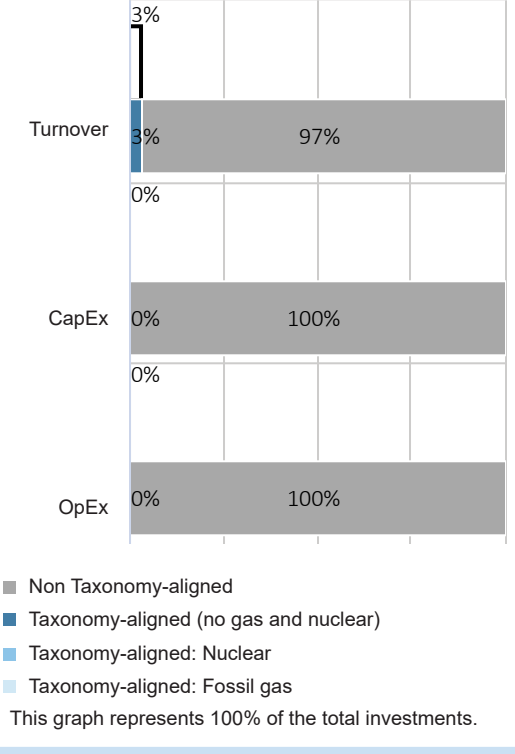

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 97% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Disruptors Portfolio

Legal entity identifier: 254900IHZYLR2J9M9O74

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 88% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 51 ESG engagement entries with 39 distinct companies held in the Portfolio. For these engagements, there were 29 discussions of environmental issues, and 28 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Human Capital Management, Carbon Emissions , Resource Management, Water Management.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  N/A - the Portfolio was designated Article 8 after 31 May 2025.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*
  N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 27 May 2026 - 31 May 2026

Largest investments	Sector	% Assets	Country
Broadcom, Inc.	Information Technology	3.11	United States

What was the proportion of sustainability-related investments?

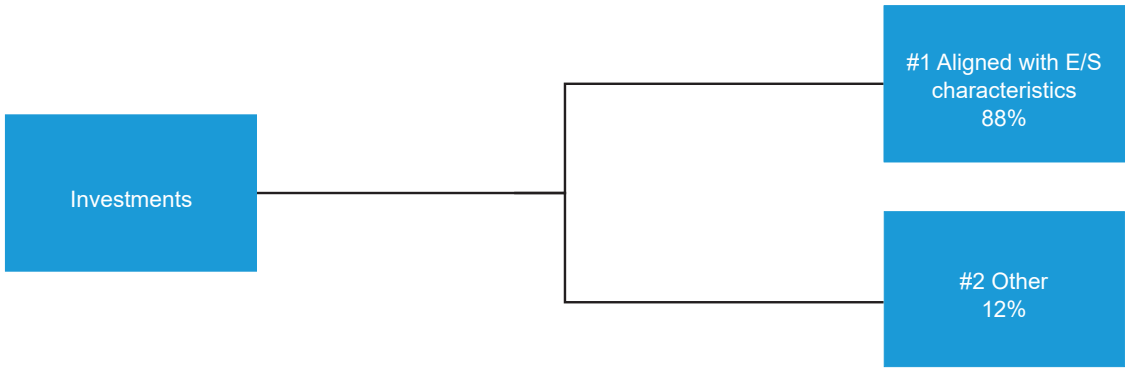

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 88%

#2 Other: 12%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

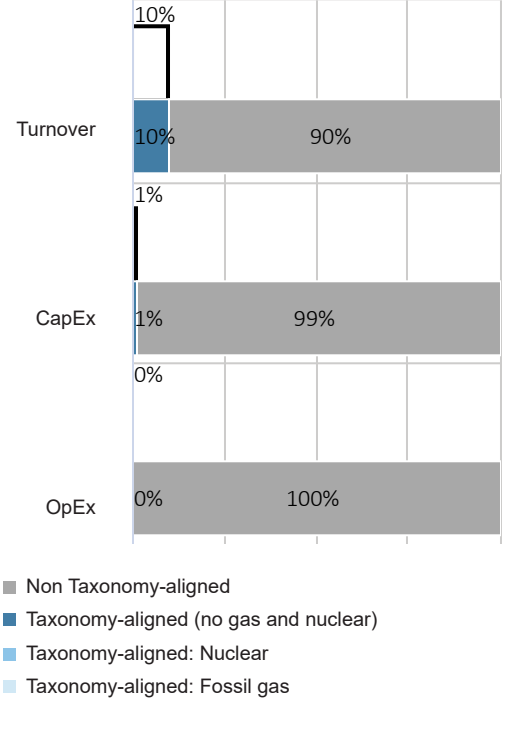

☐ In fossil gas ☐ In nuclear energy

☑ No:

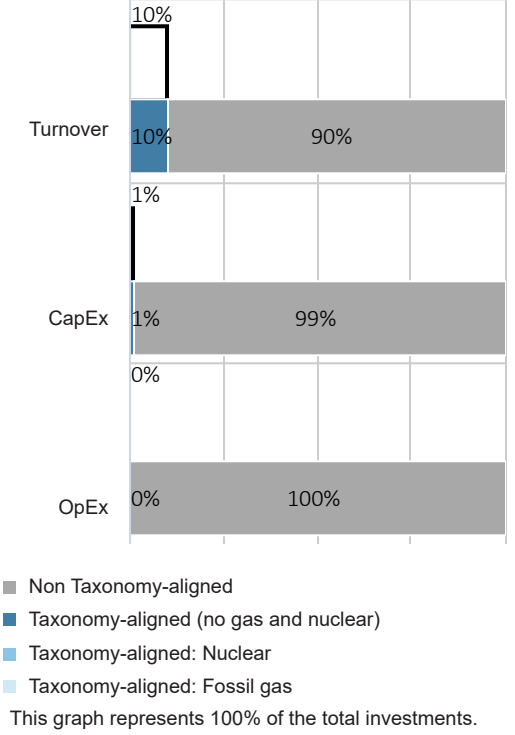

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  N/A - the Portfolio was designated Article 8 after 31 May 2025.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 89% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

In the year to 31 May 2026, 93% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 158 ESG engagement entries with 109 distinct companies held in the Portfolio. For these engagements, there were 75 discussions of environmental issues, and 93 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions , Climate Transition Plans, Human Capital Management, Privacy & Customer Data, Stakeholder Engagement.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**
  N/A - the Portfolio was designated Article 8 after 31 May 2025.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**
  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**
  N/A

  - *How were the indicators for adverse impacts on sustainability factors taken into account?*
    N/A

  - *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*
    N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.39%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

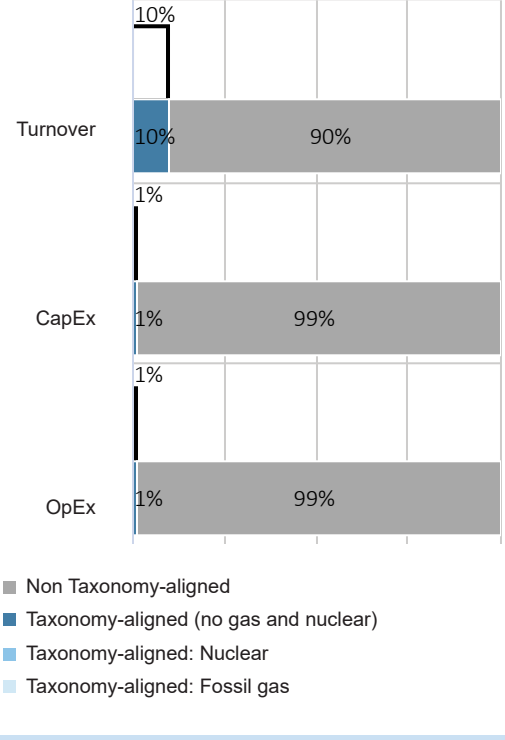

☐ In fossil gas ☐ In nuclear energy

☑ No:

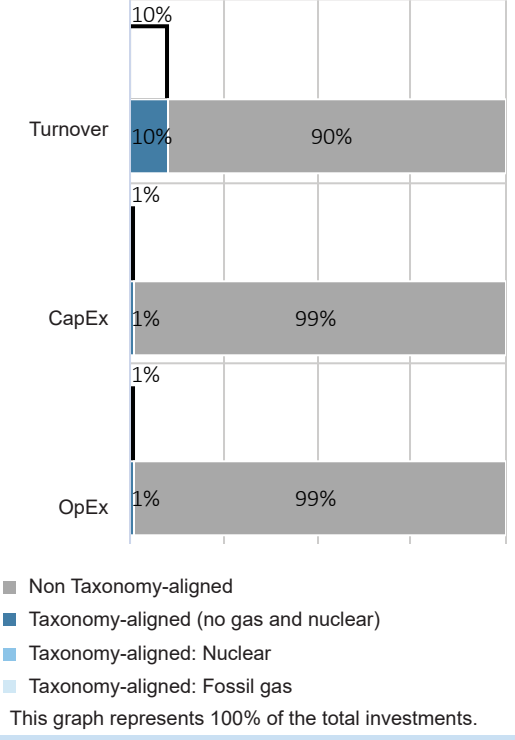

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  N/A - the Portfolio was designated Article 8 after 31 May 2025.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics subject to the satisfaction of AB's Good Governance Policy.
- Cash and cash-equivalents held for liquidity, risk management, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements. As of 31 May 2026, 100% of the Portfolio met this criteria.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Euro High Yield Portfolio

Legal entity identifier: J81WLWCADQPE0VVBLF93

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 24.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 72.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures: www.alliancebernstein.com/go/FIMAS9webdisclosures.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 74.2%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 9 "Industry, Innovation and Infrastructure": 22.7%
- SDG 3 "Good Health and Well-Being": 17.4%
- SDG 1 "No Poverty": 16.0%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/FIExclusionPolicy.

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 78.6%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 3 "Good Health and Well-Being": 17.6%
- SDG 1 "No Poverty": 13.0%
- SDG 9 "Industry, Innovation and Infrastructure": 12.0%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).

- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.
- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	130,581.57 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	51.21 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	624.47 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	3.87%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	18.24% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	60.42% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.71 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	1.32 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	1.52 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.04 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.09 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.30 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.54 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	5.99%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	1.90 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	3.55 in tons/million EUR invested

PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	8.62%
PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	12.66%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	32.83%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	0.0% in tons CO2 equivalent /million EUR of owned GDP
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0.00 investee countries subject to violations
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	30.21%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	10.06%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The Portfolio invested 97% in sustainable investments

What was the asset allocation?

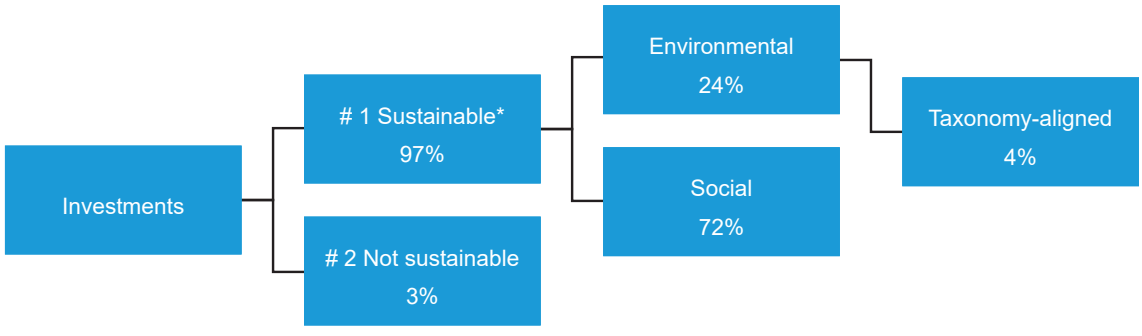

#1 Sustainable: 97%

E Sustainable: 24%

S Sustainable: 72%

Taxonomy Aligned: 4%

#2 Not Sustainable: 3%

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* Note that the sum of the E/S Sustainable Investments may not sum due to rounding

- **In which economic sectors were the investments made?**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 4% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

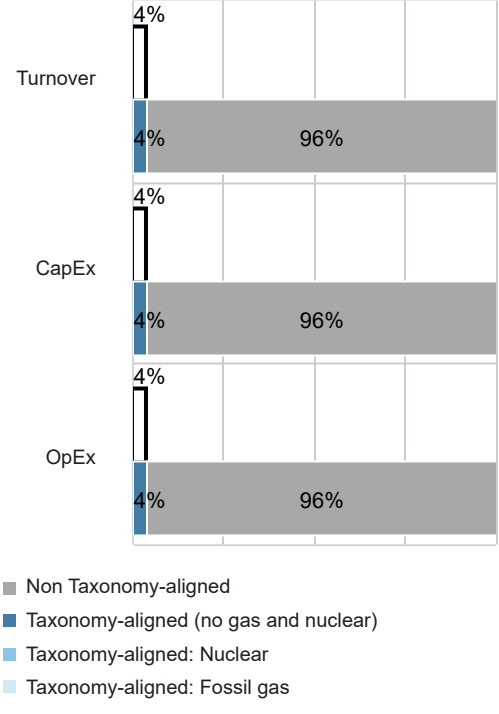

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

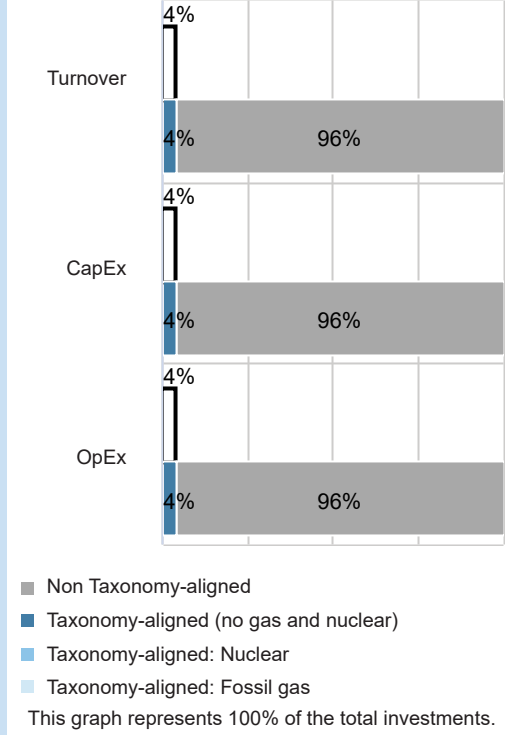

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 5% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

20%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

72%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally-or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG-aligned products and services (top- down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: RMB Income Plus Portfolio

Legal entity identifier: 549300GLOMPNRHURR344

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 92% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 95% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 59 ESG engagement entries with 49 distinct companies held in the Portfolio. For these engagements, there were 48 discussions of environmental issues, and 30 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Green Bonds & Environmental Sustainability-Linked Bonds, Opportunities in Renewable Energy, Biodiversity & Nature.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

  As of 31 May 2025, 80% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 90% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

  N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026-Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.46%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What was the proportion of sustainability-related investments?

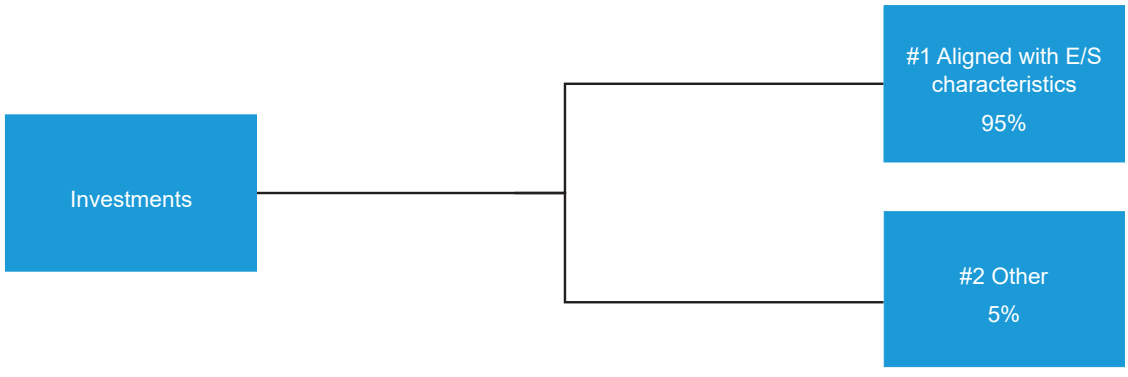

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 95%

#2 Other: 5%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

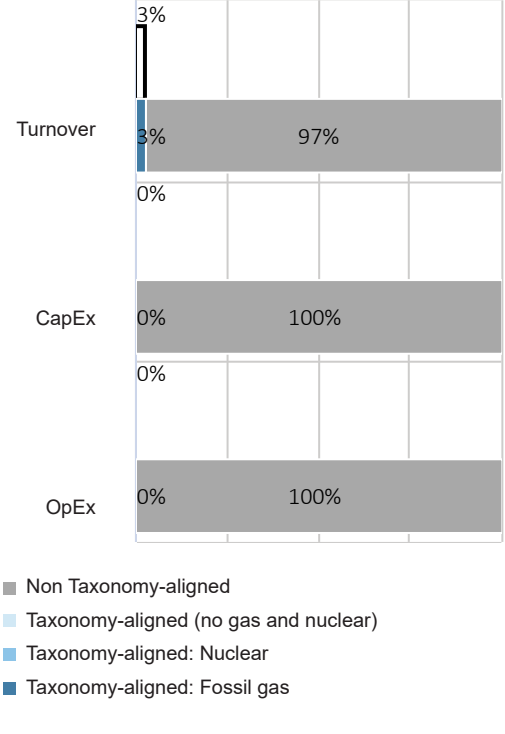

☐ In fossil gas ☐ In nuclear energy

☑ No:

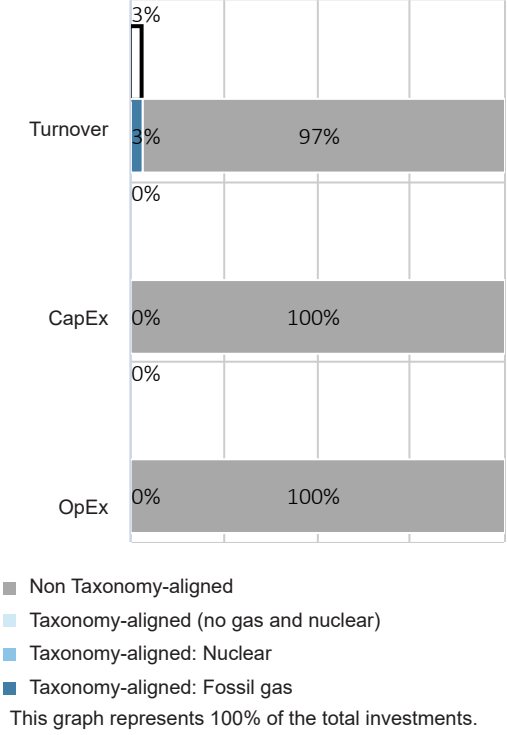

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 92% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Short Duration High Yield Portfolio

Legal entity identifier: LDWBHC26DB5HQE5WJS53

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 95% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 83% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 51 ESG engagement entries with 56 distinct companies held in the Portfolio. For these engagements, there were 30 discussions of environmental issues, and 35 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Employee Health & Safety, Climate Transition Plans, Opportunities in Renewable Energy, Product Safety & Quality.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 94% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 87% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

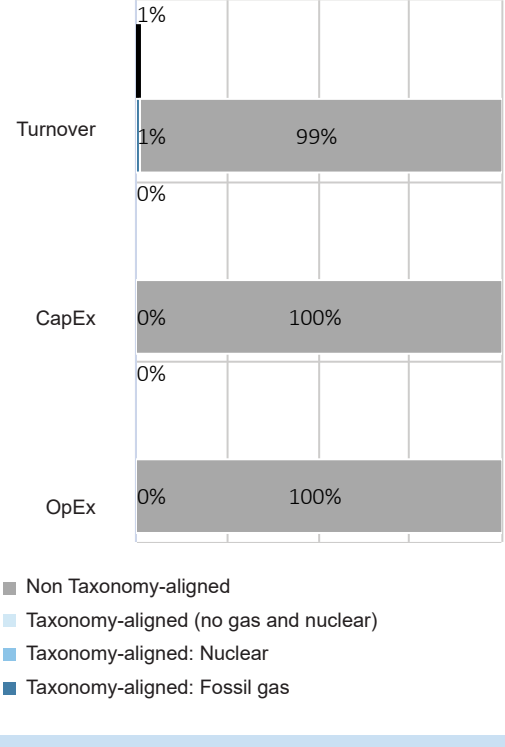

☐ In fossil gas ☐ In nuclear energy

☑ No:

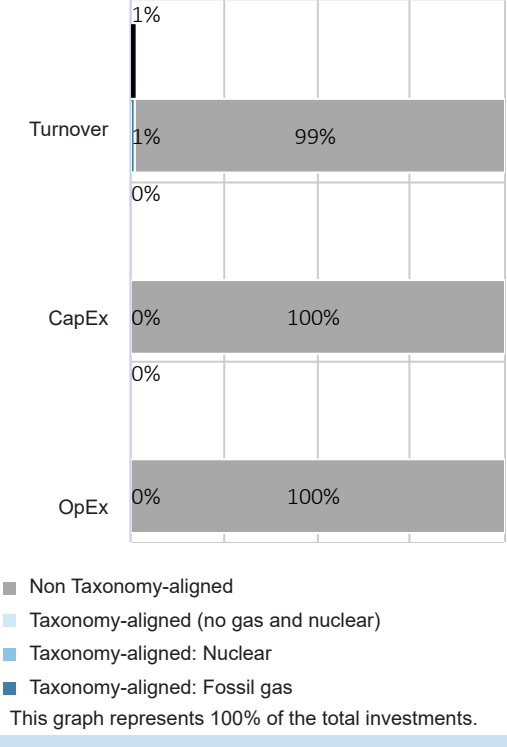

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 95% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 100% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 94% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 113 ESG engagement entries with 92 distinct companies held in the Portfolio. For these engagements, there were 80 discussions of environmental issues, and 60 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Opportunities in Renewable Energy, Green Bonds & Environmental Sustainability-Linked Bonds, Biodiversity & Nature.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 100% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 95% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

What was the proportion of sustainability-related investments?

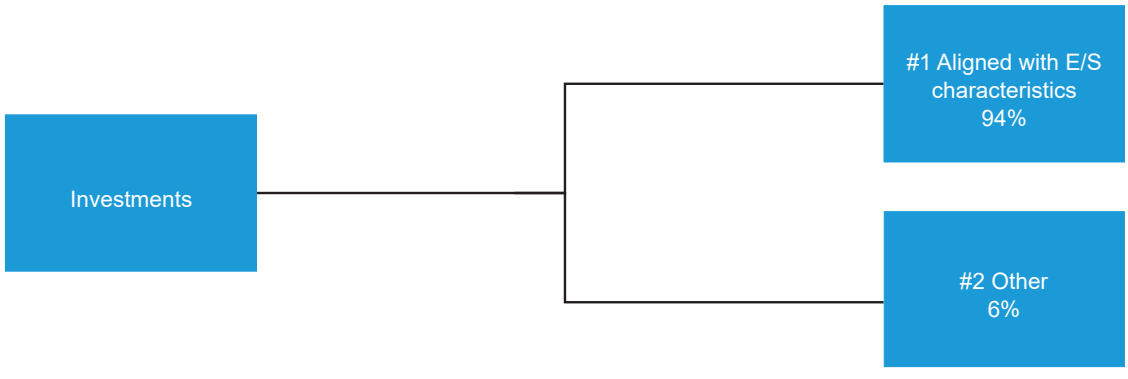

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 94%

#2 Other: 6%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

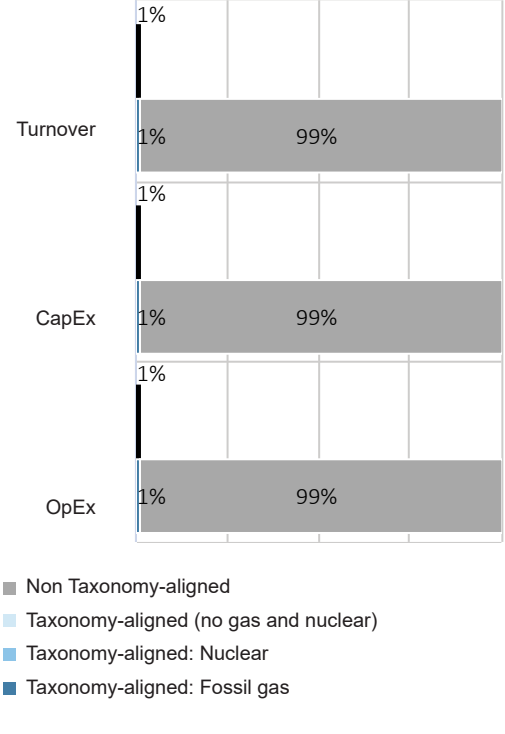

☐ In fossil gas ☐ In nuclear energy

☑ No:

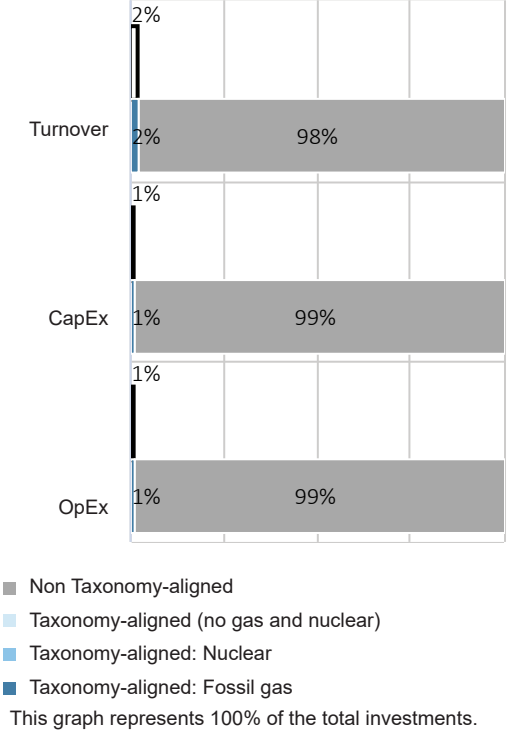

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 100% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Market Corporate Debt Portfolio

Legal entity identifier: 549300F4R36YSUVW4G50

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 95% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 79% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 60 ESG engagement entries with 54 distinct companies held in the Portfolio. For these engagements, there were 47 discussions of environmental issues, and 24 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Opportunities in Renewable Energy, Green Bonds & Environmental Sustainability-Linked Bonds, Water Management.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

  As of 31 May 2025, 94% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 77% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

  N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1.36%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

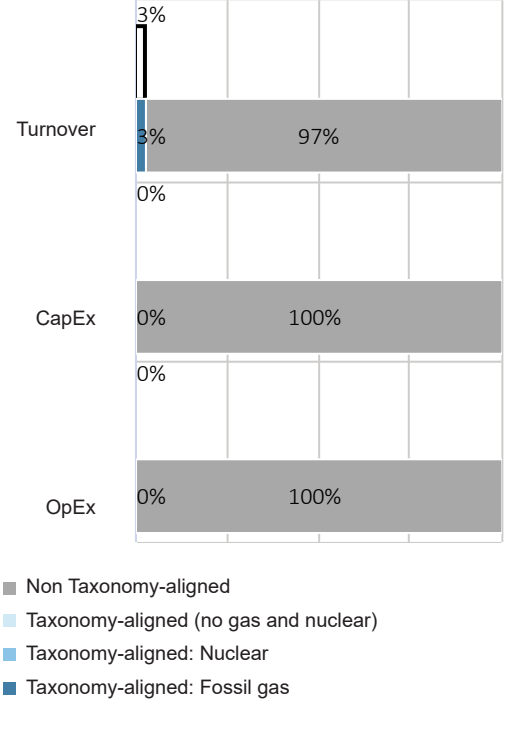

☐ In fossil gas ☐ In nuclear energy

☑ No:

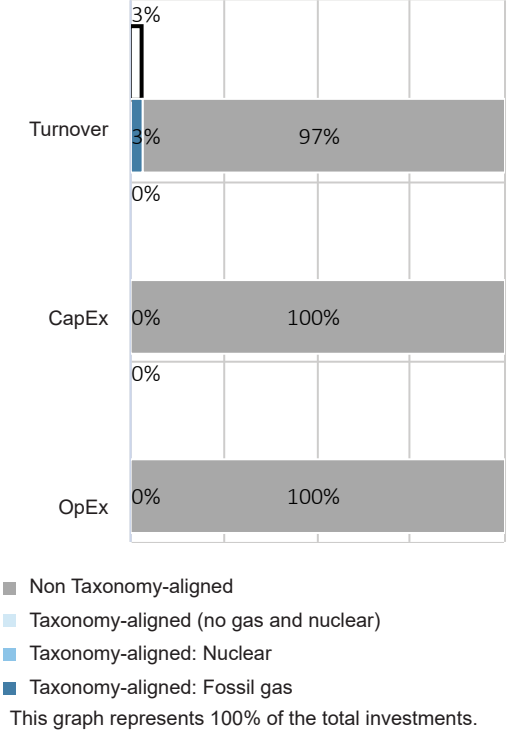

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 95% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

What was the proportion of sustainability-related investments?

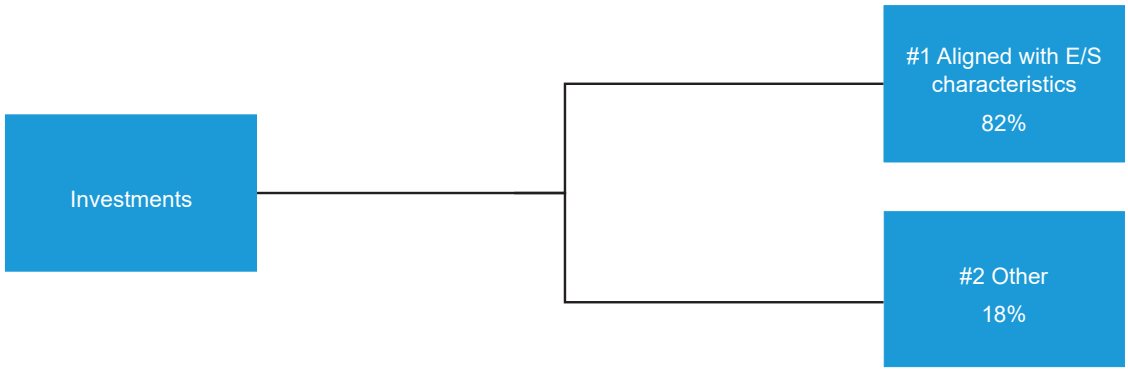

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 82%

#2 Other: 18%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets
Industrials	**84.86**
Basic	5.50
Capital Goods	6.00

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

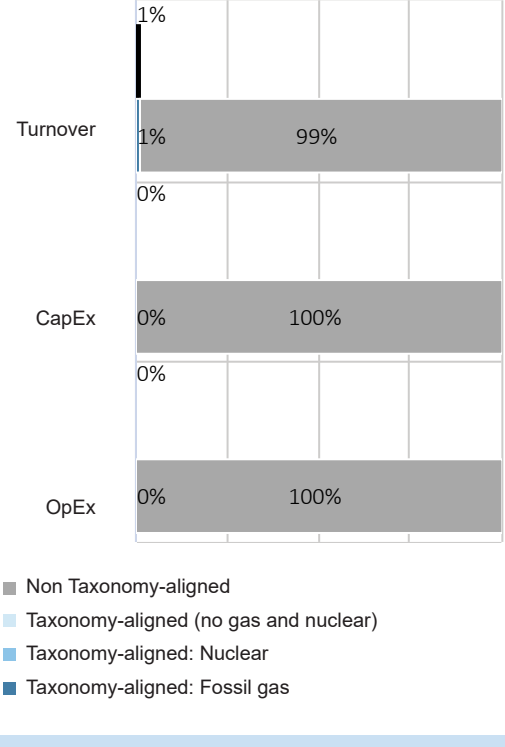

☐ In fossil gas ☐ In nuclear energy

☑ No:

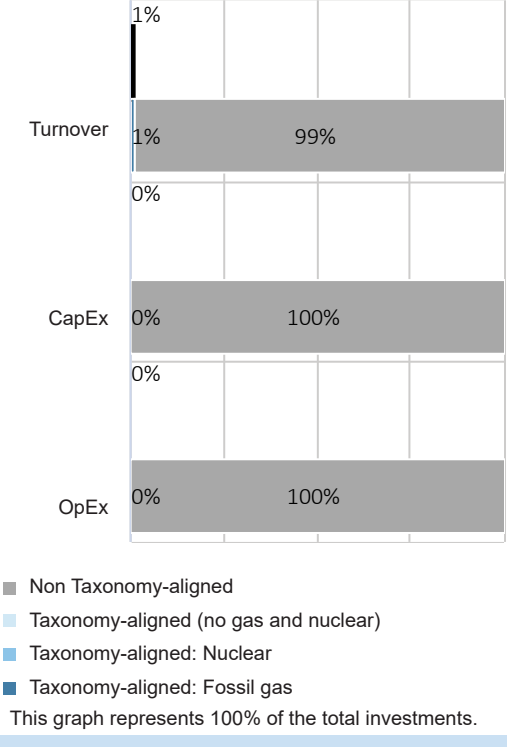

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 96% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Dynamic Bond Portfolio

Legal entity identifier: 549300RDK6X3LSLXYT37

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 94% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 90% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 112 ESG engagement entries with 95 distinct companies held in the Portfolio. For these engagements, there were 76 discussions of environmental issues, and 61 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Opportunities in Renewable Energy, Green Bonds & Environmental Sustainability-Linked Bonds, Biodiversity & Nature.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 97% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 94% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.03%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

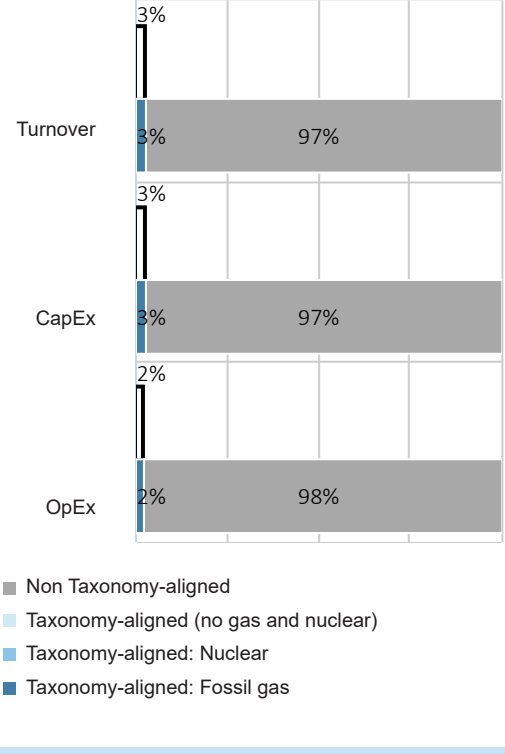

☐ In fossil gas ☐ In nuclear energy

☑ No:

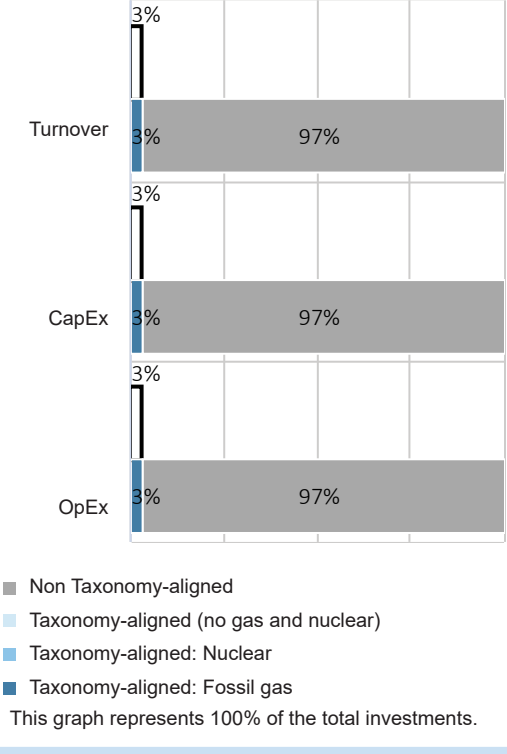

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 94% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 94% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 86% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 53 ESG engagement entries with 49 distinct companies held in the Portfolio. For these engagements, there were 43 discussions of environmental issues, and 26 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions, Water Management, Labor Management, Green Bonds & Environmental Sustainability-Linked Bonds.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 93% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	2.99%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
CDBL Funding 2 3.125%, 03/02/27	Financials	1.63	Cayman Islands

What was the proportion of sustainability-related investments?

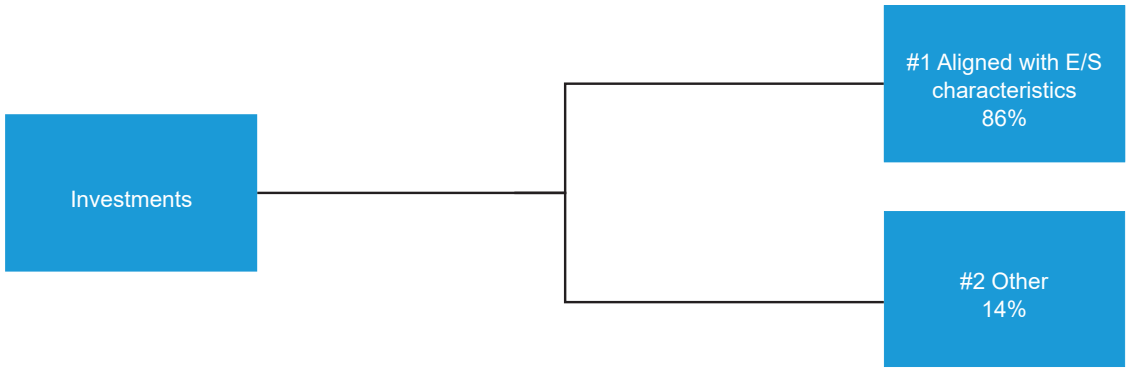

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 86%

#2 Other: 14%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

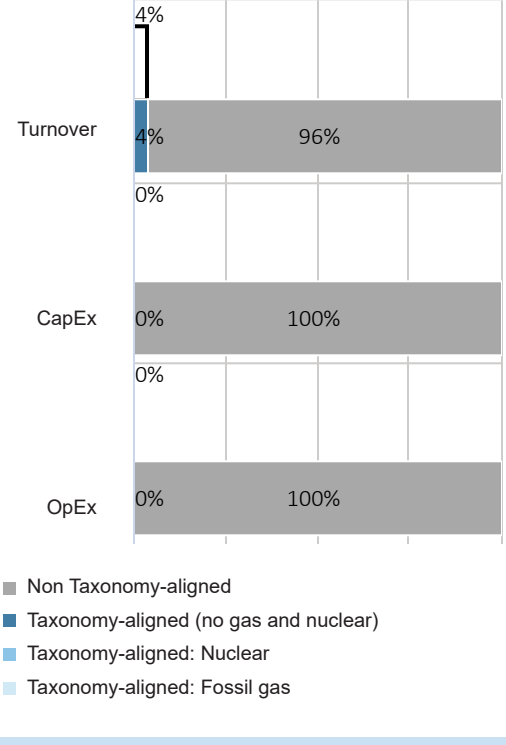

☐ In fossil gas ☐ In nuclear energy

☑ No:

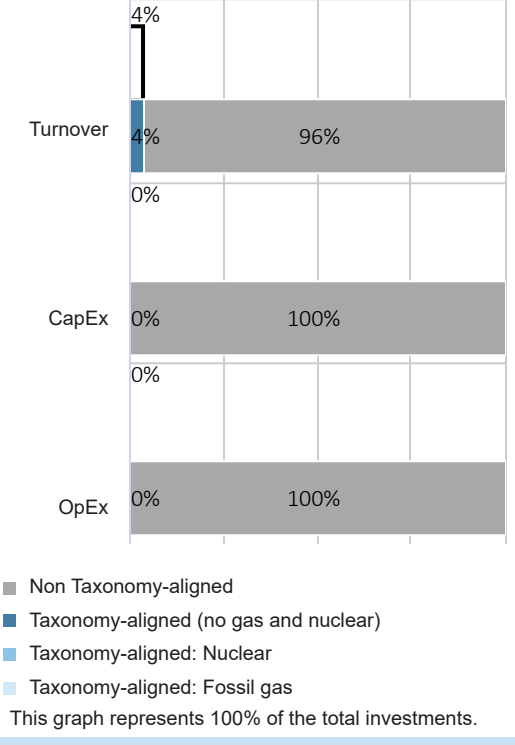

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 94% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Flexible Income Portfolio

Legal entity identifier: 549300APILN1H972W680

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 100% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 91% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 74 ESG engagement entries with 72 distinct companies held in the Portfolio. For these engagements, there were 55 discussions of environmental issues, and 37 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Opportunities in Renewable Energy, Climate Change Vulnerability, Green Bonds & Environmental Sustainability-Linked Bonds.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 100% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 92% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.71%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

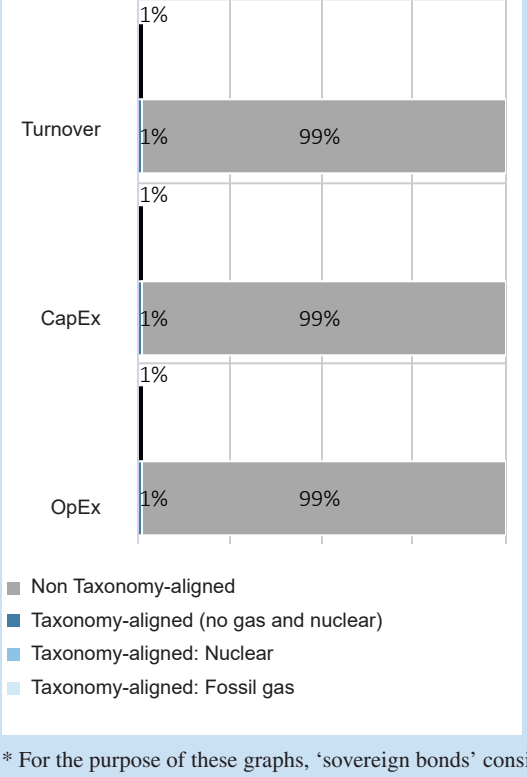

☐ In fossil gas ☐ In nuclear energy

☑ No:

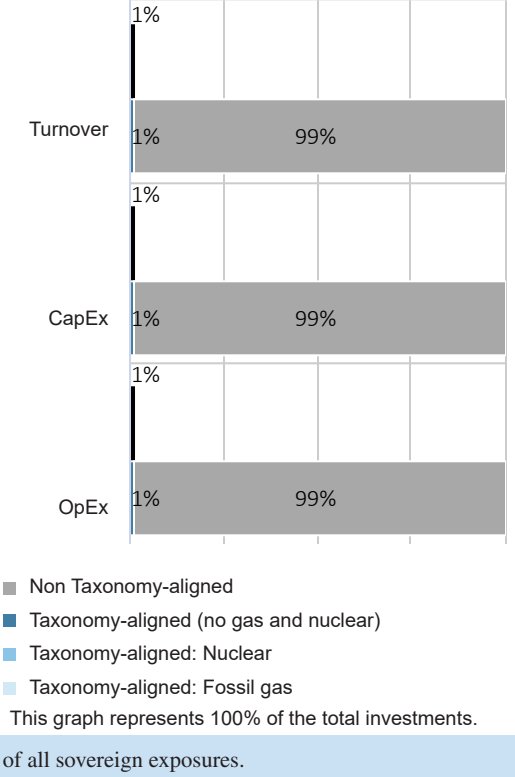

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.1

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 2% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 100% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Global Thematic Credit Portfolio

Legal entity identifier: 549300ITZU9WTIQJT278

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 23.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 75.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FIMAS9webdisclosures

How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 81.0%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 1 "No Poverty": 52.3%
- SDG 7 "Affordable and Clean Energy": 18.9%
- SDG 3 "Good Health and Well-Being": 9.5%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/FIExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 78.1%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 8 "Decent Work & Economic Growth": 27.9%
- SDG 3 "Good Health and Wellbeing": 21.3%
- SDG 7 "Affordable and Clean Energy": 14.6%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.

- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	8,670.89 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	54.82 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	586.12 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	12.52%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	84.01% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	59.57% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.74 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	8.22 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.80 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.02 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.04 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.06 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.21 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	4.83%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	1.35 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	0.15 in tons/million EUR invested
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	5.70%

PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	15.07%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	39.88%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	205.28 in tons CO2 equivalent /million EUR of owned GDP
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0.00 investee countries subject to violations
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	31.03%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	8.02%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	**Sector**	**% Assets**	**Country**
Bank of America Corp. 6.204%, 11/10/28	Financials	1.20	United States
Republic Services, Inc. 1.45%, 02/15/31	Industrials	0.84	United States

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 4% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

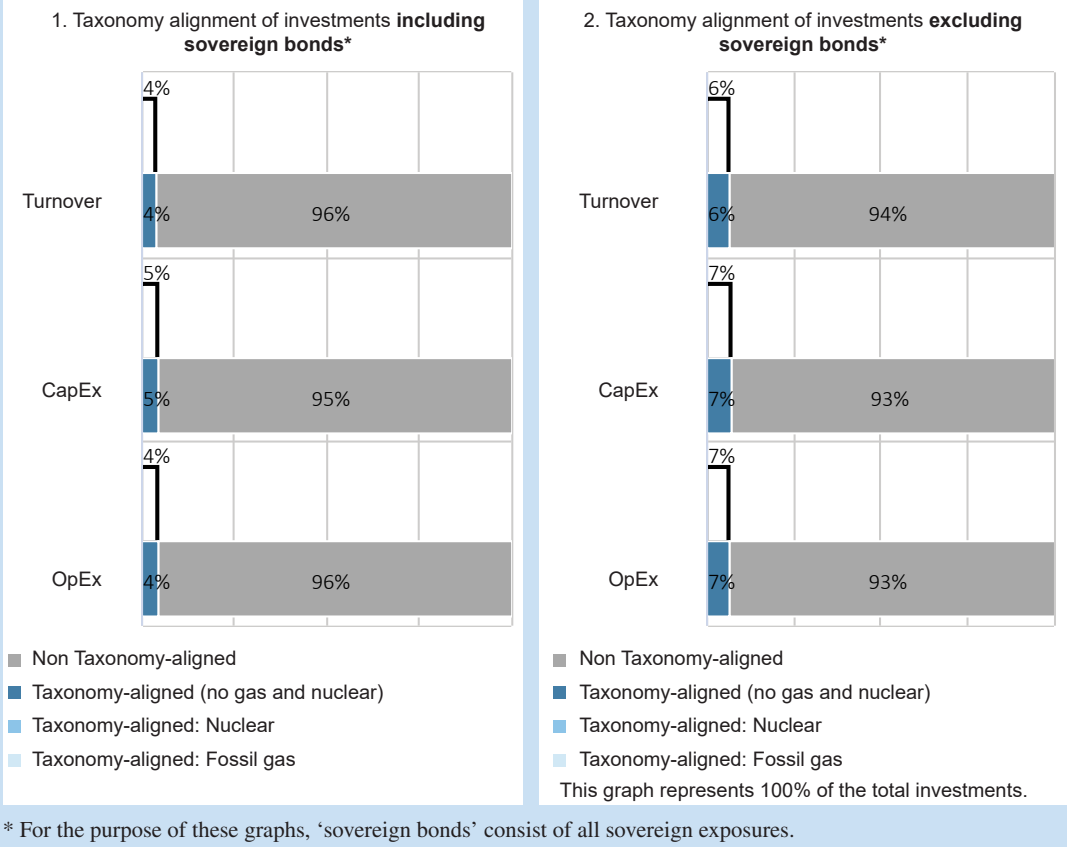

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 6% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

19%

What was the share of socially sustainable investments?

75%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Income Portfolio

Legal entity identifier: 254900NQPS853IBA0326

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 25.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 72.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FIMAS9webdisclosures

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 83.1%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 1 "No Poverty": 46.2%
- SDG 16 "Peace, Justice, and Strong Institutions": 23.2%
- SDG 7 "Affordable and Clean Energy": 8.6%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/FIExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

- **…and compared to previous periods?**

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 74.1%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 1 "No Poverty": 21.5%
- SDG 15 "Life on Land": 14.8%
- SDG 3 "Good Health and Well-Being": 10.3%

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.

- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	38,195.08 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	50.25 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	794.96 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	5.09%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	44.62% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	67.77% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.59 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.79 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	1.84 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.53 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.09 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.05 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.17 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.08 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	9.95%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	1.37 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	4.23 in tons/million EUR invested
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.00%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	4.97%

PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	15.41%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	33.24%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	423.55 in tons CO2 equivalent /million EUR of owned GDP
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0.33 investee countries subject to violations
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	41.56%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	11.13%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
FHLM 5.50%, 12/01/54 - 01/01/55	Agency Fixed Rate 30-Year	3.65	United States

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 2% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

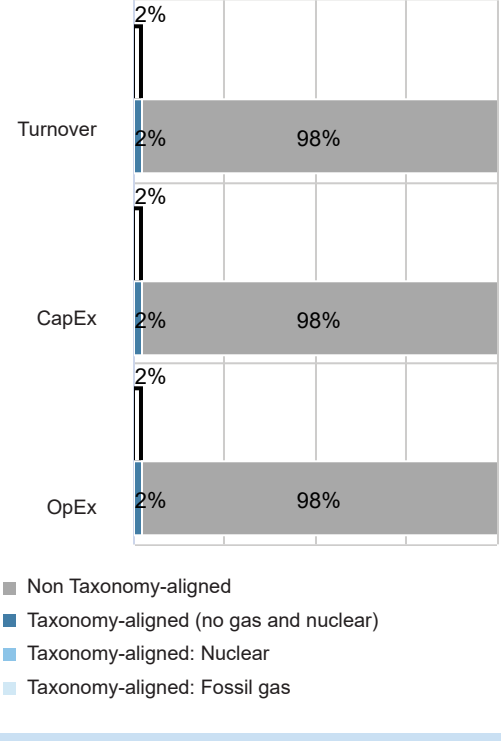

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

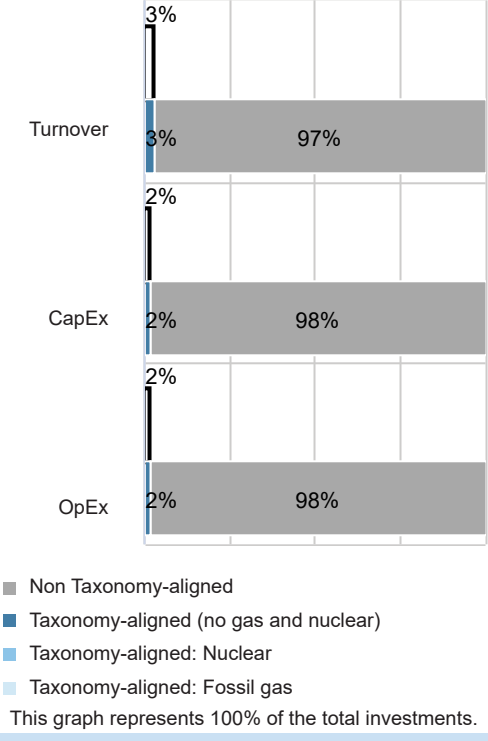

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

23%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

72%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia High Yield Portfolio

Legal entity identifier: 254900S30ATVUXGD2S33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This includes engagements where AB encouraged issuers to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used its proprietary scoring methodology to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FI8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 98% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 27 ESG engagement entries with 25 distinct companies held in the Portfolio. For these engagements, there were 23 discussions of environmental issues, and 11 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Climate Transition Plans, Carbon Emissions, Opportunities in Renewable Energy, Climate Change Vulnerability, Green Bonds & Environmental Sustainability-Linked Bonds.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 95% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.49%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for hedging purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026, 98% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier: 254900Z0FPBU617ZVM53

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- Systematic ESG Integration: When making investment decisions, including the ongoing assessment and monitoring of the Portfolio, quantitative research was used to identify and assess material ESG Factors that may mitigate risk or offer opportunities in relation to bond returns and systematic signals are developed to exploit market inefficiencies.

As part of the systematic ESG integration approach the fund utilised the below exclusions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons - AB Controversial Weapons Policy
- Tobacco / E-cigarette Producers - more than 10% revenue
- Firearms - more than 10% revenue
- Nuclear Weapons - more than 10% (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons - more than 20% revenue
- Oil Sands - more than 10% revenue
- Shale Oil/Gas - more than 10% revenue
- Arctic Gas - more than 10% revenue
- Unconventional Oil & Gas - more than 10% revenue
- Thermal Coal - more than 10% revenue
- Cannabis - more than 25% revenue

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FISY8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

  AB measured the attainment of E/S Characteristics promoted by systematically ensuring pre-trade compliance with ESG-related exclusions, as well as the ongoing monitoring of the quantitative ESG factors. Quantitative ESG Factor(s) were used to optimise the Portfolio and may have been used to compare the Portfolio's promotion of E/S characteristics with that of its benchmark. The quantitative ESG Factor(s) utilized may vary over time and will depend on the quantitative research team's determination of factors that are statistically significant to risk-adjusted returns.

  More information on these indicators can be found in AB's Sustainability-Related Disclosures: www.alliancebernstein.com/go/FISY8webdisclosures

  AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

  In the period to 31 May 2026, 96% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with the exclusions applied.

- **…and compared to previous periods?**

  In the year to 31 May 2025, 95% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with ESG-related screens and exclusions.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

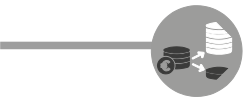

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.00%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

Natural Gas	0.53
Other Utility	0.10

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

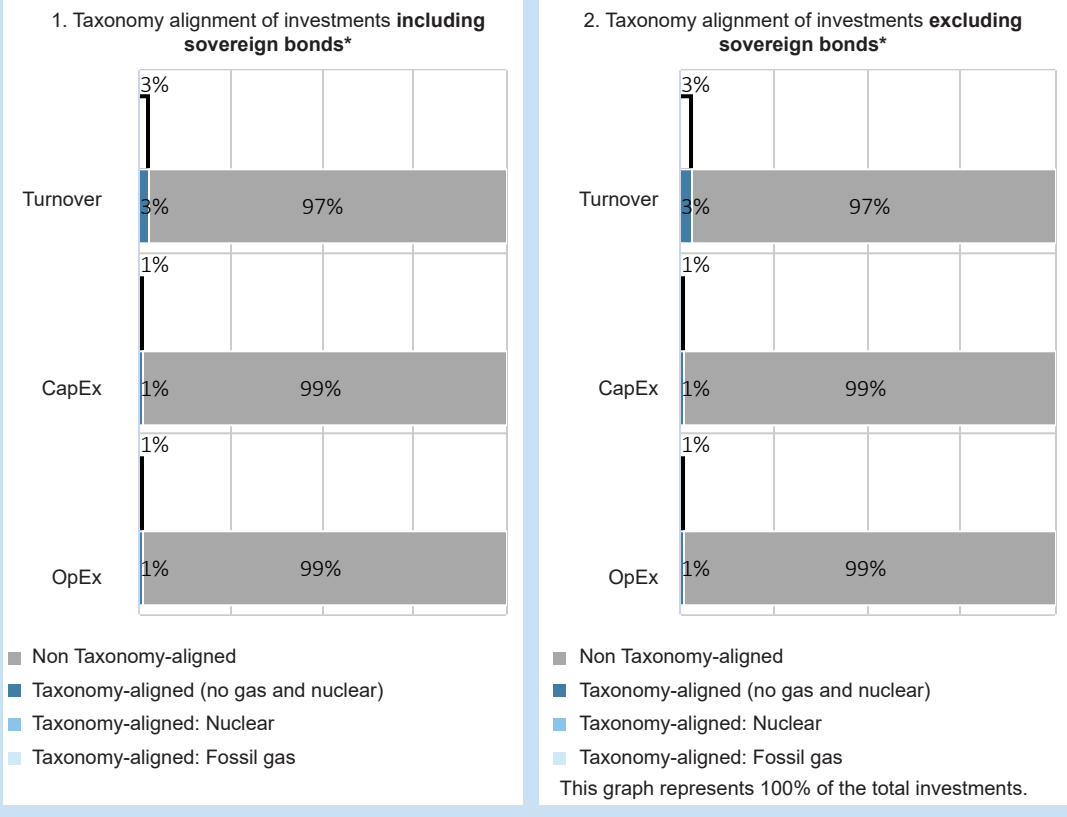

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash held for liquidity, risk management purposes, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

The Portfolio promoted E/S Characteristics by systematic ESG integration and by employing ESG-related screens and exclusions. A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio's ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Bond Portfolio

Legal entity identifier: 254900GRGF4UJJEVXZ78

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- Systematic ESG Integration: When making investment decisions, including the ongoing assessment and monitoring of the Portfolio, quantitative research was used to identify and assess material ESG Factors that may mitigate risk or offer opportunities in relation to bond returns and systematic signals are developed to exploit market inefficiencies.

As part of the systematic ESG integration approach the fund utilised the below exclusions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons - AB Controversial Weapons Policy
- Tobacco / E-cigarette Producers - more than 10% revenue
- Firearms - more than 10% revenue
- Nuclear Weapons - more than 10% (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons - more than 20% revenue
- Oil Sands - more than 10% revenue
- Shale Oil/Gas - more than 10% revenue
- Arctic Gas - more than 10% revenue
- Unconventional Oil & Gas - more than 10% revenue
- Thermal Coal - more than 10% revenue
- Cannabis - more than 25% revenue

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FISY8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

  AB measured the attainment of E/S Characteristics promoted by systematically ensuring pre-trade compliance with ESG-related exclusions, as well as the ongoing monitoring of the quantitative ESG factors. Quantitative ESG Factor(s) were used to optimise the Portfolio and may have been used to compare the Portfolio's promotion of E/S characteristics with that of its benchmark. The quantitative ESG Factor(s) utilized may vary over time and will depend on the quantitative research team's determination of factors that are statistically significant to risk-adjusted returns.

  More information on these indicators can be found in AB's Sustainability-Related Disclosures: www.alliancebernstein.com/go/FISY8webdisclosures

  AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

  In the period to 31 May 2026, 98% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with the exclusions applied.

- **…and compared to previous periods?**

  In the year to 31 May 2025, 98% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with ESG-related screens and exclusions.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

  N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

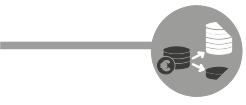

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.04%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
ING Groep NV 0.25%, 02/18/29	Financials	1.16	Netherlands

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  N/A - the Portfolio was designated Article 8 after 31 May 2025.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash held for liquidity, risk management purposes, or collateral management purposes.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

The Portfolio promoted E/S Characteristics by systematic ESG integration and by employing ESG-related screens and exclusions. A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio's ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Multi-Asset Portfolio

Legal entity identifier: 5493001DY5YPA6ICKB40

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 93% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 62% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 94 ESG engagement entries with 87 distinct companies held in the Portfolio. For these engagements, there were 72 discussions of environmental issues, and 44 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Green Bonds & Environmental Sustainability-Linked Bonds, Water Management, Opportunities in Renewable Energy.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 92% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 69% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	5.51%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	7.32	Taiwan

What was the proportion of sustainability-related investments?

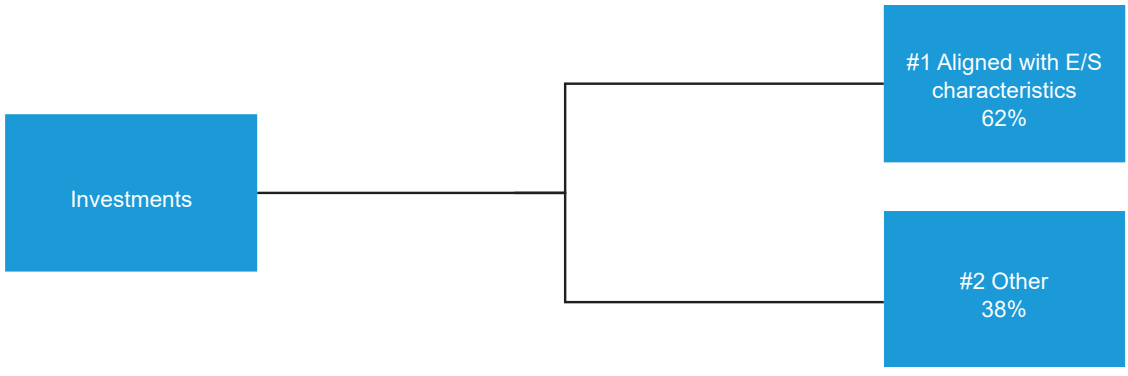

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 62%

#2 Other: 38%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

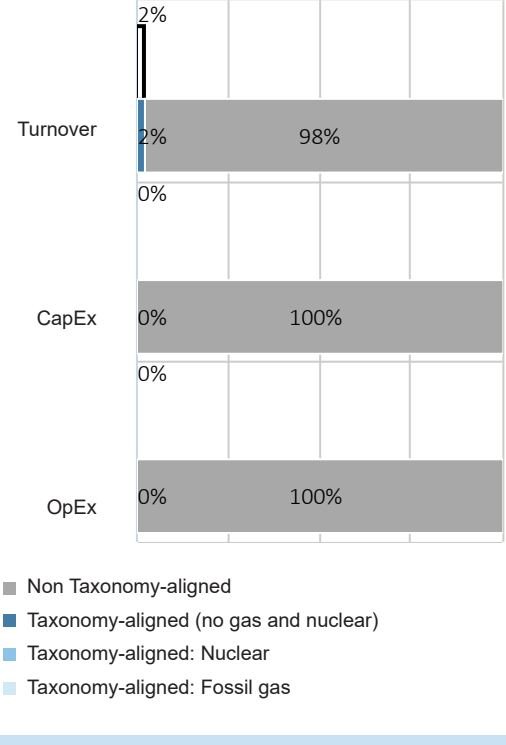

☐ In fossil gas ☐ In nuclear energy

☑ No:

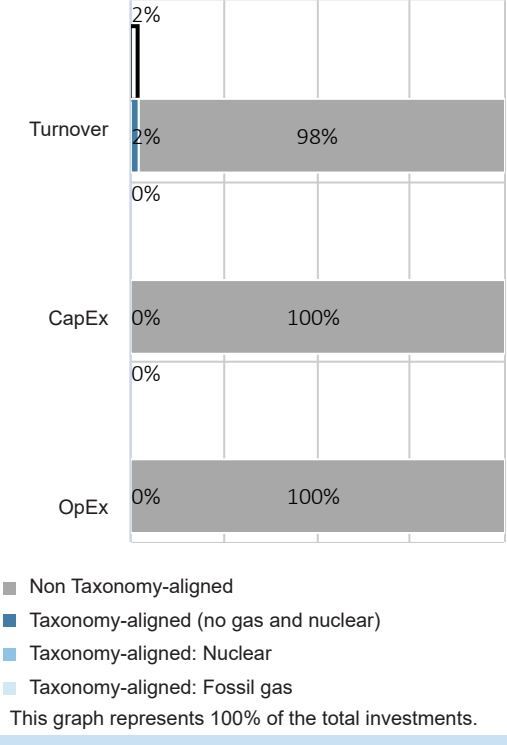

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 3% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 93% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: All Market Income Portfolio

Legal entity identifier: 54930061YRREE5X2T317

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.

Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus. These included the below ESG-related exclusions applied to the Portfolio's assets managed through the proprietary quantitative approach:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons
- Tobacco / E-cigarette Producers
- Firearms
- Nuclear Weapons (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons
- Oil Sands
- Shale Oil/Gas
- Arctic Gas
- Unconventional Oil & Gas
- Thermal Coal
- Cannabis

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 91% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 71% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 319 ESG engagement entries with 319 distinct companies held in the Portfolio. For these engagements, there were 178 discussions of environmental issues, and 181 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Carbon Emissions, Climate Transition Plans, Human Capital Management, Opportunities in Renewable Energy, Employee Health & Safety.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

For the Portfolio's assets managed through the proprietary quantitative approach, AB measured the attainment of E/S Characteristics promoted by utilising ESG-related screens and exclusions. These exclusions include, among others, controversial weapons, cannabis, private prisons, tobacco, and nuclear weapons. Please refer to the full list of exclusions and screens detailed in the Sustainability Related Disclosures for more information: www.alliancebernstein.com/go/MAS8webdisclosures

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 90% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 70% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.62%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

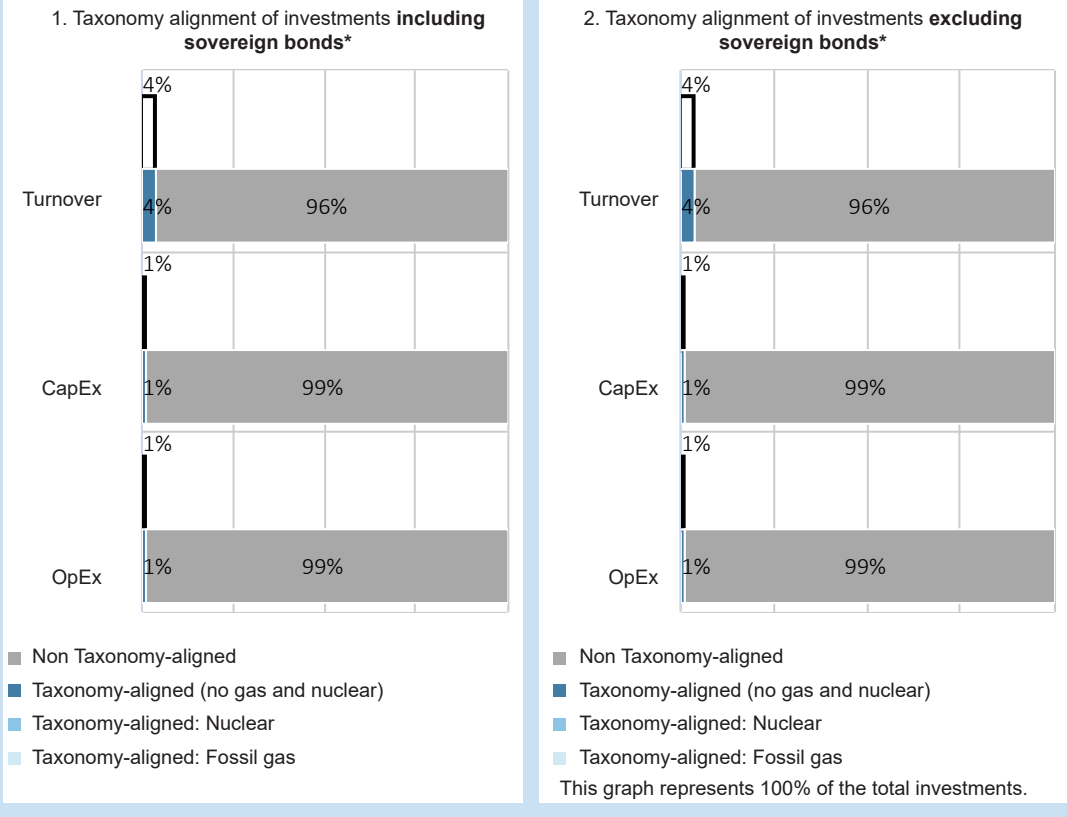

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 91% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

For the Portfolio's assets managed through the proprietary quantitative approach, the Portfolio promoted E/S Characteristics by employing ESG-related screens and exclusions. A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio's ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable All Market Portfolio

Legal entity identifier: 549300R2J2UEWCG1NY49

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ Yes	●○ ☐ No
☑ It made **sustainable investments with an environmental objective**: 40.00%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☑ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 57.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment. All issuers contributed directly to the achievement of at least one UN SDG.

More information on the alignment approach can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/FIMAS9webdisclosures

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

As detailed in the Prospectus, to measure alignment, AB analyses the percentage of corporate issuers' revenues derived from products or services that support the achievement of one or more UN SDGs. As at 31 May 2026, the weighted average UN SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services, was 85.4%.

As at 31 May 2026, the top 3 UN SDGs by aligned portfolio weight are shown below (weights reflect reweighted portfolio ex-cash and derivatives). Please note that some issuers may align to more than one UN SDG but, for the purposes of this calculation, issuers are mapped according to the primary UN SDG to which they are aligned. As such, issuers are only mapped to one UN SDG:

- SDG 8 "Decent Work and Economic Growth": 18.3%
- SDG 1 "No Poverty": 16.1%
- SDG 7 "Affordable and Clean Energy": 12.8%

The Portfolio applied the EU Paris-aligned Benchmark exclusions.

For sovereign & securitised issuers, all issuers met the relevant alignment criteria based on AB's proprietary methodology for themes derived from the UN SDGs.

AB has monitored the compliance with the exclusions listed in the Portfolio's Exclusion Policy available here: www.alliancebernstein.com/go/SAMExclusionPolicy

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

…and compared to previous periods?

As at 31 May 2025, the weighted average for SDG revenue exposure for the Portfolio, based on AB's proprietary assessment of aligned products and services was 89.4%.

As at 31 May 2025, the top 3 SDGs aligned by Portfolio weight were:

- SDG 8 "Decent Work and Economic Growth": 15.8%
- SDG 3 "Good Health and Well-Being": 12.6%
- SDG 1 "No Poverty": 11.7%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

All securities held within the Portfolio satisfied AB's proprietary methodology that uses the principal adverse impact ("PAIs") indicators to determine that a specific security meets the "Do No Significant Harm" principle outlined in SFDR (the "DNSH principle"). This methodology is comprised of a threshold-based scoring system, which uses a combination of internal and external data, alongside exclusion criteria. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy. The relevant data sources may evolve over time as more data becomes available and tools evolve.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and was ineligible for inclusion in AB's Article 9 products.

During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs, as well as considering the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

AB incorporated the consideration of PAIs on sustainability indicators into various aspects of the Portfolio's investment process. This included:

- The 'Do No Significant Harm Policy' where a threshold-based scoring system, devised by AB, was used to evaluate issuers based on a consideration of the materiality and severity of ESG Factors in relation to PAIs 1-9, 11-13, 15, 16 and the two optional indicators listed above. Issuers scoring in excess of the threshold were made unavailable for investment. During the period, all securities held in the Portfolio were compliant with AB's DNSH Policy.
- The Portfolio's Exclusion Policy which considers and mitigates the negative impact of certain PAIs by limiting investments in sectors such as, controversial weapons (PAI #14), or issuers violating the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI #10).
- AB's Policy with respect to engagement on ESG issues, as detailed in the AB Global Stewardship Statement, by which AB encouraged issuers to undertake actions that may promote better outcomes for environmental, and social, objectives, as well as benefits to the financial outcomes of the issuer and/or the Portfolio.

- AB's Proxy Voting Policy which evaluated whether ESG proposals promotes genuine improvement in the way that the company addresses ESG issues and may support such proposals. AB generally supported proposals in favour of financially material improvements in the management of environmental or social issues.

Below details the Portfolio's exposure to these PAIs as a weighted average as at 31 May 2026:

PAI ID	Adverse sustainability indicator	Metric	PAI's for 31st May 2026 - Weighted Average
PAI 1	Greenhouse Gas (GHG) Emissions	Scope 1-2-3 GHG Emissions	14,669.42 in tons CO2 equivalent
PAI 2	Carbon Footprint	Carbon footprint - Scope 1-2	22.03 in tCO2e/million EUR invested
PAI 3	GHG intensity of investor companies	GHG intensity of investee companies - Scope 1-2-3	638.73 in tCO2e/million EUR of owned revenue
PAI 4	Exposure to companies active in the fossil fuel sector	Shares of investments in the companies active in the fossil fuel sector	8.02%
PAI 5	Share of non-renewable energy production	Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources	59.83% of total energy sources
PAI 5	Share of non-renewable energy consumption	Share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources	61.34% of total energy sources
PAI 6	Energy consumption intensity per high impact climate sector NACE A	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.00 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE B	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.56 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE C	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.11 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE D	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	3.56 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE E	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.63 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE F	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.10 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE G	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.08 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE H	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	1.57 in GWh/million EUR of revenue
PAI 6	Energy consumption intensity per high impact climate sector NACE L	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector.	0.42 in GWh/million EUR of revenue
PAI 7	Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/ operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas.	4.60%
PAI 8	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested.	0.79 in tons/million EUR invested
PAI 9	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested.	0.18 in tons/million EUR invested
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	0.09%
PAI 11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance or complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises.	2.61%

PAI 12	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies.	13.25%
PAI 13	Board gender diversity	Average ratio of female to male board members in investee companies expressed a percentage of all board members.	36.51%
PAI 14	Exposure to controversial weapons (anti personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons.	0.00%
PAI 15	Greenhouse Gas (GHG) intensity	GHG intensity of investee countries	220.40 in tons CO2 equivalent /million EUR of owned GDP
PAI 16	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0.00 investee countries subject to violations
Add-1	Investments in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	38.63%
Add-2	Lack of a human rights policy	Share of investments in entities without a human rights policy	5.78%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	**Sector**	**% Assets**	**Country**
Sustainable Global Thematic Credit Portfolio	Funds and Investment Trusts	10.03	Luxembourg

What was the proportion of sustainability-related investments?

The Portfolio invested 97% in sustainable investments

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

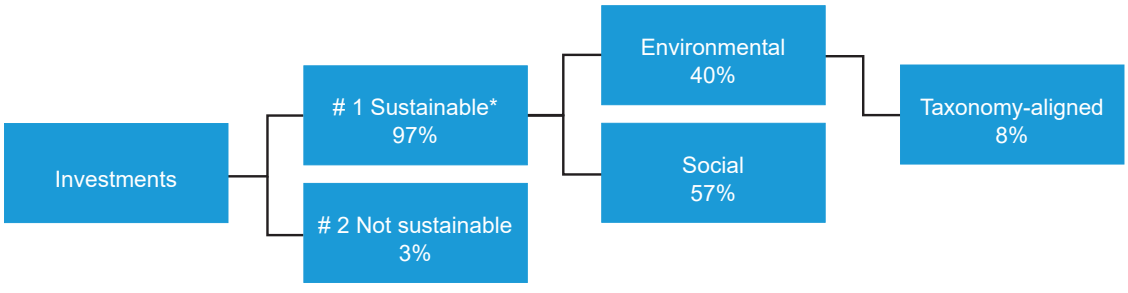

#1 Sustainable: 97%

E Sustainable: 40%

S Sustainable: 57%

Taxonomy Aligned: 8%

#2 Not Sustainable: 3%

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* Note that the sum of the E/S Sustainable Investments may not sum due to rounding

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Portfolio invested 8% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31 May 2026. The investments contributed to the environmental objective listed in the EU Taxonomy. The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third- party.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

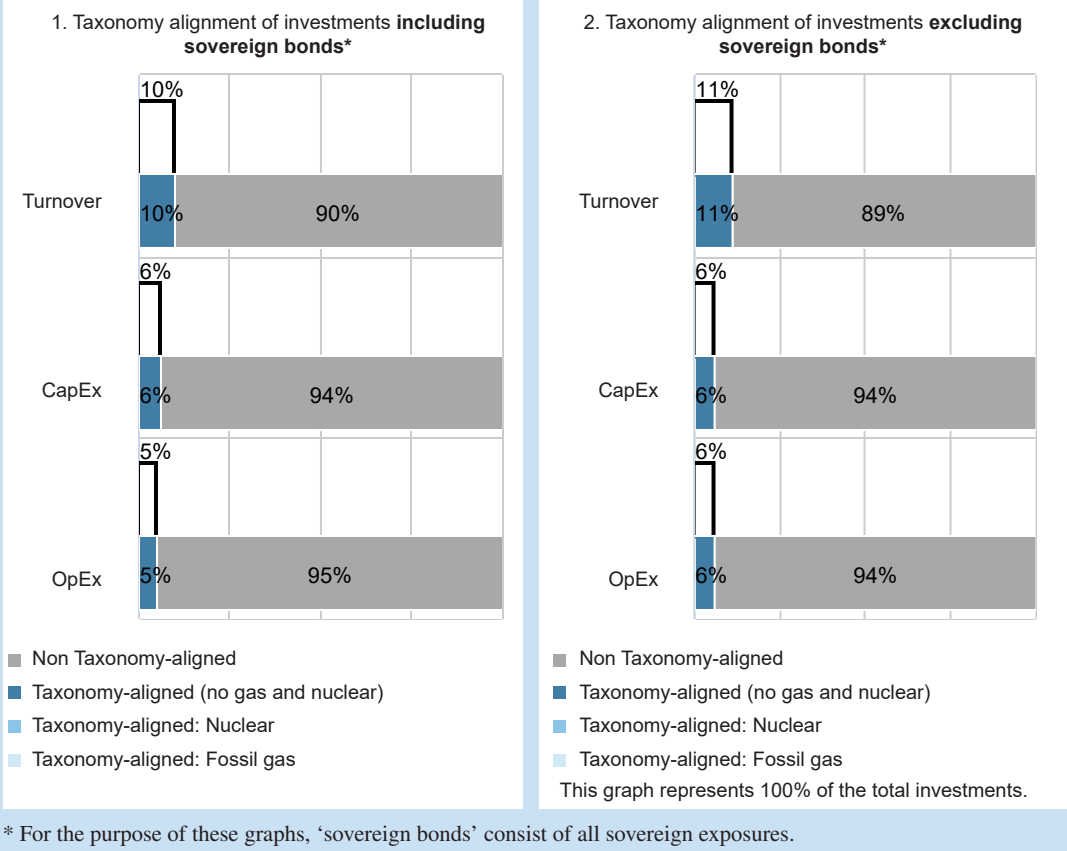

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

  As of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

32%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

57%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Cash and cash-equivalents held for liquidity purposes.
- Derivatives used for hedging and efficient portfolio management.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Portfolio achieved its investment objective through investments in securities which are deemed to be sustainable investments.

A security was deemed to be a sustainable investment if the following criteria were satisfied:

- AB believed the security was positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN SDGs, as confirmed by compliance with the relevant minimum revenue threshold for UN SDG- aligned products and services (top-down approach).
- AB assessed the issuer on ESG Factors (bottom-up approach).
- During the reference period, as applicable, the security was compliant with AB's proprietary methodology to determine that a specific security meets the DNSH principle.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions as detailed in the Portfolio's Exclusion Policy.

How did this financial product perform compared to the reference sustainable benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining sustainable investments.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**
  N/A
- **How did this financial product perform compared with the broad market index?**
  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers. This may have included ESG scoring of equity securities.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- ESG Scoring: AB used a variety of proprietary scoring methodologies to score issuers using ESG Factors.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/MAS8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, ESG scoring, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

As at 31 May 2026, 71% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2026, 63% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

Specifically, in the year to 31 May 2026, there were 77 ESG engagement entries with 59 distinct companies held in the Portfolio. For these engagements, there were 28 discussions of environmental issues, and 47 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Carbon Emissions, Privacy & Customer Data, Product Safety & Quality, Diversity & Inclusion.

The Portfolio's ESG Scoring Framework is conducted in Prism, a proprietary rating and risk factor scoring system used to convert our analyst's qualitative research views on an issuer into a structured profile comprising a series of risk factor scores and credit ratings. Material ESG considerations are an explicit component of our Prism scoring methodology.

Each issuer with an ESG score has been assessed on E, S, and G factors, and the resulting weighted average ESG score has the potential to influence the overall internal AllianceBernstein credit ratings. Our Sovereign ESG Scoring Framework creates a baseline score based on more than 20 material E, S and G factors by comparing countries on a broad range of metrics.

AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

As of 31 May 2025, 53% of the Portfolio possessed an ESG score based on AB's proprietary methodology, and in the year to 31 May 2025, 67% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and scoring, as well as engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.21%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

What was the proportion of sustainability-related investments?

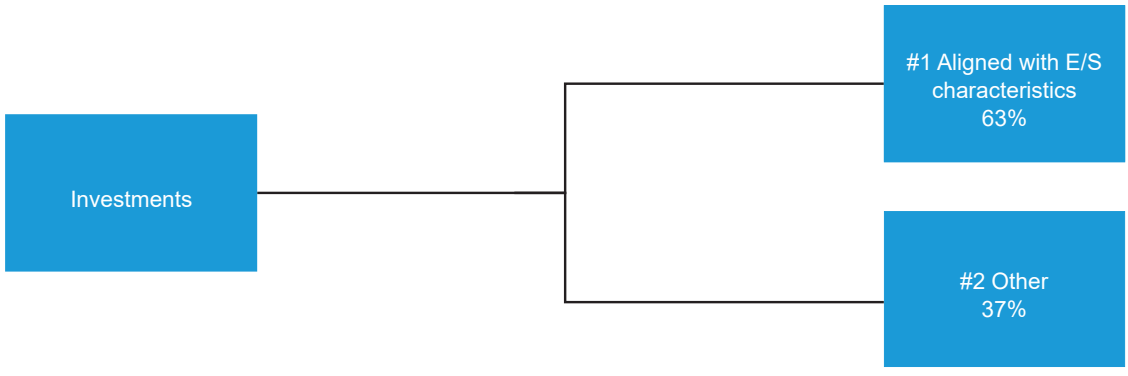

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 63%

#2 Other: 37%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

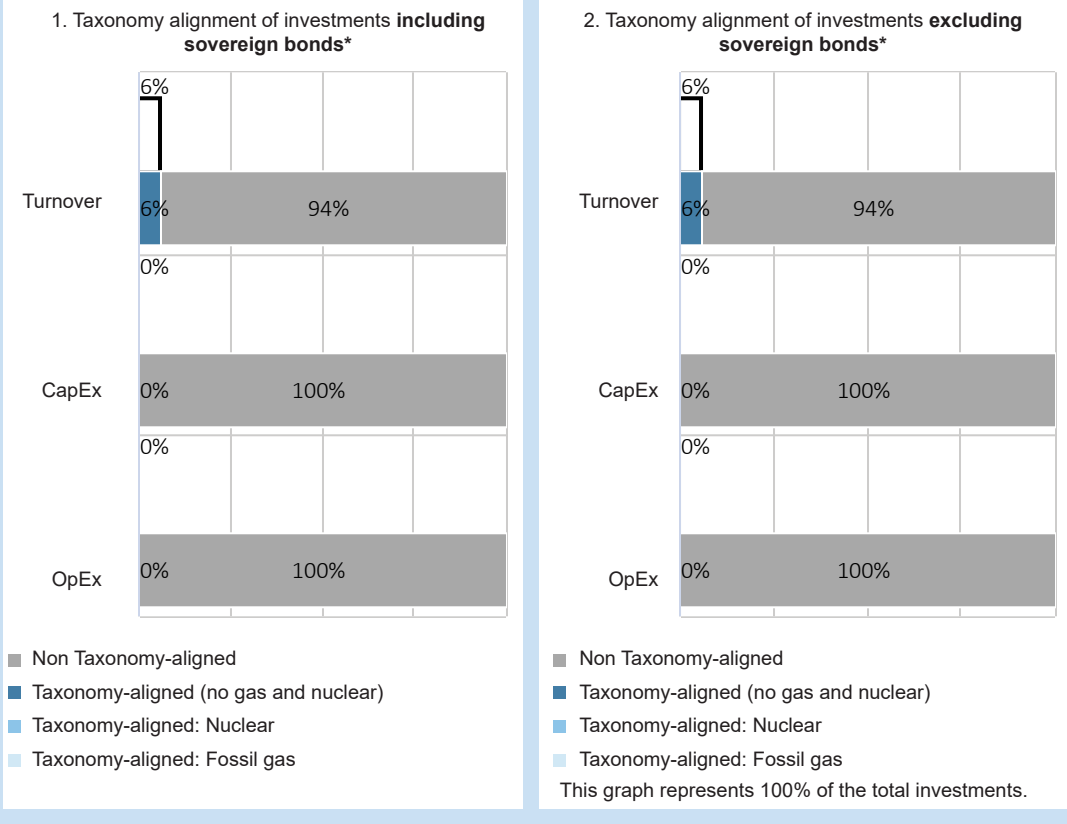

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No:

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 4% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Securities that AB believes could be held by the Portfolio in order to achieve its investment objective but were not deemed to promote E/S Characteristics, subject to the satisfaction of AB's Good Governance Policy.
- Derivatives used for the purposes outlined in the Prospectus. Exposure to securities that promote E/ S Characteristics is captured in #1 Aligned with E/S Characteristics.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- Documented ESG integration was evidenced for the issuer through ESG research and Engagements.
- The issuer was scored using ESG Factors. As of 31 May 2026 71% of the Portfolio had an ESG score.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.
- The security was compliant with the Portfolio's investment exclusions.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Select Absolute Alpha Portfolio

Legal entity identifier: 5493006QLRUE9822LF33

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S Characteristics") promoted by the Portfolio included:

- ESG Integration: AB used fundamental research, including the consideration of ESG Factors, to assess target issuers.
- ESG Scoring: AB used a proprietary scoring methodology to score issuers using ESG Factors.
- Engagement: AB encouraged companies to undertake actions that may promote better outcomes for environmental and social objectives as well as benefits to financial outcomes of the issuer and/or the Portfolio.
- Exclusions: The Portfolio was in compliance with the exclusions mentioned in the Prospectus.

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EQ8webdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

  AB measures the attainment of E/S Characteristics promoted through various quantitative and qualitative methodologies including the measurement of documented ESG research, engagement, and relevant investment exclusions, subject to satisfactory data and data sourcing.

  In the year to 31 May 2026, 91% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

  Specifically, in the year to 31 May 2026, there were 38 ESG engagement entries with 28 distinct companies held in the Portfolio. For these engagements, there were 20 discussions of environmental issues, and 24 discussions of social issues (for the avoidance of doubt, an engagement entry may include discussions on multiple topics). The most frequently discussed E/S issues were: Human Capital Management, Carbon Emissions , Climate Transition Plans, Diversity & Inclusion, Product Safety & Quality.

  AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

- **…and compared to previous periods?**

  In the year to 31 May 2025, 78% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

  N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

  N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

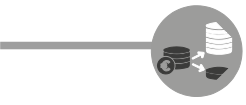

The Portfolio considered the following PAIs:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (#10).
- Exposure to controversial weapons (#14).

For PAI 10, AB monitored for breaches of the UN Global Compact principles for securities held by the Portfolio.

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026- Weighted average
PAI 10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.58%
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☑ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Environmental and/or social characteristics ("E/S Characteristics") were promoted by the Portfolio through ESG- related screens and exclusions.

The Portfolio utilised the below investment exclusions on both the long and the short positions:

- MSCI ESG Rating - CCC rated
- UN Global Compact Compliance - All Non-Compliant
- Controversial Weapons
- Tobacco / E-cigarette Producers
- Firearms
- Nuclear Weapons (except where permitted under the UN Treaty on the Non Proliferation on Nuclear Weapons)
- Private Prisons
- Oil Sands
- Shale Oil/Gas
- Arctic Gas
- Unconventional Oil & Gas
- Thermal Coal
- Cannabis

More information on these characteristics can be found in AB's Sustainability-Related Disclosures:

www.alliancebernstein.com/go/EVPwebdisclosures and more information on the AB Stewardship Approach can be found at: www.alliancebernstein.com/go/ABGlobalStewardship.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

AB measured the attainment of E/S Characteristics promoted by utilising ESG-related screens and exclusions. These exclusions include, among others, controversial weapons, cannabis, private prisons, tobacco, and nuclear weapons. Please refer to the full list of exclusions and screens detailed in the Sustainability Related Disclosures for more information: www.alliancebernstein.com/go/EVPwebdisclosures

All securities are monitored to ensure that they comply with the Portfolio's investment exclusion criteria. Only issuers that do not breach the exclusion criteria are eligible for investment. AB has monitored the compliance with the exclusions listed in the prospectus and confirms they were met.

In the year to 31 May 2026, 80% of the Portfolio was deemed to promote E/S Characteristics on the basis of compliance with the exclusions applied.

- **…and compared to previous periods?**

In the period to 31 May 2025, 82% of the Portfolio was deemed to promote E/S Characteristics through documented ESG research and engagement on environmental and social issues.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

N/A

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Portfolio considered the following PAIs:

- Exposure to controversial weapons (#14).

For PAI 14, the Portfolio excluded controversial weapons.

PAI ID	Adverse sustainability indicator	Metric	PAIs for 31/05/2026-Weighted average
PAI 14	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0.00%

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01 June 2025 - 31 May 2026

Largest investments	Sector	% Assets	Country
JPABSCME, 03/16/26	Funds and Investment Trusts	41.91	United States

Electronic Arts, Inc.	Communication Services	0.90	United States

What was the proportion of sustainability-related investments?

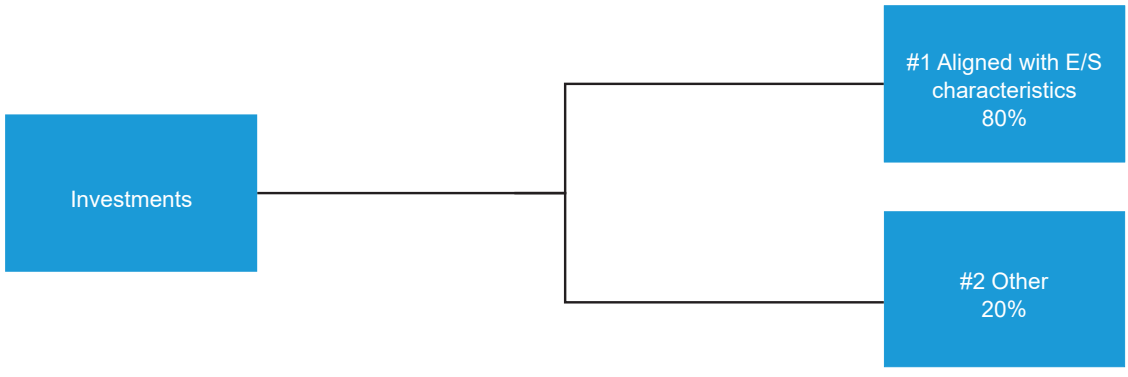

N/A

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics: 80%

#2 Other: 20%

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector and Sub-sector	% Assets

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
– **turnover** reflecting the share of revenue from green activities of investee companies.
– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

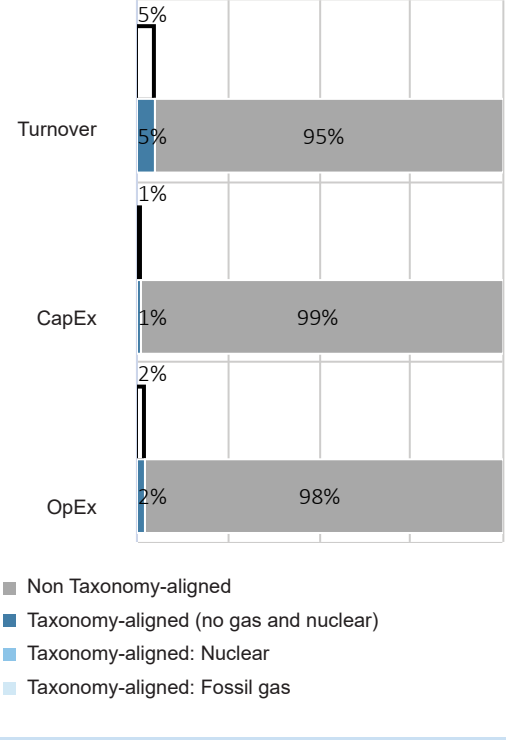

☐ In fossil gas ☐ In nuclear energy

☑ No:

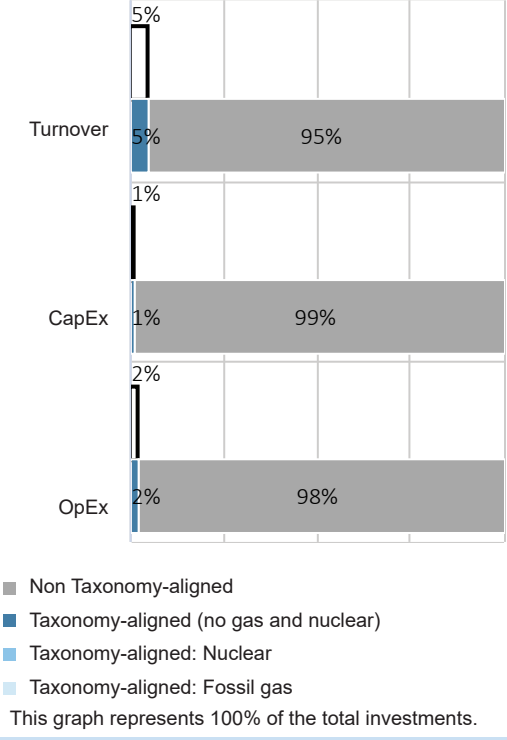

The Portfolio did not seek exposure to fossil gas and/or nuclear energy-related activities and did not set any minimum exposure thresholds that were aligned with the EU Taxonomy. However, as a result of the implementation of its specific investment strategy, it may have held investments with marginal exposure to such activities.

The graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds

1. Taxonomy alignment of investments **including sovereign bonds***

2. Taxonomy alignment of investments **excluding sovereign bonds***

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

While the Portfolio did not intend to make EU Taxonomy-aligned investments, a percentage of the Portfolio's actual investments was reported as EU Taxonomy-aligned during the reference period, as required by the ESAs.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.4

- **What was the share of investments made in transitional and enabling activities?**

  As of the date of this report, AB does not have access to suitable data to accurately report on transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  While the Portfolio does not intend to make EU Taxonomy-aligned investments, as of 31 May 2025, 1% of the Portfolio was deemed to align with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

This included:

- Any securities or derivatives that did not satisfy all ESG-related screens and exclusions.
- Cash held for liquidity, risk management purposes, or collateral management purposes.

For these assets, there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Portfolio promoted E/S Characteristics by holding securities that AB believes promoted E/S Characteristics.

A security was deemed to promote one or more E/S Characteristics if the following binding elements were satisfied:

- The security was compliant with the Portfolio's ESG-related screens and exclusions.
- During the reference period, as applicable, the issuer of the security was compliant with AB's Good Governance Policy.

How did this financial product perform compared to the reference benchmark?

The Portfolio did not use a designated reference benchmark for measuring sustainability or determining E/S Characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  N/A

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  N/A

- **How did this financial product perform compared with the reference benchmark?**

  N/A

- **How did this financial product perform compared with the broad market index?**

  N/A
